

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

PREFACE.

Some elaborate treatises on Chronology have appeared in the *Encyclopædia Metropolitana*, in the *Penny Cyclopædia*, in the fifth volume of *Lardner's Museum of Science and Art*, in *Sir Harris Nicholas's Chronology of History*, and other publications. Every method is explained except that used by the Hindus. Warren alone (see page 27) has mastered the subject, in his *Kala Sankalita*—a ponderous volume of five hundred pages, published at Madras in 1825. He begins at A.D. 1600, and gives the titles. Though written in English, this requires an interpreter; a compendium of it is given by the learned Prinsep in his *Useful Tables*, published at Calcutta. He, like Warren, begins at 1600, but he suppresses the titles, on which the whole system turns.

No one of all these books gives any historical occurrences.

Sir William Jones, Beschi, Colebrooke, Prinsep, Mill, Wilson, and other eminent Sanscrit scholars, knew the Hindu method, but have not explained it: they have examined many points of history, but have left us in want of a key to their statements.

Some English authors, more visionary than exact, have tried to make up in daring theories what they wanted in precise knowledge.

The Hindus themselves, laboriously exact in astronomical observations and calculations, have neglected history. We find lists of years alone, and lists of rajas alone; if the two are connected it is so mysteriously that few can see the truth.

The Musulman historians of India are voluminous, but tell us little beyond the deeds of their own Sultans. They are precise in their dates, but not always veracious.

Those who have had occasion to transact business with Hindus, or to translate documents written by them, often feel the want of a key to the various dates in use. For instance: a letter is dated "On new moon in (the month) Vaisakha in (the year bearing the title) Chitrabhán." This is in English the 20th of May, 1822. Or, "the 13th of the bright fortnight in (the month) Sravana in (the year) Saumya." This is equivalent to the 1st August, 1849. The Madras newspaper, printed in the Telugu language, on the 10th April, 1850, is dated "Year Sádharana, 13th of the wane, in the month Chaitra."

Thus the Hindus know their years by titles, dispensing with numerals.

Even in more important documents the same is the method. In a Marata memoir of Hyder Ali, each year is thus specified. All Hindus know by tradition that Hyder's final raid took place in "Sarvari" (A.D. 1780); but the numeral (SS. 1702) is forgotten, or known only by counting. Some Sanscrit and Telugu books are dated in the same style.

Various methods are in use, and the reckoning begins on various days. See page 82.

The years in all the methods are lunar; using various intercalations to adjust the months to the seasons. See page 88.

There are sixty TITLES—which appear in the first nineteen pages. These are counted in Cycles. A.D. 1806 was the sixtieth year of the eighty-first Cycle, named *Acshya*; the next year is *Prabhava*, the first of the eighty-second Cycle. Natives know the year by the title alone, neglecting all numerals. See page 82.

Some readers will condemn this system as arbitrary and intricate. This cannot be helped. It is their plan, and it is my business to explain it. The Hindus venerate antiquity, and highly value their own method, even after understanding that used in Europe. In Hindu schools the list of titles is daily repeated, forwards and backwards, with numerals.

The system of sixty years pervades India, Java, Ceylon, Burma, and China. Yet titles differ; and the initials of the Cycles do not agree. Some have attempted to explain the meanings of the titles; but that is of no avail.

One circumstance has rendered the system perplexing; and this is remedied in the present volume. Though punctiliously exact as to the month, day, lunations, hour, and moment, the Hindus often omit the year. If they specify it, they too often give the title alone, not the numeral. If the numeral is given, it sometimes is true, sometimes false. And this has been the custom from the commencement. Thus, SS. 1119 is the year *Irgala*; which title, in some inscriptions, is marked 1118. The next year, *Kalayucti*, is 1120; yet on some marbles it is written 1124; and the following year, *Siddharti*, instead of 1121 is written 1120. The name *Paridháva* belongs to SS. 1654; yet this is sometimes marked 1653, and elsewhere 1655. The year *Prajotpatti* (A.D. 1811), instead of SS. 17 is written 1731. And two years later, *Srimukha*, instead of 1735, is written 1736.

Some have fancied that the lapse of ages, or error in transcription, may have caused such errors. But the date being recorded in words, in Sanscrit verse, and in symbolical expressions (see page 21), error is out of the question. This easy indifference happens in recorded dates; thus documents dated in A.D. 1809 would correctly be SS. 1731, but one record says 1730, and another 1732. In some ancient inscriptions error is out of the question, for the date is stated in words, and determined by the curious method of symbols, explained in page 20.

The variation is seldom more than three years, plus or minus. Yet the year SS. 1115 (A.D. 1215) of which the title is *Yuva*, is in three Inscriptions written 1127.

In fact the Hindus are punctilious as to the Title, and care little for its numeral. In every Chronological investigation we must ascertain the Title. Even in some almanacs we find the same easy indifference as to the numeral. Thus the manuscript *Telugu Almanac* for the year *Vicriti* (A.D. 1830), SS. 1752, is in some copies marked 1751, and others 1753.

The Regulations enacted by Government of course require exact dates. Yet if we look into the *Madras Regulations*, we find, Reg. vii. of A.D. 1809 (title *Suola*) marked SS. 17 instead of 1731; Reg. i. of 1816 (title *Yuva*) is styled SS. 1736 instead of 1737; Reg. of 1823 is dated (*Srimukha*) SS. 1734, whereas it is 1735. Yet in 1813 and 1821 there is no error. Prinsep, in his useful *Tables*, page 56, gives other instances, shewing that the Government enactments are erroneously dated.

In the tables appended to the *Kala Sankalita*, the Bramhan astronomer has stated that the years were called in this treatise by one title, and in another treatise by the next; or being the Southern, one the Northern reckoning. But this solution is of no avail; for it represents the variation as peculiar to a set of fifteen years in each cycle; whereas it is universal. He makes the error always plus, whereas it is as often minus: he makes the quantity only one year, whereas it is sometimes three, sometimes six years. He is silent regarding the anomalies in the southern reckoning; and, finally, the authorities he quotes are fictitious, for the books he names were written some centuries before the dates he records; and eminent native astronomers of modern days deny the truth of his quotation.

The titles "*Prabhava*, *Vibhava*," and the rest, are uniform throughout India; but the

reckoning varies. Thus, A.D. 1850 is in Bengal named Durmati, which is the fifty-fifth year of the eighty-fourth cycle; but in Southern India it is named Sádharana, the forty-fourth year of the eighty-second cycle. And in China it falls in another year of another cycle.*

In the earlier pages of the Chronology (p. 50) I have marked the A.D. as *Probable*; for we cannot establish the precise solar year that answers to a Hindu lunar date; though the intercalations in course of time adjust the difference. The Hindu numerals would have sufficed, but that they fluctuate.

Several eclipses are noted in this Chronology. And I had hoped to have fixed the period by comparing these with the tables of eclipses in "l'Art de Verifier les Dates;" but I was disappointed. Hales observes† that "Sir Isaac Newton has in his Chronology omitted the evidence of eclipses; perhaps because they would not bend to his favorite hypothesis." But the venerable Colebrooke (Essays, vol. 2, p. 277) has more sagaciously remarked that he could not make the eclipses tally. (Compare Gentleman's Magazine for 1775, p. 164). See page 82.

The system of titles is now, for the first time, exhibited complete; by theory, calculated by bramhan astronomers, as far as A.D. 990, and after that time by the evidence collected from ancient inscriptions. These record little more than donations of land; which have long since been abrogated, either by Musulman invasions or by the lapse of ages. But the dates are given, and also the names of the rajas.

The various years have different initial days; this is shewn in pages 82 and 86. Some remarks are added on the names of lands and languages.

Among Colonel Mackenzie's records there were several genealogies of ancient families. Few of these declare the dates of the personages. The ancient portion is too often as fabulous as that in which Virgil attempts to prove that Augustus descended from Æneas. In the modern part the dates are too often omitted, or else inserted inaccurately. Occasionally the same personage appears under various names; just as George, Prince of Wales, afterwards Regent, and afterwards King. Or if the name is derived from a god, the same raja is at pleasure styled by any title of the idol. Some of the Musulman rulers changed their titles in the same manner.

In some chronological statements there is exaggeration; which is easily corrected by posting every document under the proper year. Dr. Francis Buchanan Hamilton, M.D., a surveyor, who printed "A journey from Madras through Mysore, &c.,"‡ has preserved several other genealogical tables; and is generally correct in his calculations of time.

Lieutenant-Colonel Mark Wilks, in his Historical Sketches of Southern India, with a History of Mysore (three volumes, quarto, published in 1810) has given the genealogy of the rajas of that country, but his dates are a riddle to me; they do not accord with any known reckoning; and he does not expound his method.

The few genealogies I print in the present volume are interesting either from the persons named or from the mystery and error in which they have been veiled by native chroniclers.

The inscriptions collected by Colonel Mackenzie were rated by Professor Wilson at about seven thousand. The Honourable Walter Elliot made a separate collection, chiefly in

* See the Chinese Repository for May, 1819; quoted in Allen's India Mail, 1850, p. 302.

† Hales's Chronology, edit. 1830, vol. 1, p. 252.

‡ In three volumes, 4to, London, 1807. The Rev. Dr. Claudius Buchanan, author of the Christian Researches, travelled through part of the same country about the same period.

the Southern Marata country, containing five hundred and ninety-five. And the late Captain Newbold, another zealous antiquarian, obtained about three hundred more. All of these I examined. There was much tautology in the more modern portion; a single insignificant prince having some hundreds bearing his name in a short reign. They were chiefly written in Sanscrit, the characters of the writing being Telugu, Haleh-Cannadi (or ancient Karnátáca), and Tamil, with a few in Devanagari. Few of them specify what reign began or ended.

After the year A.D. 1500 we meet with several inscriptions in Arabic or Persian. From that time therefore the Hejri dates have been recorded (see page 15), and after the year 1627 the Fasli dates also are given. Some remarks on these, with the eras used in Bengal, are given in page 30—34.

The Kollam (or Quilon) era is peculiar to the South-west, or Travancore country. I have found records thus dated, older than A.D. 1507. See pages 15 and 34.

The dates in these pages are chiefly those of the Cycle of sixty years: which is the great chronological measure throughout India and China. See page 26.

The ancient astronomers in India, fixed on a particular point of time, 3100 years before the Christian Æra, called the commencement of the Kuli Yug: equivalent to the (A.M.) Age of the World. This resembles the Julian Period used in Europe. Upon this all the calculations are based. (See pages 1 and 25.) But the historical period begins A.D. 70 and is called the Sacam, or era of Salivahana (see p. 6), a personage regarding whom nothing is known. The theories on the subject may be seen in the Asiatic Researches (See page 25.) Real history begins about a thousand years later.

After A.D. 1550 the Musulman date called Hejri, or Hegira* ("The Emigration or Flight") commences (pages 15 and 20); and about this time we meet the Kollam date (p. 15, 25, 26, and 34). The Fasli, or Revenue, year (p. 16 and 21) begins soon after. The Samvat (literally "Year") of Vicramaditya (see pages 16, 25, and 34), is chiefly used in Western and Northern India. It begins 135 years before the Salivahana Sacam. See page 34.

These dates are used in business. My first object was to ascertain the correct reckoning; grounding the demonstrations upon the inscriptions on rocks or elsewhere in southern India. The dates are often recorded hieroglyphically, in symbols. These are explained in page 20. This was intended as an aid to memory; and a new method, adapted to European notions, is given in page 24. Another method, called Katapayadi, is placed in p. 22, with an essay on the Greek names of the signs of the Zodiac, quoted in Sanscrit treatises on astronomy.

The next essay, p. 25, is on the modes of reckoning time, and shews a curious uniformity in the methods used in India and China; also a remarkable discrepancy in initial dates.

Hindus always use the lunar reckoning of days (p. 27), and I have given a page from an Ephemeris, which I printed (p. 28), adding an explanation (p. 29), which shews how differently the months are divided in contiguous nations.

To the Musulman methods (p. 30 and 31) I have added the Julooos, or reckoning of each reign. This enables us to understand a rather irrational method, which has given much trouble to historians. And this is followed by Tippoo's new device (p. 33), which lasted but a few years, and was yet more fanciful.

* The Hijra (thus spelt) is explained in H. H. Wilson's Glossary of Judicial and Revenue Terms. 4to., 1855, page 207.

Having explained the methods of reckoning time, we proceed to various genealogies of ~~rajases~~ (p. 25—49). These are partly fabulous; and when we descend to the historical ages, the information is scanty, seldom giving more than the names of the petty kings, of whom several assumed the empty title "Chacravarti," that is, Emperor.

I have noticed only the families that are of historical importance; the Yadavas (p. 36 and 43), Chalukyas, Koncan, Vijayanagar, Mysore, and Collam; giving some observations on Poetical Genealogies (p. 44), and also on some Fraudulent Documents (p. 48).

In this enquiry it has been clearly ascertained that the Vaishnavite creed (the worship of Vishnu) was introduced into Southern India about the year A.D. 1112,—about the time when the first Crusade took place in Europe. The Jangam religion, which is fiercely antagonistic to the Vaishnavas and Saivites, arose half a century later.

We then proceed to a Chronology of Events for about nine centuries, down to the present day. In the first portion of this I have noticed chiefly the occurrences in the Peninsula; particularly during the Musulman and Portuguese periods. Until A.D. 1500 the information is scanty, drawn chiefly from unpublished Sanscrit inscriptions. The next pages, as far as the year 1750, there are some curious details regarding the rise and fall of the Portuguese dominions, and the prosperity and failure of the French conquerors. After 1750 the English period commences; and, while I have given particular attention to the South, in later periods the history of all India has been described. I endeavoured to collect all the statements made by authors of all nations; and believe that this is a more complete chronology of India than has hitherto appeared. It closes with the end of the great mutiny and the apprehension of Nana Sahib.

To exemplify the use of these tables; an inscription, bearing the name of Sada Siva, is merely dated "in the year Sobhacrit." This is the 37th Title. And in his reign the year bearing this title is SS. 1465, that is, A.D. 1543, as shewn in page 15. Again; a grant made by the Musulman Nawab Halim Khan is merely dated "In the year Swabhanu." Now this title, in his reign, falls on A.D. 1763. A deed bearing the name of Tippu Sultan is dated "Sobhacrit." The table in page 18 shews that this was A.D. 1783, which is within his period.

In some instances the name of the year does not correspond to the numeral quoted. Thus, in one transcript of an inscription the year Pingala, in the reign of Bukka Raya, is quoted as SS. 1273. But the only year Pingala in his reign is SS. 1299, or A.D. 1377. This shews that the transcriber was incorrect.

In a few documents the titles are wrongly written. This is noticed in pages 37 and 90.

While I write this page, I see in the London newspaper a mercantile report from Calcutta, wherein a quotation is dated "Fuali 1270." The table in page 19 shews that this means A.D. 1861.

The dates on coins were also to be considered. Some strange errors in these are noticed in page 32.

In the whole enquiry I have rarely met with a false date; and this will be found only in transcripts, not in the original marbles. For those stones were engraven by persons whose interest it was that the truth should be recorded. But the lapse of time has abrogated all the donations; as Juvenal says, "Quandoquidem data sunt ipsis quoque fata sepulcoria."

I have searched in vain for history in these dark ages; among "nations whose histories are no more." Persian writers carefully record the date when each Musulman reign began; but the Hindus disregard this, and the initial dates of only three or four rajases are known. Mackenzie's brambans, at his desire, framed genealogies, which they dated

according to probability; but such theories are scarcely worth preserving. There are few such records dated earlier than A.D. 1600; and in the more modern we have little interest.

Some of these rajas were petty chieftains, but used grand titles—such as Chacravarti, that is, Emperor; which Vishnu Vardhana alone (see p. 27 and 51) rightfully held. Not to burthen the page with complicate titles, I have used initial letters, which are explained in page 35.

There are in the Mackenzie records many documents written in Tamil, Malayalam, and Cannadi; but they were not available because they use neither the Kali nor Salivahana reckoning.

Regarding Musulman history my chief guide has been Ferishta's History of the Deccan: his account, beginning about A.D. 1100 and ending in 1585, is excellently translated by Colonel Briggs,* who has rendered the dates clear. The Seir-i-Mutakherin is the modern History of Bengal and Haidarabad, from A.D. 1700 to A.H. 1192; that is, A.D. 1782. The substance of this is well given by the learned Horace Hayman Wilson, in his History of India. The Persian "Kárnáma Haidari," or Life of Hyder Ali, is of no great value.

In all these changes the Hindus seem to have been passive. But were these alterations any evil? After knowing the Hindus for more than thirty years, and learning what their own books declare, I see that the primeval state of India was a despotism, the people being ruled by tyrants almost as bad as the barons in ancient Britain, Germany, Persia, or Italy. The priests and the princes were free; all others were slaves. This state of things could scarcely become worse under the Musulman invaders, who trampled on all the Hindu constitutions; had these remained whole they would have much impeded the government under which India now prospers.

Being in London in the year 1837, I found a pile of manuscripts in Sanscrit and other languages, chiefly written on palm leaves, in the East India House Library; where they lay useless. I arranged these, and wrote a catalogue. In consequence of a notice which I printed on the subject the whole hoard was in 1844 transmitted to Madras, where I arranged the volumes in the College Library, and also presented my own library, collected in several years past, of similar manuscripts in Sanscrit, Telugu, Cannadi, Tamil, and other languages: adding all the volumes (formerly placed in the Literary Society's shelves) which had been accumulated by Mackenzie. [See page 88.] I then caused catalogues to be framed by learned natives: each catalogue is written in the language to which it belongs. A Catalogue Raisonné of the entire collection is being prepared; the first volume, in 678 pages, was printed at Madras in 1857.

The historical records collected by Mackenzie are chiefly written on flimsy country paper, which the worms are rapidly destroying; but the country ink, being made with lampblack, never fades. A few volumes are written on English paper, but, unluckily, with English ink; this fades rapidly, and the writing in many places is nearly illegible. I therefore caused copies to be made on English paper with country ink. These copies, including many additional papers which I had myself discovered, now fill forty-eight volumes in small quarto, of "Local Records." In the margins I have generally marked the years in the Salivahana and the Christian reckoning.

The volume concludes with a Memoir of Colonel Mackenzie.

It is due to Mr. Simpson, the printer, to acknowledge the accurate manner in which this volume is put in type. The numerous foreign words introduced called for care and intelligence; and he has executed the work in a style that does him much credit.

ERRATA.

Page.

- 1 line 3 for 1301 read 3101.
 17 A.D. 1724 for A.H. 1187 read 1137.
 18 „ 1750 „ 1174 „ 1164.
 58 „ 1434 “A petty raja” &c. Erase these 6 lines.
 63 „ 1548 read Talaccadu.
 76 „ 1779 „ Mahi, [correctly Maihi].

CYCLIC TABLES OF THE KALI ERA.

THE Kali Era, or Age of the World, commences in the year 1301 Before CHRIST, and the Hindus divide all time into periods of Sixty years, called Cycles. Astronomers state that the Kali Yuga is reckoned from Friday, (Suddha), the first day of the moon, in the month Chaitra, in the year Pramadi, (B.C. 3100), which is the thirteenth year of the preceding cycle. The first cycle is reckoned from Prabhava, the 48th year of the Kali Yug, B.C. 3053.

This series of Titles, or other names substituted, is ancient, and is used throughout India, the neighbouring islands, the Malay Peninsula, and in China.

In the Philosophical Transactions for 1790, is an essay by MR. MARSDEN on this subject. This again appeared in the Encyclopædia Britannica, Third Edition, 1793, article, Hindus, page 521.

In the Asiatic researches, also, there is a statement by MR. REUBEN BURROW on this subject.

Hindu Astronomers base their calculations on the Kali Yug; their whole system hinges upon it; but it is laid aside in common life.

The years Jaya and Vijaya are connected with a bracket, because sometimes one comes first, sometimes the other.

This First Table (extending until A.D. 966) was framed, under my directions, by a Hindu astronomer. It is merely arithmetical, and goes on the theory that all years are of equal length in all eras, and begin on the same day. It is sufficiently precise for dates so distant.

C. P. BROWN.

ON THE SYMBOLS USED FOR NUMERALS.

Some dates in Sanscrit inscriptions of the Salivahana Sacam are recorded in words on the plan of a Memoria Technica. The cypher is expressed by "Sky," "Space," or any synonyme for those words. Any phrase for the moon, or the earth, or the body, stands for *one*. The unit is named first. Thus a date is "Ritu, nāga, vārdhi, himāmsu" signifying 6 seasons, 8 mountains, 4 seas, 1 moon, which (beginning from the unit) is 1, 4, 8, 6. In the same manner 'Sāra, bāhu, Rama vasudha,' denote 5, 2, 3, 1, that is, 1325. In a recent edition of the Rāmāyan, the date is thus given, "Nayana, dharādha' rshi nalina-vairi sankhya, Sādhāranā-nama Samvatsara," that is, "in the year Sādhāranā, for which the number is, eyes, hills, sages, moon." This denotes S.S. 1772, answering to A.D. 1850. Each sign of the Zodiac being fancied to have a separate sun, any name of the sun denotes twelve. In one inscription the phrase "a pair of suns" denotes two twelves, that is 1212. Likewise, "Netra, Surya, Chandra" (eyes, suns, and moon) represents 2, 12, 1, that is, 1122—eleven hundred and twenty two.

Occasionally numerals are mingled with Symbols.

Mr. Prinsep's Essay on this subject is printed in the Journal (Jan. 1834) of the Asiatic Society of Bengal. This ingenious method is very ancient. I shall here give Mr. Prinsep's list of names with some additions: particularly (Jyautisha) astrological phrases, which, in this list, are marked Jy.

These Jyautish phrases are stated in a book called Daivajna Bhūshanam.

Every phrase used admits of synonymes; thus for Sea, we may use Ocean, &c.

0. The cypher is expressed by kha, ananta, ācasam, ambara, vyōma: meaning *space, sky, heaven*.

1. Prithvi, bhū, ku, &c. (the *earth*.) Chandra, Indu, &c., &c., (the *moon*.) Tanu, &c., (body Jy.) Also 'Vanā,' alone, solitary. Also *Rupa*, that is, Form, Face.
2. Paxa, &c., a *wing*; Netra, &c., *eye*; Bahu, &c., *arm*; Karna, &c., *ears*. (Kutumbam a *family*, Jy.) Also Champa, or Champaca (the gold-flower), because of it there are two species. See Prinsep's Journal, t. 3, p. 210.
3. Fire: (vanhi, agni, Vais'va'nara, &c.,) this phrase is used because in the *yajna* sacrifice there are three fires. Netra, the three eyes of Siva. Synonymes, Trilochana, Trinetra. Also Rama. There are three heroes of this name, (Synonymes, Dasarathi, &c.) Guna, (qualities, good, middling, and bad: called *Satwa*, *rajas*, *tamoguna*.) Loca, or Jagat, worlds: heaven, earth, and hell. (Sahodara, a brother, Jy.)
4. Veda. (There are four.) Jala-nithi, Ocean. Ambu (waters,) the four seas. Yuga: the four ages: or else *Krita*, the golden age, being first of the four. Koshtu: the corners of a square.—Bandhu (Jy.) a kinsman.
5. Arrows (the five senses, Indriya, as being Cupid's darts.) Gems. (Ratna, &c.) Breaths (prāna,) Sons (Jy.) Suta, putra, &c. Bhūta, the five elements.
6. Limbs: (anga.) Tastes (rasa) Tunes (raga,) Seasons, (Ritu,) The Sciences (Tarca, &c.) Foes (Ari *i. e.* the senses or passions: temptations.)
7. Sages: (Muni, Rishi, &c., or Atri who is the first of them.) Musical notes, ut, re, mi, &c. (Swara.) Chhandas (a Veda phrase,) Mountains, (adri, nāga, &c.) Horses (because the Sun drives seven.) Seas (Samudra,) Principles, (dhatu, &c.) Wives (Jy.) as Kalatram, &c.

8. Vasu : (a certain class of demigods.) Danti, Gaja, &c., i. e., Elephants (the eight that sustain the skies.) Fortune (Jy. man-gala, bhuti, &c.)
9. Orifices, or Ways (randhra, as nostrils, ears, eyes, &c.) Planets (graha; including the sun and moon.) Numerals (anca : as 1, &c.)
10. Sides (Dik, Disha, &c. Eight points of the compass with the zenith and nadir.) Avata'ra (the ten descents.) In Jy. the phrase Karma is also used.
11. Siva, or Rudra. Eleven powers called Rudras are mentioned in mythology. (In Jyo. La'bha.)
12. Surya : (the sun : one is reckoned to each month.) The Jyo. phrase is Vyaya.

—

The rest are seldom used.

13. Worlds (Viswa.) Cupid : this god being ruler of the 13th day of the fortnight.
 14. Worlds (seven above and seven below :) being regions of heaven and hell. Indras, Manus, (the seven sages twice reckoned.)
 15. Tithi, Paxa (Lunations in a fortnight.) Aha (a day, from the same idea.)
 16. Kala, a digit. Ashti (a certain measure of verse containing 16 syllables.) A king, (16 being named.)
- Mr. Prinsep's list subjoins the following : but they do not appear to be in use : except "Manu" 14, and "Danta" 32.
17. Aty ashti, a certain measure of verse.
 18. Dhriti, a certain measure.
 19. Atidhriti ; (a certain measure.)
 20. Nakha, the nails.
 21. Swarga, the heavens.
 22. Ja'ti, the tribes.
 24. Jina : the Jaina deities.
 25. Tatwa : certain beings.
 26. Utkriti : (a certain metre.)
 27. Naxatra ; the constellations.
 32. Danta, &c. the human teeth (there being 32.
 33. Deva : the gods.
 49. Tāna : the tunes.

That the first twelve of these are perpetually used is proved by the following

instances. The numerals express dates according to the Salivahana æra.

S.S.

235. Pancha, Tricam, lochana : that is, Five, three, and eyes.
- 598, Vasu, graha, ba'n'a.
980. Vyôm'ebha, randhra : i. e. Sky, elephants, and ways.
1012. Ravi, vyoma, indu. Twelve suns, a cypher, and the moon.
1029. Nithi, netra, kh'endu.
1037. Giri, Ra'ma, vyôma, visva.
1040. Vyôma, Ve'da, ambara, sasi.
1043. Jagad, udadhi, viyat, chandra.
1050. S'u'nya, s'ar', ambara, avani.
1056. Rasa, ba'na, kh'endu.—Likewise thus, Rutu, Ba'na, vyoma, sasi.
1057. Muri, sara, viyat, indu.
1061. Sasi, rasa, viyat, sôma.
1064. Va'rdhi, tarca, ambara, sasi.
1087. Rishi, na'ga, kh'endu.
1119. Randhra, subhra'msu, ru'pa, naxatra-nūyacah.
1120. Ambara, ravi, sasi.
1181. Chandra, kari, Sasa'ncau (the dual form.)
1209. Nav'ambara, dwi, hima'msu, that is, Nine, sky, two, moon. Herein numerals are mingled with phrases.
1212. Ravi, cara, Sasi. That is, (twelve) suns, (two) hands, (one) moon.
1225. Ba'n' a'xi-yugmam, sasi : that is, five arrows, two pair (eyes,) moon. In the Asiatic Society's Journal IV. 124 this is erroneously rendered 1245.
1243. Gun'a, ve'da, Surya : that is, three, four, and twelve.
1266. Suta, tarca, bhānu.
1283. Guna, hasti, netra, vasudha.
1284. Sindhu, na'ga, ambaca, (the two eyes) sasi.
1301. Sasi, kha, sikhi, chandra.
1317. Saila, chandra, jwalana, Sasi.
1325. Sara, ba'hu, ra'ma, vasudha. Or thus : Sara, bhuja, ra'ma, chandra.
1326. Ritu, netra, lôca, sasi.
1330. Gagan, a'gni, pura, hima'msu.

- | | |
|---|---|
| <p>1373. Indu; gun'a, dhatu, vanhi. In this instance the unit figure is last named : contrary to the general method.</p> <p>1387. Adri, vasu, agni, sasi.</p> <p>1449. Nava, va'rdhi, veda, sasa'nca. Here the numeral <i>nine</i> is named.</p> <p>1486. Ritu, na'ga, va'rdhi, himagu.</p> <p>1493. Ra'ma, graha, payônidhi, indu.</p> <p>1518. Vasu, xma', ba'n'a, sita'ms'u.</p> | <p>1523. Vaisva'nara, lôchana, sara, sudha'cara.</p> <p>1536. Rasa, ra'ma, ba'n'a, sasi.</p> <p>1540. Vyôm' a'bdhi, ba'n'a, chandra.</p> <p>1544. Vêla, samudra, bân'a, chandra.</p> <p>1595. |---|---|

THE KATAPAYA'DI SYSTEM.

There is an ancient Sanscrit Memoria Technica, using the letters of the alphabet as numerals. The letters are thus arranged :

1. Ka	Ta	Pa	Ya	6. Ch	T	Sh
2. Kha	Tha	Pha	Ra	7. Chh	Th	S
3. G	D'	B	L	8. J	D	H
4. Gh	D'h	Bh	V	9. Jh	Dh	L'
5. Gn	N'	M	S'	0. Jn	N	

The first syllable written is the unit, then the ten, &c. The number 1798 would be written 8971, represented by the syllables

Jadha sat'a.

The vowels are not reckoned, being used merely to form syllables.

The expression Vê da dha, jna na ta. st' yah denotes 1,600,984.

This method is slightly explained in Warren's *Kâla Sankalita*, page 335.

The system is named, after the Hindu fashion, by the first syllables, Ka, ta, pa, ya, with "âdi" (etcetera.)

ON THE ZODIAC.

An Essay by Mr. C. M. Whish, "on the origin and antiquity of the Hindu Zodiac," was printed in the year 1827; and has been noticed on a recent occasion in the Royal Asiatic Society. In the Journal of the Asiatic Society of Bengal a paper has now appeared (in No. 167, p. 109) by Mr. J. Muir, of the Civil Service, verifying Mr. Whish's assertions. I was already aware of the existence of the Greek words in Sanscrit treatises, having met with them in a manuscript key to astrology. The stanza preserving the twelve names is well known among those Brâmins who are skilled in *jotish* (correctly, Jyautis-ham) which, as Professor Wilson observes, includes "Mathematical, Astronomical, and

Astrological Science." Manuscript books on this art are common: there are many in the Madras Library—which now contains the volumes lately transmitted from the India House, as well as my own collection.

The treatises on (*jotish*) astrology are all in Sanscrit; and usually open with an explanation of technical words. I shall first notice a large volume called the *Jâtaca Pârijâtam*, or *Rose of Astrology* (Vol. No. 2330 in the Catalogue). It is written in the Malayalam character.

It begins with a short hymn addressed to the *Trimurti*; then to the sun, the moon, the planets, and genii. Then follow the twelve signs of the Zodiac, by the well-known Sanscrit names.

Mesham—i. e., Ram.	Tula, the Scales.
Vrishabham—i. e., Bull.	Vrischicam, Scorpion.
Mithunam—i. e., Twins.	Dhanas, the Bow.
Karcatacam, Crab.	Macuram, a Sea Goat.
Simham, Lion.	Cumbhah, Vessel.
Kanya, Virgin.	Minah, Fishes.

“But”, says the author, “the following names are also given to these signs.”

Here follows the stanza quoted by Mr. Whish; it is in the Arya Metre, resembling that used by Horace:—

Miserarum est neque amori, &c.

The words are thus spelt—according to Wilkin’s system.

Kriya tauru jutuma kulira.
Lēya Parthōna Jūka kōrp ākhyah.
Tauxica Akōkērō.
Hridrōg Aschsthāsīh cramas’ah.

The same stanza appears in the Vrihajja’tacam (written in the Grandham character, MSS. No. 2026) page 6. It runs thus:

Kriya tāvuru jituma kulira.
Lēya Pa’rthōna jna’ka kōrpy a’khyah.
Tauxica, Akōkērō.
Hridrōg asch’a’tyabham chētham.

A third manuscript, in the Telugu character, vol. 558, of the Vrihat jātacam, by Bhattotpālā, in page 6 exhibits the stanza thus:

Kriya tāvuru jitumō kulira
Lēya, Pa’rdhōna, jūka kaurp’a’khyah
Tauxica a’kōkērō
Hridrōgasch’a’ntyabham chēd dham.

Dr. Mill (in the Asiatic Society’s Journal, July, 1835) prints the first words thus: Kriya, tāburi, jituma, Kulī’ra Le’ya, Pa’r-the’ya, Yūka.

On comparing the various readings of these four manuscripts, with those printed by Mr. Whish and Mr. Muir, and with the Greek names, the following is the result.

Krios, (the Ram) is written in all Kriya.
Taurus, the Bull: Ta’vuru, Ta’buri, Tauru
Didymus, the Twins; Juthuma, Jituma,
Jutuma, jittuma.

Karkinos the crab; is in all kulira: the plain Sanscrit word for the crab.

This word *kulira*, though uniformly written in all the manuscripts, seems an error for

karkina: it is the only Sanscrit name used in this verse instead of a Greek name: the metre (Arya vrittam) can use *karkina* (a dactyl) in the third seat; and cannot use the (amphibrach) *kulī’ra* in irregular seats: viz, 1st, 3rd, 5th, 7th. See Colebrooke’s Essay on Sanscrit Poetry, Vol 2, page 76 note. Captain Jervis, in his Volume on Weights and Measures, Bombay, 1836, p. 132, has pointed out these Greek words in the Sanscrit canons. He seems to have read *kurku*, which is more like the Greek word. I believe *karkina* to be the proper word.

Leon, the lion, is uniform in all, Lēya.

Parthenos, the virgin; parthōna, Pārthēya, and Parldhōna.

Zygos, the scales; jūka in four MSS., and jnāka in a fifth.

Scorpios, kōrpya, korp, koppyār.

Toxios, the archer, is uniformly Taux-shica—which may also be written Tauxicah.

Aigokeros, the sea-goat, is uniformly written ākōkērō.

Hydrochoos, Aquarius, is written Hridrōga in all but Mr. Whish’s copy.

Ichthyes, the fishes. Iathusi, Aschsthāsīh. These words resemble the dative, ichthusi. In three manuscripts this word is abandoned, being hard to express in Sanscrit characters.

The Sanscrit manuscripts I have consulted are ancient: the first quoted is perhaps two hundred years old: it is one of those received in Madras from the Honourable Company’s Library in London. The other two are perhaps half as old: they belonged to my own collection. All these are written on palm leaves. The verses are familiarly known to most of the Bramins who have had occasion to study astrology.

Mr. Whish also cites a Sanscrit verse which mentions the Sun, Mercury, Mars, Jupiter, Saturn, and Venus—called in Greek Helios, Hermes, Ares, Zeus, Kronos and Aphrodite—by the names Heli, Hema, Aruh, Jyók, Kónah, and Asphujit. In the Brihaj-jatacam I have read this verse, which deviates only in one name, reading (in 558) Jyos for Zeus. This is a yet more apt coincidence.

A TITULAR MEMORY.

In the Asiatic Researches Sir William Jones has described an ancient Memoria Technica used by Sanscrit Authors: praising it as wonderfully ingenious. In specifying dates, they use names for numbers. A Cipher is "The Sky"; One is "The Moon"; Six is "The Sciences"; Eight is "Demigods." Accordingly, beginning from the unit, 1860 would be expressed "Cipher, six, eight, one," which is, "Sky, sciences, demigods, and moon." Prinsep's treatise on the Hindu System is printed in the Journal of the Asiatic Society of Bengal for January, 1834. Further details of the Hindu system would be needless here; but on this method is formed the following Titular Memory.

Beginning with Aries and Taurus, the first pair of signs, to represent One and Two, we proceed thus: furnishing many equivalents.

The Cipher, Zero, is Sky, Space, Air, Nil, Nought, Round, Oval, Egg, Ball, Globe, Orb, Ring, or Circle.

One is Aries, Ram, Alpha, Moon, Luna, Diana, Crescent, Head.

Two is Taurus, Bull, Ox, Beta.

The other numerals are represented by words which contain so many letters: Oak, Cat, or Dog, is Three. Four is Tree, Ship, Boat. Five is Night, Right, North, South. Six is Season, Spring, Summer, Autumn, or Winter. Seven is Thought, the Bow or Rainbow, as containing seven colours. Eight is Strength, Elephant, Socrates or Hercules; and these may be shortened into EL. or Soc. Nine is Crocodile, Alligator, Alexander; and these may be expressed by the first syllables, Croc. or Al. Three may also be The Graces, or A Grace. And A Muse, Clio, Thalia, or The Muses, may represent Nine.

Eighteen hundred is represented by the first Syllable, "Ei." Seventeen hundred by

any word connected with (seven) a week; as Day, Sunday. Sixteen hundred by any word belonging to a Bee, which has six feet, and whose cell is six-sided. Thus, Bee, Cell, Honey, or Hive. Fifteen hundred, by Finger, Thumb, Toe, or any word connected with the hand or foot. Or Centuries may bear French numerals, as 1500 Quinze, 1400 Quatorze, 1300 Treize, 1200 Douze, 1100 Onze.

A figure that is repeated is expressed by Two, or Pair; thus, 1855 is Two Lights and Ei. A figure thrice used is expressed Thrice or Trio. 1777 is Two Bows and a Week. 'Sky, Spring, Ei' is 1860.

Many ciphers together, as 000, 0000, are represented by letters of the alphabet. Thus C, or Co is three ciphers; E, or Eo is five ciphers. 40,000,000 is written Go West. Here G, being the seventh letter, stands for seven ciphers. Fo Spring=6,000,000.

Greek or Hebrew letters may be used. Thus (Zeta being the sixth letter) Zeta-Spring=6,000,000. Or, if we use Hebrew letters, Vau-winter.

Or, a Greek word beginning with the requisite letter. Thus Thetis Socrates will represent 800,000,000. Thus for Δ we may use Delphin.

Any words may be combined in a sentence. Thus 2453 may be represented (3542) by 'so many years ago.'

Verses framed on these methods will be more easy to recollect than those given in Grey's Memoria Technica, in Dr. Valpy's, or in Howlett's Metrical Chronology.

The same method may be pursued in other languages, the Cipher, One, and Two, being disposed of as already stated.

In French, 3, Rat, Ane. 4, Lion, Chat, Mars, Ours. 5, Loire, Aigle, Vache, Chien, Seine, Marot. 6, Cheval, Enfant, Pascal,

on, Racine. 7, Ecureil, Cupidon, Boileau, élon. 8, Elephant, Rousseau. 9, Cor-e, Crebillon, Massillon.

Greek. 3, φως, θηρ, εαρ. (or, αἱ χαριτες).
ως, λεων, κυων. 5, Αθηνη, Εκτωρ. 6,
ρος, αρκτος. 7, Απολλων, Αισωπος, χελιδων.
ωκρατης, Ανακρεων. 9, Θεοκριτος: or αἱ
αι.

Latin, 3, Sus, fur, Pan (or Gratiae). 4,
, Juno. 5, India, Syria, Nepos. 6,
ro, Livius. 7, Ovidius, Plautus. 8,
atius, Vulcanus. 9, Virgilius, Terentius:
else) Musæ.

In Sir S. Raffles's account of Java, he shews that the same system prevails there. "They record dates by adopting a hieroglyphical invention, called Chondro Sancolo" [in Sanscrit, Chandra-Sancalita, or Lunar Tables], "in which the numerals are represented by particular objects." In sculpture this is done by actual representation; or, in writing, by the names. Thus, the [Salivahana] year 1400 is recorded thus—the order of numerals being reversed—

Sirna	ilang	Kertaning	Burni
Ruined	gone (is the)	work	(of the) land
0	0	4	1

ondon, March, 1862.

AN ESSAY ON THE MODES OF RECKONING TIME: IN USE AMONG THE PEOPLE OF INDIA.

The Kali Era is the foundation of all calculations by Hindu astronomers and chronologers. "The unremitting labour of it has been devoted by the Hindus to effecting the calculation of the Lunar motions,—in which their correctness is sur-
passed only by the European improvements of very modern times." See Marsden's notice on the Chronology of the Hindus: in the Philosophical Transactions for 1790, p. 624. Also see Sir William Jones's Essay on the Lunar Year of the Hindus: in Asiatic Researches, Vol. 2, 1792.

The origin of the Kali Yugam—sometimes spelled "Collee Joog," or "Kulëc Jöög"—is nowhere stated. It is an astronomical epoch, equivalent to the A.M. year of the old. The Hindu sages reckon the Kali æra from Friday, the (suddha) first day of the moon, in the month Chaitra, in the year madi: which is the thirteenth year of the preceding Cycle. The first Cycle is dated from Prabhava—the 48th year of the Kali Æra. This date is stated in several places: in Davis's Essay in the Asiatic

Researches; and in Francis Buchanan's (Hamilton's) Journey through the Mysore, &c. (3 vols., 4to, 1807), vol. 3, page 110—a work which I shall often cite in these pages.

Southern India was visited about the same time by another historian—the Rev. Claudius Buchanan, whose "Christian Researches" are well known.

The Vikramāditya Æra commences fifty-seven years Before Christ: its years are lunar-solar. It begins in Kali 3044, one hundred and thirty years before the Salivahana reckoning. It is commonly called Shacam, or Sakam.

The Kollam year is named from the town Kollam, on the west coast of India, which in the maps is called Quilon. Sanscrit astronomers call it the Parasu-Rama-Sacam, or era of Parasurama. It is reckoned from the eight hundred and twenty-fourth or fifth year of the Kali Yugam: named Dundubhi. This reckoning is chiefly used in Western India, south of Bombay.

In the proceedings of the Chronological

Institute of London. 1852 (Part I., page 49), is an essay by Dr. James Tod. He quotes a Hebrew volume written at Quilon, dated "In the year of the Nazarenes, 1781, which is the year of כלינגם Kaliyugam 4881, which is the year of 956 of כולס." (Kūlam, or Kōllam.) The writer of the essay could not understand this, but I perceive it is Collam: for 956 Collam=Kali 4881=A.D. 1781. In that Hebrew record it is stated that the King of Collam was called (Saganath Sri) שגנת שרי. Warren is silent regarding Kollam; but it is the same as the Parusurama date—which he has given.

The Sen, used in Bengal, appears to be the Persian word "san," meaning a year. It is apparently founded on the Fasli, from which it varies only three years. Thus A.D. 1860 is Fasli 1269, which is Sen 1266.

The Cycle of sixty years is used in China, and is described in Du Halde, in Sir George Staunton, in Davis, and other authors; in the Philosophical Transactions; in Rees's Cyclopædia, under "Cycle;" also in the Travels of Huc and Gabet. Like the Hindus, from whom they took the system, they used intercalation, adjusting the lunar to solar time. The years are known by names, not numerals. Their reckoning has in course of ages deviated from the braminical. Thus A.D. 1723 is, in China, the 40th year of Cycle 74; while in India it is the 37th year of Cycle 80. The Chinese Almanac for A.D. 1851 makes that the 48th year of the 75th Cycle (of 60 years), or "year 4488." But 1851 is, in Southern India, year 45 of Cycle 82; while in Northern India it is year 56 of Cycle 84; and it is Kali 4952.

The Mexican Cycle was of 52 years; each having a significant title. See Gentleman's Magazine, August, 1831, p. 101.

In his work on the Chinese, Davis describes the cycle of 60 years, and another cycle of 12 years. The Hindus also use a religious cycle of 12 years, called Pushcaran; but it is not of any chronological use.

The SALIVAHANA SACAM, or Era of Salivahana (often cited simply as "Sacan"), is

daily cited by Title, without numeral, regarding the year 1860, instead of mentioning S.S. 1782, a Hindu merely says Raudri." This is the 54th year of Cycle; but this numeral is used of Englishmen.

The Salivahana reckoning is different in different countries. In Southern India, as Warren expresses it, south of the Narmada (vulgarly Nerbudda)—A.D. 1782 is the first year (named Prabhavati) of the 79th Cycle. But north of that river, the 10th year (named Dhātū) of the 81st Cycle. From this date I have therefore arranged the double columns, shewing the reckonings.

But in examining ancient documents, particularly inscriptions, there are peculiar variations. The A.D. 1802 is named Dundubhi, numbered 1724; yet in various documents this very year Dundubhi is 22 or 25. These discrepancies never trouble the Hindus, who care little for the exactness of their date, so long as the title is known. They have a vulgar prejudice against stating their exact age, the number of their children, the sum of their cattle, or how many mangoes there are in an orchard. And the same feeling seems to rule in chronology. They punctiliously state the month, day, and hour of the deed recorded; and the day of the year; but its numeral is often omitted, and more often wrongly stated. It is, however, observable that the variations are more than *three*, plus or minus. If the variations are larger, we may suspect forgery—the instances rarely occur.

This anomaly has embarrassed many English essayists, who have thrown doubt on documents as either false or wrongly described.

The native astronomer who we met at Colonel Warren took refuge in an old theory; that the variation was within certain limits: thus, he mentions S.S. years with double titles—or one minus—as the 10th and 11th, or 11th and 12th. These he gives on

he northern reckoning; whereas it per-
all. It is not uniform; some years
seven or eight variations; others near
have none. Warren is silent on the
ct.

e Kāla Sankalita (a quarto volume of
pages, printed at Madras, in 1825), by
tenant-Colonel John Warren. This is en-
l "A Collection of Memoirs on the vari-
nodes according to which the Nations of
Southern Parts of India divide time."
is not a historical work, but purely scien-
; it explains the various systems used in
dating time by Hindus and Musulmans.

statements are too abstruse to be
rally useful; nearly all the different ques-

tions discussed in the present small volume
are omitted—particularly the curious and
mysterious variations in the (SS) Sacam era.

The learned Prinsep reprinted Warren's
Tables, which begin no earlier than A.D.
1600, and omits the titles. But without the
Titles it is impossible to ascertain any chrono-
logical occurrence.

The Salivahana years are divided into
portions, having sixty years in each, known
by the names Prabhava, &c., not numbers.
This is called the Vārhaspatya Manam, or
Cycle of (Vr̥haspati) Jupiter. Some Eng-
lish astronomers have objected to this name;
but in the Kala Sankalita it is shewn that
this is a mere phrase used for convenience.

ON THE METHOD OF LUNATIONS.

he Hindus date their letters and ordinary
sactions thus—"In the year Vicari,
lay, the second of the dark fortnight in
tica;" this answers to the 22nd Novem-

1839. But the lunar day commences
any moment of the day or night; and
efore part may fall in one day and part
he next. To shew which is meant, the
of the week is specified. By this system
r religious observances are ruled, and
astrologer settles the lucky or unlucky
nents for every rite. When my
nhans examined "De Morgan's Book of
anacs—by which the time in any year,
t or future, may be known"—they ad-
ed it, but objected that the daily luna-

tions were omitted. In their opinion this
is a point of the utmost importance.

I caused an Ephemeris to be calculated
for the century A.D. 1751 until 1850, speci-
fying the Christian, Telugu, Tamil, Collam,
and Hejri notations for each day. I subjoin
a page as a specimen. The volume contains
600 pages. It was compiled at the desire of
the Madras Government, who paid the
printer's bill, and placed copies in every
public office. I gave one to the British
Museum Library.

In this table, for two months in one page,
it will be observed that occasionally one
English day answers to parts of two Telugu
days; and the reverse also happens.

EXPLANATION OF THE EPHEMERIS.

st column states the English date of the week; the second gives the year, with its name. According to that of Vicramaditya it has a different used in Bombay; and the titles used precede those used in the south by years. Thus, A.D. 1850 is in Madras 1811, the 44th title; but in Bengal it is 1850, the 55th.

Days of the week agree in their order. Sunday is the Hindu day of the week, the day of the Moon.

The month is divided into the "Bahula," and the "Suddha," or Bright Fortnight. The Lunar deviates from the Solar day; thus the same solar day sometimes includes the first hour of two lunar days; hence some days are marked 12-13; and some numeral is repeated; or one is omitted.

The last day of each lunar month is 30, which sometimes follows the 29th, or close of the fortnight.

At times a month is intercalated, added twice; it is called "Adhica," or Extra. This adjusts the lunar to the solar year at every nineteen years.

The "tithi," or lunar day, is that period during which the moon travels through twelve degrees of her path. It may commence at any time of the day or night. It is divided into a number of "gadiyas," vulgarly called "hours," or Hindu hours, of about 60 minutes each. And there are 60 such hours in a day, according to the length of the tithi. In Warren's Kalāṅkī, page 387, the subject is explained.

The lunar month has the Suddha Paxama (Bright), which is the bright half, beginning with the new moon. The dark fort-

night, or Wane (called Krishn'a Paxam, or Bahula), commences with full moon. Each half contains fourteen days and the day of change. The days are named thus:—

<i>Increase.</i>		<i>Decrease.</i>
Pa'd'yami, or new moon.		Pa'd'yami, 1st.
Vidiya,	2nd lunar day.	Vidiya.
Tadiya,	3rd "	Tadiya.
Chauthi,	4th "	Chauthi.
Panchami,	5th "	Panchami.
Shasht'hi,	6th "	Shasht'hi.
Saptami,	7th "	Saptami.
Ashta'mi,	8th "	Ashta'mi.
Navami,	9th "	Navami.
Das'ami,	10th "	Das'ami.
E'ca'das'i,	11th "	E'ca'das'i.
Dwa'das'i,	12th "	Dwa'das'i.
Trayo'das'i,	13th "	Trayo'das'i.
Chaturdas'i,	14th "	Chaturdas'i.
Punnami, or Purnami,—		Amavasya, or
that is, full moon.		day of change.

In the next column of the Ephemeris the Tamil date is given—deviating both in names and initial dates from the Telugu method. The days are reckoned not in lunations, but regularly from 1 to 29 or 30.

The Fasli year commences from the first day of Adi, the Tamil month, which begins on the 14th of July.

In this column the years of the Kali Yuga are also marked.

The fourth column gives the dates according to the style named from Kollam (which the English call Quilon), near Cananore, on the south-west coast of the Peninsula.

The fifth column gives the date of the Hejri, used by Musulmans. Herein every (F) Friday is marked.

ON THE MUSULMANI DATES: HEJRI, FASLI, AND JULOOSE.

The Musulman era, named Hejri, was introduced into Southern India about A.D. 1600. The Fasli reckoning seems to have begun about 1650, and is a mere adaptation to suit the harvest time. As reckoned by the Hindus, A.D. 1800 was A.H. 1215, but the Fasli year was 1209, being six less. In 1850 it was seven years less.

In the Hejri and Fasli columns I have marked some variations. The documents examined were written by Hindu clerks, who have quoted the title "Prabhava Fasli 56," or elsewhere 55. Or, "Manmatha 83," or "85," whereas it precisely is 84. And the same happens in Hejri dates stated along with titles.

In business the Fasli alone is used in India; in correspondence Musulmans use the Hejri alone. The year A.D. 1839 was alike A.H. 1255 in India, Turkey, and Persia; but in A.D. 1855 it was one year less in Turkey—1267 instead of 1268.

The Hejri year is purely lunar, and thus falls short yearly of the solar reckoning. The first month, Mohurram, thus gradually travels back through all the English months. In A.D. 1790 it began on 11 Sep. for A.H. 1205

„ 1800	„ 26 May	„ 1215
„ 1850	„ 5 Nov.	„ 1257

The Hindus, also using a lunar year, have intercalations of months, which, in nineteen years, make the lunar reckoning agree with the solar. This the Musulmans never do.

"Practical Tables (in 23 pages) for reducing Mahometan Dates to the Christian Kalendar," were framed by Johannes Von Gumpach, and published (by Mr. Madden) in London, in 1856. These, like Warren's Tables, give the initial day. Thus, in A.D.

1863 the A.H. 1280 begins on the 17th of June. These tables differ one day from Prideaux and Warren's reckoning.

The Hejri year seems to vary a little in distant countries. Thus in India, A.D. 1620 is A.H. 1030; but in the Banda Islands it was 1028.

In the Travels of Thomas Herbert (folio 1638) there are many A.H. dates, with the A.D. specified. But most of these are wrong. The error is pretty regular, and amounts to thirty years. Thus, he states that A.D. 1620 is A.H. 1000, whereas it correctly is A.H. 1030.

Some Hejri dates are recorded in numeral letters, on the *abjad* reckoning. A Marata bramhan was talking with me at Madras, in 1851, regarding the downfall of Bajee Rao, whom Nana Sahib (the infamous) called his father by adoption. He replied to my enquiry regarding the date, "Sir, it was in the year Thú Thú Thú." These words signify Fie Fie Fie! Herein T=400 added to H=5 added to U=6 makes a total of 411 multiplied by 3=A.H. 1233, which answers to A.D. 1817.

In Colonel Briggs's *Mahomedan Power in India*, 4 vols. 8vo., 1829, several dates are given in this method, which is explained in every statement regarding the Arab, Hebrew, Persian, or Hindustani Alphabet.

Some Hejri dates are recorded in Arab words, though written in Telugu or (Kan nadi) Canarese characters. Thus, "sittu sabaa'in alaf"—6 added to 70 added to 1000=A.H. 1076.

The Hejri dates, though carefully recorded are not always free from doubt. Thus Hickey, in his *East Indian Chronologist*

(1801), quotes Fraser's statement that the Emperor Aurungzeb seized the throne on the 20th of July, 1658, and was proclaimed Emperor ten months after; directing his reign to be dated from the first day of **Ramzan** (New Year's Day), A.H. 1069—which is the 13th of May, A.D. 1659. But Warren (*Kala Sankalita*, Appendix, page xlv.) states that A.H. 1069 began on the 19th of September, 1658; and Von Gumpach's *Hejri Tables* (1856) makes it nine days later—28th of September, 1658.

The Musulmans commence the **Hejri year** with the month **Mohurrum**. But they unskilfully depend upon the appearance of the moon in the first quarter, and they are much bewildered if this is not visible.

The **Hejri** reckoning in Turkey differs from that used in India. The celebrated *Treaty of Unkiar Skelessi* is dated "At Constantinople, 20th **Safr**, A.H. 1249, answering

to 26th of June, 1833."* But this varies some days from the Indian method; that day of **Safr** answers to the 9th of July, 1833.

In some old writers the A.H. is wrongly calculated. Thus in the *Travels* of Thomas Herbert in Asia (printed 1638), a number of **Hejri** dates are quoted, with the corresponding A.D. The A.H. numerals probably are quoted from native authority, and may be true; but the rendering is wrong. There is in most pages a constant error of thirty years. Thus, in book 2, p. 205, he states that A.H. 1008 is A.D. 1628; but it truly is 1599; as *Prideaux* has shewn in his tables. Elsewhere the error seems to be twelve years; for in page 283 he says A.H. 410 is A.D. 1030. He should have said A.D. 1018. See *Rosse's and Blair's Chronology*; published by Bohn, 1856.

Like the **Hindus**, Herbert sometimes writes A.H. for A.F., and **Fasli** for **Hejri**.

* See Louis Blanc, *Hist. des Dix Ans*, t. 4, p. 334—6

ON THE FASLI RECKONING.

The **Fasli** reckoning is, as the name implies, the harvest. The name is sometimes spelt **Fussly**, **Fazli**, **Fuzely**, **Phussly**. This is a mere revenue year, and is counted from the first day of the **Tamil** month **A'di**; which is the fourteenth of July. It is not divided into months or quarters. Sometimes the **Bengali**, or **Tamil**, or **Telugu**, or **English** month is quoted.

The Musulman years are usually cited by **Hindustani** numerals. **Fasly** 1240 is called "**Chalis Fasly**," that is, year forty. And **F.** 1239 (A.D. 1830) is styled "**Untális Fasli**," or year thirty-nine." In Sir Thomas Munro's Report (26th July, 1807, printed in the Fifth Report, page 785), he speaks of the "**Survey Rent in 1215**"—meaning the **Fasli** date, which answers to A.D. 1806. Again, he mentions "**1217—1218**;" meaning A.D. 1808—9.

The **Fasli** dates are carelessly stated, even in some modern documents. So in the printed (4to) volume of *Treaties* executed with the Indian Government, A.D. 1807 is stated to answer to **F.** 1214; it would correctly be **F.** 1216. **Hindu** clerks often ignorantly mark a date as **Hejri** when it should be **Fasli**; and vice versa.

The Arabic numerals engraven on seals are always **Hejri**, never **Fasli**.

The initial date of the **Fasli** is not always certain. In the *Asiatic Annual Register* of 1806 (*State Papers*, page 101), it is stated that **F.** 1209 began on the 22nd of September. And in the *Life of Warren Hastings*, vol. 2, p. 290, *Hastings* says, "the **Fusly** ends on the 10th September." Yet in vol. 5, p. 227, the first of September seems to be the initial.

The Regulations of Government bear Eng-

lish, Hindu, and Musulman dates, which do not in every case agree with the present reckoning.

The "Bengal" year, or Sen (the Persian word San) is also called the "Vilāyati year." These seem to be merely other names for Fasli. In the Bengal Regulation ix. of 1800, the date is 10th July; and it is stated that this "corresponds with the 17th of Safr, A.H. 1215, and with the Twenty-

eighth of Ashadh 1207, or fourth of Sravana 1207 Fasli, which is also 1851 vat (or year of Vikramāditya).

In the Appendix to the Kala-San page xiii., is a treatise on the Fasli, does not cast much light on the matter; observes that the Tamil month Adippu corresponds to the Bengal month Sravana, which begins the Fasli year.

ON JULOO'S DATES.

The word Julús, or Jooloos, denotes taking his "seat" (on the throne); the commencement of a reign; the year of the coronation of the Emperor of Delhi. Some Persian documents executed between A.D. 1550 and 1800 bear this date. Several of these even omit the Hejri date; thus, "In the fourth year of Alamgir; or, in the tenth year of Jehangir." To understand this we must ascertain when the reign began.

The reigns of the Mogul emperors of Delhi are stated to begin in these years; but regarding the earlier dates the books do not always agree.

A.D.	A.H.	EMPEROR OF DELHI.
1529	938 or 939	Huma'yu'n.
1556	965 or 963	Akbar.
1605	1014	Jahangir.
1628	1038 or 37	Shah Jehán.
1658	1069 or 68	Aurungzebe.
1707	1120	Bahádar Sháh; then Jehándár Sháh; then Ferokhsér; then Rafi-ul Darjat; then Rafi-ud Daw- la; then Moham- mad Shah.
1739	1152	Nadir Shah plun- dered Delhi.
1748	1161	Ahmad Shah.
1753	1167	A'lamgi'r Sáni (i.e., The Second).
1760	1174	Sháh A'lam.

But these dates of reigns are often doubtful. The same Juloo numeral is attached

to three or four Hejri dates; or, in documents, one particular A.H. date is numbered wrongly; being called in on the 5th, in another the 6th, and in the 7th Juluse year.

In Reid's Tables of Dates, printed in the Court of Sudr Udalat, in Bengal, it seems that A.D. 1763, and 64, and 65 are reckoned as the sixth year of Shah.

The dates engraven upon coins are not always agreed by European Chronologists as good. But the Hejri dates on coins stamped in India are not trustworthy.

A Hindu banker named Jagat Chandra, who prevailed upon Jafir Khan, when Governor of Bengal (A.D. 1718), to adopt the system of recoinage, and to establish a regulation that the Sicca Rupee should decrease in value in the 2nd, 3rd, and 4th years in proportion to the years 110 to 116 to 111. By this the Government derived an advantage of about two per cent duty on recoinage; this was estimated to yield a revenue of three lacks per annum from the remainder, which is the great advantage was enjoyed by the shroffs (native money-lenders) who thus profited by the annual depreciation of the coin; amounting to nearly two per cent. See Gladwin's Persian Arithmetic, quoted by Hickey, p. 100. adds—"In 1772, the English Government in Bengal resolved to relieve the people from this oppressive tax: and decreed that the 12th year of the reign of the

Emperor, the rupee should always pass at its original value. Therefore the coin from that period is stamped with the 12th, 15th, and 19th years of the reign; but the Hejira date denotes the year when they were actually coined."

This has led to a curious result. The silver rupee and the gold coin (called a mohur), though struck at Madras in 1818, and thirty years later, continued to bear a Persian inscription, declaring that they were struck at Arcot (where there has been no mint since 1800) in A.H. 1172 (which is A.D. 1758), in the reign of Alamgir; though that emperor never ruled Arcot, and his reign ended in A.D. 1760.

French writers assert that they formerly coined gold, silver, and copper at Pondichery; but investigation has shewn that they merely struck coins for the Musulman kings. This is stated in the Modern Universal His-

tory, 1740, vol 9, pages 250-251. And the writer adds that the English at Madras had the same privilege and gained the same advantages,—the coin being of the same fineness—and bearing the same (Persian) inscriptions—viz., "In the glorious reign of Mohamed Shah, this rupee was coined at Arcattæ." But on the coin made at Pondichery there is a half-moon, and there is a star on the Madras rupee." This is quoted from *Histoire des Indes Orientales*, tom. 3, p. 260.

I enquired at the Madras mint, but obtained no information regarding these occurrences; not even so much as a series of coins is preserved. Before 1855 the English Governments in India abolished the Musulman names from the coins, thus extinguishing the fiction that the Musulmans continued to reign in India.

ON TIPPOO SULTAN'S SYSTEM.

Tippoo Sultan, when he ruled Mysore, with his propensity to change everything, tried to abolish both the Hejri calculations and the Hindu series of titles. He invented a new era, counted from the birth of the false prophet. The scheme lasted about seventeen years, and died with its author. [See Asiatic Annual Register, 1799, vol. 1, p. 194.] Here A.H. 1212 is superseded by Tippoo's year 1225.

According to Tippoo's reckoning Mahommad was only twelve years old at the time of the "Flight," or Hejira, whereas he was fifty-one years old.

Imitating the Hindus, among whom he was born, Tippoo invented sixty names, which he called Muhammadi, and they were thus fashioned:—

A.D.	A.H.	Tippoo's New Titles.	
1782	1197	1210	Jabât
		11	Zaqae
		12	Azeb
		13	Jayo
		14	Delo
		15	Mâo
		16	Kubuk
		17	Jum
		18	Jâm
		19	Adum
		20	Wullee
		21	Wallee
		22	Cobkil
		23	Coakib
		24	Yem
		25	Doam
		26	Hamd
1799	1214	27	Hamid

In Moor's Narrative of Captain Little's Detachment, 4to, 1794, Appendix, pages 475 and 476, is a notice of money coined by Tippoo, dated 9121; this being reversed is 1219; and Moor states that this answers to

A.D. 1804. But Tippoo died in 1799. Moor was not aware that Tippoo had devised a new reckoning, according to which 1219 answers to A.D. 1791—as is shewn in the table now given.

Tippoo's fanciful list of years is given in Kirkpatrick's "Letters of Tippoo;" also in "British India Analyzed," 3 vols.—a work attributed to Mr. Sullivan. In this publication, tom. 1, p. 94, this date appears—"The 11th of *Zabad Jáféri* of the year of Mahomed

1215, corresponding with (*mutabik*) Pulwung Seuhir Abdica Sirawin Mana."

No interpretation is given of these words, which are not explained by any Musulman or Bramhan. But I believe the meaning to be as follows:—Pulwung is meant for Plavanga (A.D. 1787); Seuhir is Shuhr, the Arabic plural of Shuhr (a month). The next words are Sanscrit—"Adhica Srávas másam." And this, according to my Ephemeris, is July 1787.

ON THE SAMVAT AND SOOR SUN.

This name, "Samvat," "Sunbut," or "Samvatsaram," are Sanscrit words for a year. This name is used for the Vicrama'ditya Sacam; it begins one hundred and thirty-five years earlier than the Sáliváhana Sacam—that is, B.C. 57. This reckoning is chiefly used in Western India. See Prinsep's Useful Tables, page 25 and 26, which are copied from the Kala Sankalita.

In this era, year 1904 answers to A.D. 1847. But in the Bombay reckoning it is one year less—not 1904, but 1903. See "Chronological Tables of . . . Dates, . . . used in Bombay. A.D. 1752—1852." Printed in 1850.

In these Bombay Tables one column is given to "The Arabic year Soorsun," which begins thirteen years later than the Hijra. This and the Faslee are used by Hindus; each of them begins early in the month of June. Soor is one of the Arabic names of the Sun.

Two columns are given to the Parsee reckoning. The year A.D. 1850 answers to the year 1220 in the Parsee calendar; which seems to have two modes of counting months and days—one is called Shahin-shahi, the other is Churreegur, or Nowroz.

ON THE KOLLAM ERA.

Kollam is the town which is called on the maps Quilon, in Travancore, on the south-west coast of India. A.D. 1800 was year 976 of this era, which began on the 14th of September. [See Buchanan Hamilton's *Myraur*, vol. 2, p. 355.] It is called the Parasurama-Sacam, or Era of Parasurama. "The present is the third thousand of that era, counted from A.D. 825." (Professor

Wilson.) In Warren's *Kála-Sankalita*, page 298, it is stated that the Kollam era is used in the country of Mangalore, from Cotiote and Travancore to Cape Comorin.

The learned bramhan astronomers at the Madras Observatory know nothing regarding the origin of the eras, whether Sáliváhana, or Kollam, or Samvat. The natives in Malayala make statements from which we col-

ct that the Kollam reckoning commences on A.D. 824; the eight hundred and twenty-fourth of the Christian Era.*

Padre Bartolomeo, page 137, states that ollam. 860 answers to A.D. 1673. If this correct, the Kollam era begins at A.D. 3.

* Lieutenant Richard F. Burton's volume, "Goa and the Blue Mountains, 1851, page 195.

But Mr. Taylor, in his *Oriental Historical Manuscripts*, 1835, vol. 1, p. 203, translating from a Tamil document, states that the Kollam (spelt Gollam) year 227 answers to SS. 1246, which is A.D. 1324. If this were correct the initial year of the Kollam would be A.D. 764. In that document it is expressed—"from the destruction of Kollam." But of this I find no proof or explanation.

ABBREVIATIONS USED IN THE FOLLOWING PAGES.

denotes Sri, meaning His Majesty.

„ Déva—The Most Noble.

„ Maha—Great.

„ Ra'ja, Ra'ya, Ra'yalu — King, Prince, Baron.

„ Prata'pa—The Illustrious.

„ Na'yak—Lord.

„ Vira—Heroic, Valiant, Mighty.

or Chac. denotes Chacravarti, or, Emperor; used by many petty chieftains.

„ Wa'ciar, O'dayar, Vadayar (often written Wooddyer, Wurrrior), is correctly Va'cdeyar, the plural

of Vadiya, or Odiya, the Kan-nadi word for a King.

Y „ Ya'dava—a certain family.

These letters are read thus: SVPDRMR denotes Sri Vira Prata'pa Déva Ra'ya Maha Ra'ya. These form the title of one who is usually called Devaraya.

SS „ Sa'liva'hana Sacam.

H or A.H. denotes Anno Hejira, the Musul-man Era.

F denotes the Fasly (or Revenue) Year.

K „ the Kali Yuga.

GENEALOGICAL NOTICES.

In the Asiatic Researches there are lists of imieval A'ndhra kings, which seem fictitious, ascribed by Sir William Jones, by Colonel Milford, and others. The Laws of Manu (book x., 36) mention Andhras as a savage tribe. The inscriptions have no such names of rajas; which are unknown to men the present day.

Few inscriptions have been discovered relating to the Hindu history of the Peninsula earlier than A.D. 1000. And of these few, some are wrongly dated, thus becoming unprofitful. For instance: the year SS. 90 (A.D. 168) is correctly 42 Kilaca (the forty-

second Cyclic Title); whereas it is quoted by the name (29) Manmatha—which name appertains to SS. 76, not 90. A deviation of two or three years in the numeral is common enough; but a deviation of more than five years will generally stamp a document as false. Again: we find one name, Vira Bal-lala Deva, placed in SS. 100 Sarvari, the 34th Cyclic year; whereas in truth SS. 100 is Siddharti, the 53rd Cyclic Title. And Ma'd-hava Raya is stated to have ruled Vidyānagar in SS. 104 Paridhavi. But this title appertains to SS. 93, not 104.

The earliest trustworthy date is that of a

celebrated patron of literature named Bhoja Raja, whose reign is placed between SS. 118 and 194 (A.D. 196—272).

Under the year S.S. 378 (A.D. 456) some legends place Cherumān Perumallu, who is stated to have become a follower of Mahomed. This is referred to in several books; it is obscurely alluded to in Briggs's Appendix to Ferishta, vol 4, p. 532. But were the date correct, this person must have lived before the birth of the prophet whose creed he embraced.

Another fable says that this Peruma'llu was a raja of Ceylon, and one of the three who met at Muscat and adored our Lord at Bethlehem. See Astley's Voyages, 1745,

vol. i. page 29, and Stevens's translation of Portugues Asia, vol. i., page 272, and ii., page 225. Maffei Histor. Indica fol. 1593, p. 33.

The Rev. H. Gundert, a missionary in Malayala, speaking of Cheruman Perumall, observes that this name is generally known, though nothing is narrated regarding him. He adds* that Cheruman is the name of the whole dynasty of the Chera or Kerala rulers: these two names are the same; Kerala being only the Canarese pronunciation.

In SS. 411 (A.D. 489) reigned Pulakati Satyāsraya. See Journal of Royal Asiatic Society, vol. 5, p. 344.

* "Translations of documents regarding the Christians and Jews of Malabar; in the Madras Literary Journal for 1844, page 115—126.

THE YADAVA RAJAS.

The following dates occur regarding (Y.R.) the Yadava Rajas.

A.D.	SS.	Title.	Raja's Name.
808	730	Sarvadhari	Sri Ranga Yādava R.
	778	Dhatu	O'man Y.R.
	799	Hevilambi	Tiruvengada Y.R.
	821	Siddharti	Peranganni Y.R.
	836	Bhava	Ganda Gopala Y.R.
	859	Hevilambi	Nārāyana Y.R.
	872	Sadharana	Kampali Y.R., and also Bhuvan Eca Malla.
	878		Immadi Vallevatu.
	887	Krodhana	Buccanna Y.R.
	909	Sarvajit	Vira Narasimha Y.R.
998	921	Vicari	Immadi Narasimha Y.R.

All we know, true or false, of these rajas is the date of their reigns, and their having bestowed certain lands on certain priests. For the inscriptions on stone are generally intended for this one purpose. The rights so conferred were long ago abolished by the Musulman invaders.

The following continuation of the list is copied from a record written in the Tamil language: in a folio volume (marked No. 819), in the Mackenzie Library.

The earlier part of this list is perhaps veracious as regards the names, but the dates

seem fictitious. The 10th Raja Pratapa Rudra is known to have ruled Warangal, of Orangolu (now called Wantimitta near Cuddapa) in A.D. 1319—1335 and in this list his reign is dated S.S. 1013—1070; that is, A.D. 1091—1148.

The original document specifies the Titles of the first and last year of each prince. But it will suffice to give the numeral of the first year in each reign. And to this I have added the dates A.D. In this list Y. R. will denote "Ya'dava Ra'ja."

1007	929	O'ya' Y. R.
1019	941	Pa'l'iya Y. R. \
1028	950	Vasudēva Y. R.
1040	962	Tiruva'di Y. R.
1055	977	Katiki Y. R.
1069	991	Bhujanga Y. R.
1081	1003	Sa'lava Na'ra'yana Y. R. This was the latest Yadava: being conquered by
1091	1013	PRATA'PA RUDRA D. of Warangal. But this reign is here dated 220 years too early. The same list proceeds thus: the numerals shewing the year in which each reign begins.
1149	1071	Balla'la Raya.

- 1158 Ana Vēma Reddi. In truth he lived at least a century later.
- 1235 Bukka Raya ruled Vijaya nagar.
- 1249 Hari Hara Raya.
- 1263 Vijaya Bukka Rāyalu.
- 1276 Gajaki DR.
- 1284 Dēva Rāya. (This is certainly one century before the true date.)
- 1291 Virūpāxa Rāya.
- 1296 Mallic A'rjuna R.
- 1303 Rāma Chandra R.
- 1312 Sāluva Katha'ri R.
- 1319 Deva RMR.
- 1334 Ganda YMR.
- 1338 Kumāra Kamba Y.R.
- 1350 Sāluva Katanka DR.
- 1299 Immadi Kamma R. (Perhaps meant for Immadi Kathari Narasinga R. who lived in A.D. 1503)
- 1410 Vira Narasingaia R.
- 1431 Kriishna DMR. (this date is correct.)
- 1451 Achyuta DR.
- 1464 Sada' Siva R.
- 1486 Tirumala DR.
- 1494 Sri Ranga DR. who ruled until [A.D. 1585] SS. 1507.
- the list terminates. I preserve it as it very possibly gives a correct list of names, but its Chronology earlier than 1488 will not bear investigation. The original manuscript, written in the Tamil letter, contains some errors in Titles, but it may be useful to notice because they occur in many documents.
- abhava is misspelt thus 40 "Parabhava"
- | | | |
|--------|---|-------------------|
| irmuki | " | 55 "Durmati" |
| avanga | " | 35 "Plava" |
| ama'di | " | 47 "Prama'di'cha" |
| rudri | " | 57 "Rudirodgari." |

E CHALUKYA DYNASTY.

antiquity of the Chā-luk-ya or Chā-
race has been proved by inscriptions
in the twelfth century of the Christian

era. Professor Wilson, in his Descriptive Catalogue of the Mackenzie Manuscripts (vol. 1, p. cxv.), has pointed out that there were two Chalukya families—the elder at Kal-yānan, in western Karn'ātā, the eastern branch ruling Kalinga. In the fifth volume of the Journal of the Royal Asiatic Society, Mr. Wathen has given inscriptions regarding Vishnu Vardhana, but not naming the more ancient rajas. The Journal of the Bombay Branch of the Royal Asiatic Society, 1853, vol. 4, p. 97—116, gives a paper by Major George Le Grand Jacob, describing the branch at Kalyan, supposed to be dated in A.D. 1261; but this has neither date nor title, and bears no marks of authenticity. He adds one dated A.D. 1391, which is equally vague.

Mr. Walter Elliot published an essay on this genealogy, in the proceedings of the Royal Asiatic Society; and again in the Madras Literary Society's Journal for January, 1838. This gives the Chalukyas a much more remote antiquity. But after studying the inscriptions, beginning with the latest, in Musulman days, I came to a different result. And I afterwards found that Colonel Mackenzie originally had ascertained the true dates; and Professor Wilson, in the volume I have named, agreed with him.

Colonel Mackenzie's account is printed by Mr. A. D. Campbell, in his Telooogo Grammar: it is there stated that the family was subverted in the second century "of the Christian era." But this was an oversight; it is the second century of their own era, of which the first year answers to A.D. 1016. He also speaks of a Chalukya Vishnu Vardhana, of the Saiva creed, but the name confutes this; no one bears the name of the rival faith.

The Chalukya, or Chālukya era commences with the year Nala, S.S. 938, which answers to A.D. 1016. The first ra'ja's name was Bizzana, or Bijjala. His titles are Ka'la-churya Chacravarti, Jaya-Simha Deva Bizzana Raya.

The Chalukya rajas attempted to introduce a new era, instead of, the S.S. and the Kali. But they are not regular; the year Nala is certainly the first year (A.D. 1016), yet the next year, 1017, begins the series in some inscriptions, and in others the following (1018) is the initial. At A.D. 1048 a new reckoning begins, another at 1063, at 1068, at 1095, at 1110, at 1150. The Chalukya then ceases and the Trailókya begins, evidently a continuation of the same. There are five rajas of this family, each using the numeral counted from his accession. The latest reign ends at A.D. 1352, being succeeded by the Ya'davas. Each of these rajas had several names, probably used at various periods.

The Chalukyas, as rulers in the Telugu country, commence from A.D. 1016, or "S.S. 938, Nala." In that year began Bizana Deva. His titles are Ka'la'churya Chacravarti, Jaya Simha D. Tribhuvana Malla, or, Jagad E'ca Malla. These last titles, "lord of the three worlds," merely imply that he was king of the Telugu, Kannadi, and Tamil countries. * At this time Sri Sailam was ruled by Alanandana Chacravarti.

From some inscriptions Kalayuoti, S.S. 940, A.D. 1018, seems to be the initial date, as Vibhava is often quoted as the eleventh, and A'ng'irasa as the fifteenth. Yet most dates clearly are counted from Nala 938. Elsewhere Vioriti (1033 S.S.) is stated to be the first Chalukya year.

In the transcripts made for Mr. Elliot, the copyist has often inserted the S.S. dates in the Chalukya records, and they are not correctly reckoned; thus the 39th year of Kulottunga Chola 1051 is written 1031. The 46th Chalukya year is S.S. 983, but the transcriber computed it 1044, and, through timidity, he has sometimes omitted the title altogether.

* Thus Apuleius calls the Sicilians "trilingues." And in Wellington's wars in Southern India, the General, named Blundell, was styled the Lord of the two worlds, that is ruling the Marata and Kannadi countries, which formed the Deccan, or Deccan.

These rajas are sometimes styled 'of Siddhava'di,' a place on the banks of Tumbudra. It was afterwards included in Vidya'nagaram. (Local xl. 301.)

The Chalukya genealogy is detailed in a long inscription, printed in the Asiatic Research Journal (by Prinsep) for Oct., 1833, 903—6. It is printed in Devana'gari chiefly in Sanscrit, but the first stanzas are in Telugu, in the Sisa metre.

It purports to be the genealogy of Katiya Rudra D., ruler of Anumuconda, a place in the Rajamahendri country. As usual, the dates are given.

The first person named is Tribhuvana Malla D., "the adorer of Siva." Then Tailapa R. Then Nissanca-Malla, Késvara." [This seems to allude to the islands at the mouth of Gôda'vari.] Then Tailapa D. Then Gövinda R., in Maratagani nagaram, also "in Prôlu, (an old word for a city.) "At Anumacor Jagad-déva, lord of Prôlu." His queen was Uppamma Dêvi (a word meaning his son was Ka'katiya Rudra D.

The name Ka'katiya is misprinted in the English transcript. The date assigned in the English transcript to Rudra D. is "SS. 1054, title Chitravarma." This title shews that the numeral is not given, but has been put in or taken out. In the original documents Tailapa is given but no SS. numerals. There are occasionally Chaluk-ya dates, according to the reckoning from the rise of the family.

This document may be veracious, but it deviates in some points from other records.

The First Chalukya reign is appar- ently sixty years, from Nala 938 to Nala 1000. Yet at 987 a new reckoning begins, which seems to be that of Trailókya-Malla, Malla. This probably is a son reigned in the later years of his father; he is also styled Chaluka Bhuloca Malla, or Lord of the whole earth.

year Khara 1033 (A.D. eleven and eleven) begins the reign of VISHNU VARDHANA, a Chóla. At this time he had reigned some time before SS. 1098 as Bet'téd'a. He was by religion a Jaina, but a Brahmin, a reformer of the Jaina creed, persuaded him to the Vishnu religion, and changed his name to Vardhana. This was in A.D. 1133. It is no proof that the Vishnu belief had come into Southern India at any date.

Vardhana was born in the SS. 1009, at Sri' Perum-butúr, (English call Stree Permadoor). See Fr. Buch. Mysore, vol. I., But in vol. II., page 80, his birth is said to be in the Kali year 3118: 339, or A.D. 1017.

Statements prove the period in which Vardhana lived. There are several statements giving him a higher antiquity, and he bore the same name, some of which were said by some Jainas, as though the creeds would have rulers who were other idolatry.

Zeal for the Vishnu creed, the statements translated into these three languages look on which their superstition

In a prefatory dedication it is named the ancestors of the patron; several Kannadi names were as given in Southey records in his Madoc, traced a heretical origin. They were omitted; and later heralds stated a more orthodox ancestry, descent from Vishnu himself.

Local Records deposited at Madras, SS. 300—301, is a faultless inscription in Halleh Kannadi, or ancient in these words—"Tri-bhuvana cca'dú gonḍa, bhuja-bala-vi'ra-
VISHNU VARDHANA HOISANA dévara"; added that he was a JINA, which, as, signifies a god; dévara mean-

ing a lord or ruler. His queen, S'a'ntala Devi, embraced the Vishnu creed earlier than her husband did. His city is herein called S'ra'van'a Bel'igola, in the Soonda country.†

The name Vishnu Vardhana is occasionally found in other genealogies, some of which may be veracious, but the personages are of no note. There are inscriptions dated "Vibhava, year 110 of the Chalukya era," but these do not agree with any reckoning.

The following Chalukya rajas are named:
A.D.

- 1139 "53 Siddharti." Raja Jagad Eca Malla
- 1150 "4 Pramoduta." Trailokya Malla D.
- 1156 "Dhatu." Tribhuvana Malla, also styled Bizzana De'vara (alias) Nijabhujja Bala Chacravarti (alias) Jagad eca Vira Bizzala Deva.
- 1168 "22 Sarvadhari." Kalachurya Chac. R. Mura'ri Sóyi D. (or, So'ves'vara).
- 1176 "30 Durmukhi." Kala'churya Chac. (alias) Nis-sanca Malla, (alias) Sancama D., (alias) Ya'dava Na'rayan'a A'hava Malla D.
- 1184 "38 Krodhi." Chal. Chac. Sóme'swara D. (alias) Tribhuvana Malla D.

After this date the name Chalukya rarely occurs, and seems to be used without a proper claim. It will be observed that these dates and names do not everywhere correspond with those found in the Koncan genealogy. The Chalukya dynasty thus terminated and was succeeded by the Yādavas.

The marbles that record the names of the Chalukya rajas always specify the name of the year, but usually omit the Salivahana numeral, substituting the Chalukya numeral, which is reckoned on some plan hitherto unexplained and apparently irregular. For instance SS. 1088, 1094, and 1097 are all, in various records, styled "the 31st year of Tribhuvana Malla." The year Para'bhava is in one place called the 40th; elsewhere the 51st Chalukya year.

The first of the Chalukya rajas is named

1 is a village south of the river Bhi'ma, Krishna, between Bi'ja'pur and Saga-

†See Local Records, vol. xxx., p. 336—389; vol. xxxi., p. 99; vol. xi., p. 688; where the SS. dates are specified.

Tribhuvana-malla, likewise Trailokya Malla, likewise Jagad-êca-malla, likewise Bhuvanaica-malla; all four names merely denote imperial sway, while Tailapa seems to have been his personal name.

The same titles, omitting personal names, were continued to his son and grandson: hence arose the error of supposing him to have ruled ninety years. Some lists state that the first raja was Jagad-êca Malla; the next was Bhuvanaica Malla; the third was Tribhuvana Malla; and the next rulers were the Ganapatis.

As the poet and grammarian Nanaia Bhatta, who wrote the A'di Parvam, in Telugu, lived in the reign of Vishna Vardhana, we are now in possession of the æra when that author flourished, and at that period the Telugu language had already attained classical perfection.

The Mahabharat was commenced by the grammarian named above, but was continued by Erra Pragada, and completed by Ticcana Somaya'ji, who likewise translated into Telugu metre a great part of the Ramayan. He died in the year SS. 1120, that is, A.D. 1108. This date is recorded in verse.

"Ambara, ravi, asi, s'aca

Bdambulu zana, Ka'layucti, A's'wija ma'sam
B'ambara-man'i-prabha'-ni

Bhamb'agu, Tikka Yajva, Bramhamu ponden."

"The venerable poet Ticca obtained heaven in the month A'swija, in the year Kalayucti which has the numerals denoted by Sky (0.) Suns (12.) and Moon (1). [That is by reversing the figures, SS. 1120.]

In the Descriptive Catalogue (vol. I. 267,) Professor Wilson has recorded this verse; but that distinguished scholar was on this occasion misled by an *erroneous* copy, which gives the date incorrectly, SS. 1210; (A.D. 1288) and this is not the year named Kalayucti, but Sarvadhari.

In a former publication (Essay on Telugu Literature, printed in the tenth volume of the Madras Journal of Literature, 1839), I also was deceived, regarding the date of

Krishna Rayalu, an eminent raja of Vijayanagar. I quoted a Telugu epigram which learned bramins usually cite; they believe that it fixes his decease in the year "Tanna 1387" that is, A.D. 1464. But later research has convinced me that the person named in that verse is not the celebrated patron of Telugu literature, who lived until the year Virodhi, SS. 1451 (A.D. 1529). In fact we know nothing regarding that personage.

PRIMEVAL RECORDS.

Few inscriptions have been discovered relating the Hindu History of the Peninsula earlier than A.D. 1000. And of these few some are wrongly dated, thus becoming doubtful. For instance, the year SS. 90 (A.D. 168) is correctly 42 Kilaca (the forty-second Cyclic Title), whereas it is quoted by the name (29), Manmatha, which name appertains to SS. 76, not 90. A deviation of two or three years in the numeral is common enough, but a deviation of more than five years will generally stamp a document as false. Again, we find one name, Vira Ballaia Deva, placed in "SS. 100 Sarvari the 24th Cyclic year; whereas in truth SS. 100 is Siddharti, the 53rd Cyclic Title. And Madhava Raya is stated to have ruled Vidya'nagar in "SS. 104 Paridhavi." But this title appertains to SS. 93, not 104.

The earliest trustworthy date is that of a celebrated patron of literature named Bhoja Raja, whose reign is placed between SS. 118 and 194 (A.D. 196—272.)

Under the year SS. 378 (A.D. 456) some legends place Cheruma'n Perumallu, who is stated to have become a follower of Mahomed. This is referred to in several books; it is obscurely alluded to in Brigg's Appendix to Ferishta, vol iv, page 532. But were the date correct, this person must have lived before the birth of the prophet whose creed he embraced.

In SS. 390 (A.D. 468) Madhava Varma appears to have abdicated, after a reign of

one hundred and thirty years, in favour of his son Padma Sena.

In SS. 411 (A.D. 489) reigned Pulakesi Sa'tya'saaya. See Journal of Royal Asiatic Society, vol. v., p. 344.

THE KONKAN GENEALOGY.

The princes of Vijayanagar descended from a long line of forefathers; a list of whom I have already printed. I will now again give that catalogue as recorded in an ancient Tamil volume called Konka-Desa-Rajaccal, or, Konka-na Raja Vamsa'vali.

A faulty translation has already appeared in the Madras Journal of Literature, Volume XIV. The book is little more than a record of various gifts presented by the successive rajas to gods and bramins. Each gift is minutely described and dated, with precision.

The earliest names herein given are as usual fabulous. The list commences a little before the beginning of the Christian Æra. Numerals are attached to each raja's name.

1. Vira Rāja Chacravarti was the first ruler of the Konkani country; he was of the Farmer tribe called Vella'la, or Reddi.

2. Govind Raja.

3. Krishna Rayalu.

4. Ka'la Vallabha Rayalu.

5. Govinda Rayalu, who lived in Swabhanu (the 17th year of the Cycle), which is (SS. 4) the fourth year of the Salivahana æra, answering to A.D. 83.

6. Chatur-bhuja-Kannera Deva Chacr. who likewise was of the rustic tribe.

7. Trivicrama D. Chac. This was the first raja who 'quitted the Jaina creed and became a worshipper of Siva.* He conquered the Chola, Pandya, Kerala, and Malayala countries. He lived in SS. 100 [A.D. 178,] "in the year 53 Siddharti."

It will be observed that in this list the years are generally quoted both by their titles, and also by the numeral representing their place in the Cyclic list of sixty names.

* There is no proof of this early introduction of the Saiva idolatry.

8. S. Konkani Vara Dharma Mohadi Rayalu. His reign is dated SS. 111, year Pramöduta. [A.D. 190.]

9. Mādhava Mahādhi R.

10. Hari Varma Maha'dhi R. SS. 210. [that is A. D. 289.]

11. Vishnu Gōpa MR. He founded Dalva-na-puram; which was afterwards called Talac-ca'qu. He abdicated in favor of his adopted son, named

12. Ma'dhava Ma'dhadi Raya, who ruled until the said raja Vishnu Gōpa had a son born to him named,

13. Krishna Varma. He was succeeded by Ma'dhava Raya's son, named

14. Dindicara R. The next raja was Krishna Raya's younger sister's son, and named,

15. Konkani Ma'hadhi R.

Then the country passed into the hands of Chandra D'indiga R. In the year Prabhava SS. 288 (A. D. 367,)

16. His son named Dhruva Niti R. succeeded him, and ruled the countries of Kērala, Pa'ndya, Chola, Dravida, A'ndhra, and Kalinga; "and obtained the epithet *Dhruva Niti* or Absolute Justice." His son was

17. Mushkara Pa'ndya: who was styled Bramh-a'ri Ra'ya, or Foe of Brahmins. His son was

18. Tri-vicrama Ra'ya: who was succeeded by

19. Thū Vicrama Ra'ya. He lived in SS. 461 (A. D. 539). He bore the title GAJAPATI or Lord of Elephants. His son was

20. Konkani MR.

21. Raja Govinda R. He was partial to the Linga-dha'ri sect.*

22. Siva Ka'ma Raya was a devout worshipper of the gods. The date of his reign is preserved in the words "Vastu, graha, bana. That is, 1 and 9 and 5, = SS. 591 Pramöduta' = A.D. 670.

23. Prithvi Konkana Mah-a'dhi Raya who ruled until Parthiva SS. 608 = A.D. 685.

24. Raja Malla DR.

* Yet we know from other documents that Basava the founder of this sect was not heard of before A. D. 1160.)

25. Gaṇḍa DMR.

26. Satya Va'kya R.

27. Guṇad Uttama R.

[Thus far the list seems to be fabulous.]

28. Raja Malla DR. who reigned from year Vicari, SS. 800 (A.D. 879.) until SS. 816 Ananda (A.D. 894.)

"And then followed the CHOLA RAJAS, who ruled the Koncan. The first was

29. Vijayada' Raya. His son A'ditya Varma ruled Tauja'ur in the Chola country. He ruled the Koncan and his capital was Talaccadu [fifteen miles south east of Seringapatam on the Ka'veri.]

His son was

30. Vira Chōla R. also called Vira Chola Na'ra'yana Razu.

31. Tējōditya R.

32. Parāntaca R. also called Arimūla : he ruled at Tanjaur. His wife was Chitri and with his corpse she was burnt. He had many sons : one was

33. Divya R. who conquered Madura. He took the title Ariditt.

34. Ari Vāri Devara, raja of Tanjaur, ruled the Chola and Dravida countries : His brother conquered Madura ; but restored it to its original lord, the Pandya. Ari vara Devara conquered the countries of Kerala (Malayalam) Collūr, Indragiri, Niligiri-durgam and other places : but the Kerala raja's general named Bhima Rao repelled the invasion, and slew the son of the king who thereupon marched nothwards through the Kalinga country as far as the river Narmada (Nerbudda.) He also completed the pagoda at Chidambaram (Chellumbrum) which had been partly built by his father and grandfather. His capital was Kerayūra in the Talaccadu (Seringapatam) country ; and he named it Ra'ja Ra'ja Puram. He lived in the year Visva'vas, SS. 927 [A.D. 1005.]

Here commences the HOISALA Dynasty, descended from the Ya'davas.

This list as usual commences with Bramha and certain heroes ; but omits the immediate predecessors of VOISALA, elsewhere called, Hoisālā ; originally called *Sādhā*, but changed

into Oyi-sāla.

35. Vina-ya'ditya ruled Talaccadu [Seringapatam] and seized some villages in the Tulava country. Year Sa'dha'rana SS. 991 [A.D. 1070.] He was succeeded by his son Valla'len, that is,

36. Balla'la Raya : he was of the Jain creed. Year Axaya "SS. 1015." But the true number would be SS. 1008.]

Here commences the Chalukya Dynasty.

37. Beṭṭeda Ra'ya, son of Battala Ra'ya who took the title BETTEDA VISHNU VARDHANA. He was king of Talacca'du [Seringapatam] and also part of the Talva and Concan countries : also Malayala and Conḍugu [Koorg.] also in the north Jāt-mālā, and (eastwards) A'lambādi. He long waged war with the raja of Kerala (Malay-lam.) The wife of Vishnu Vardhana was Sa'ntala Dēvi, who was at first of the Jain creed ; but embraced the Vishnu religion. For in the year Vicrama SS. 1021 (otherwise 1023, A.D. 1100) the saint Ra'ma'nuja-chari (the celebrated reformer of the Vishnu sect) persuaded the raja to embrace the Vishnu creed. This raja died in the year Ananda, SS. 1055. (A.D. 1134.)

Here the chronicle specifies various gifts of land, bestowed by this raja on Jains and Brahmins : with the dates.

38. Raja Narasinga Raya became raja of Talacca'du, and dwelt at Dora-samudram. He bestowed many lands on brahmins. He died in the year Vijaya SS. 1094 (A.D. 1173). His son was

39. Ballala Raya, whose mantri (minister) was Chandra Mauli. His dalavayi or general was Ke's'iv' E'swara.

40. Sōmēs'wara came to the throne in SS. 1155 (A.D. 1233) and was crowned in his father's life time.

41. His son was Vira Narasinga Raya who was crowned at Talaccadu in SS. 1205 (A.D. 2283) His *mantri* was Peruma'n Danda Nayaca, and his *śenapati* (general) was Prama-chamūpati.*

* The names of ministers and generals merit notice, because these occur in many inscriptions, wherein these personages style themselves princes.

GENEALOGY OF THE YADAVAS.

The earliest progenitor was Ya'dava Sangama Raya† [spelt in the Tamil original Sankama.] He had five sons, named Bukka Raya, and Hari Hara R., and Sambara R., and Ma'ra'pah R., and Muttapa R. Of these the eldest, Bukka Raya, came to the throne; he had a son, named,

42. Hari Hara Raya, who is also called Hari Hara Bukka Rayalu, king of Vijayanagar.

43. His son was Deva Rayalu. SS. 1270, Virodhi [A.D. 1379,] whose son was

44. Vira Hari Hara Raya. He fought and conquered the (Pa'rsi) Persians, (that is, the Musulman invaders.) Then he marched (with his general Gunḍa Dandā Na'tha) into many countries as far as (Sindhava) Scinde. He was succeeded by

45. Vishnu Deva Maha Raya; who is merely said to have built certain pagodas, and endowed them with lands for sacred purposes.

46. He had two sons named Mallic Arjuna and Immadi D. R. His army was commanded by Timmanna Nayac, in the year Yuva SS. 1377, (A.D. 1455.) They were succeeded by Vira Narasinga Rayalu, (who appears to have usurped the throne.)

DYNASTY OF VIRA NARASINGA RAYALU OF VIJAYA-NAGAR.

His descent is described, beginning as

† Regarding him there is a Inscription in Sanscrit. It was sent by Colonel Mackenzie to the venerable Colebrooke, and is published in his Essay on Ancient Monuments (Essays, London, 1837, vol. 2, page 254—266).

In this it is stated that in the Yadu race there arose a king, named SANGAMA, who had (five) sons named Hari-Hara, Kampa, Buccaraya, Ma'rapa, and Mudgappa. The victories gained by Bucca-raya are described in the usual inflated style. He ruled Vidya'nagar. His queen Gaura'mbica, bore a son named Harihara, in whose reign this Inscription was written. It is dated SS. 1317 Dhatu, that is A.D. 1385.

usual with the fabulous ages. From the Lunar * race descended the Ya'davas, from whom sprung the Tulavas. In this family arose Timma Raz, king of Vijaya-nagar. His son was,

47. Vi'ra Narasinga Raya who ruled Vidya'nagar. His *mantri* was Ud-danda, and he conquered Vijaya Raz, the ruler of Kērala (Malayalam). He made a treaty with the Pa'ndya raj'ah of Madhura. He vanquished the Kalinga and Bengala countries. He slew the Gajapati (that is, the ruler of Orissa) and vanquished many Mahomedans. Then he took the title Lord and Master of all kings and princes.† He died in SS. 1401, year Sarvari (A.D. 1480). He had two wives, (literally women, one being a concubine) named Tippaxi and Na'gala Devi: to them were born two sons named Vi'ra Narasinga Rayalu and KRISHNA RAYALU. Another wife (lit. woman) named Woyambica bore him two sons named Ranga-Rayalu and Achyuta Rayalu.‡

48. In the year Sarwari, SS. 1401 (A.D. 1479) Vi'ra Narasinga Rayalu was crowned: he lived until year Rudirodgarī SS. 1425 (A.D. 1503).

49. He was succeeded by his younger brother KRISHNA RAYALU.§ who was crowned in the year Ractacshi, SS. 1426. (1505.) His younger half-brothers were Acnyuta Raya and Ranga Raya. This raja built the forts at Vijaya-nagar, and Penukota, and Chandragiri, and other places. He marched

* The Solar and Lunar races (Surya Vansam and Chandra Vansam) like the Pelasgi and Hellenes of the Greeks, are often mentioned: every raja pretending to trace his lineage up to one of these aboriginal stocks. See Raper's Survey of the Ganges, in Asiatic Researches, Vol. XI., quarto, page 523.

† This title, implying universal dominion, is a mere flourish added to the names of several rajas. Many English writers have been deceived by such idle phrases, which are just as fabulous as the "King of France," which so many of our English monarchs used to assume.

‡ A clearer account is given in another page of the present volume.

See Madras Literary Society's Journal, No. 32, page 40.

into the Dravida (Tamil) country wherein he conquered the towns of Ka'nchi' (Conjevaram), Senji (Gingee), and Velloor. This raja's elder brother, Vi'ra Narasinga Rayu. (the preceding ruler) had attacked the raja of Um-mat-toor, near Sivasamudram, but had failed. It was defended by Chicca Rayalu; and Krishna Rayala conquered this town after a siege of one year. Thence he marched to Sri-rangapatnam (Serlingapatam), which town he fortified and made it his capital in the year Prabhava SS. 1434 (Error for 1429, which is Prabhava, A.D. 1507). He conquered the Codugu, Kerala, Malayalam, Chola, and Pandya countries. Then he marched northwards and made friendship with the raja of KALINGA, and the Rulers of the HINDU DESAM.* He also subdued Ghurjara, (Guzerat) and Magadha. He conquered many Turacas (Musulmans) and then returned to Vijayanagar, where he died in SS. 1462† (A.D. 1540).

50. He was succeeded by his younger brother Ach-yuta Ra'yalu: who laid out more money than his predecessors on gods and bramins.‡ He died in the year Siddharti, [SS. 1480 A.D. 1559] after a reign of 18 years.

51. He was succeeded by Krishna Rayalu's son Ra'ma Raya, [who is elsewhere styled Aliya Rama Raya.] His younger brother was [Aliya] Timma Raya. Their army was commanded by Sada' Siva Raya,§ who fought the Musulmans but at last he was beaten and

driven first to A'ne'gondi which he lost: but then the raja made peace with the invaders and retained Penagonda. He had three sons named Sri Ranga Raya, Rama Raya, and Vencatapati Raya. After ruling for fifteen years he died in SS. 1494 [A.D. 1572.]

52. He was succeeded by his eldest son Sri Ranga Raya in the year Yuva. (SS. 1497) He placed Serlingapatam under the command of his brother Ra'ma Raya; who soon died. His younger brother Vencatapati Raya commanded Chandragiri.

53. This raja (Sri Ranga Raya) was succeeded by his son Tirumala Raya, who was crowned in the year Parthiva, SS. 1506 [A.D. 1585.] In SS. 1512 year Khara (A.D. 1591) his grandfather Sri Ranga Raya died at Penagonda, and was succeeded by his son Vencatapati Raya.

Then Serlingapatam was besieged by Vi'rappa Nayac of Madura; who was defeated and driven back to his home. But Mattala Vencatapati, commander of the Serlingapatam army, betrayed his master and left him (Tirumala Nayudu) a prisoner at Madura: while he usurped the throne. Tirumala Nayudu escaped, and made his way home: he took up his abode at the village of Ma'linga Kesari, where the rebels attacked him. But he was rescued by Raja Wadayar king of Mysore, who marched to Serlingapatam and in the year Saumya SS. 1531 (A.D. 1609) he conquered that city and made it his capital.

* In the Inscription already noticed as translated by COLERBROOK, in the twelfth verse is a similar mention of one HINDU RAYA, whom that learned translator supposes to be the Hindu pati of Bundelkhand. A conquest of that country by Krishna Raya would not be a whit more marvellous than others averred in these documents, which make him ruler of every country known to the chronicler.

† Erroneously here written SS. 1400. But, even if we did not know the true date from other sources, we are here told that his successor reigned for eighteen years, which settles the date.

‡ Pity that neither gods nor bramins saved him from the Mussulman conquerors!

§ In many inscriptions Sada Siva is described as a king: but he was in fact only the general.

Here the history terminates. In making this English abstract I have omitted more than three quarters of the volume, consisting of minute and tedious details regarding grants of land made by the Rajas to bramins; and long since abolished by the Musulman conquerors.

POETICAL GENEALOGIES.

Some of the Hindu Rajas trace their progenitors for five, others for ten or fifteen centuries. To this they usually add a fictitious genealogy, extending the lineage into

ous ages; and commence with the earli-
inscrit heroes of the Kali Yugam: who
med Paraxit and Janamájaya; thus the
English historians derive the British
from the Trojans. One of the lists is
ious and precise enough. It runs thus,
encing with the Kali Æra, 3101 years
e Christ.

Kali Years.	First Year of King named	Length of Reign.
1	Parixit	64 years.
65	Janamájaya	143
208	Raja Narendra MR. ...	140
348	Sarangá Dhara	214
562	Súdraca MR.	154
716	Vicramarca	1745

us far the names are fabulous. The
gious reign of Vicramarca embraces a
d of which nothing is known.

2461	Bhoja MR.	144
2605	Nandana Chacravarti	62
2667	Tribhuvana Chacr ...	57
om this date the Chola names are Tamil.		
2724	Uttunga Chola	32
2756	Kuló ttunga Chola ...	15
2771	Rajendra Chola	9
2780	Tiru mudi conda Chola	18
2798	Kariccála Chola	21
2819	Arindava	13
2832	Warayūr	17
2849	Sengaliní	15
2864	Mannalanda	12
2876	Manu ni ti kanda	15
2891	Vák-kandā	14
2906	Ala poranda	8
2913	Tirun'ótti	15
2928	Arilón kanda kounden	62
2990	Jayan-counda	12
3002	Krimicanta	20
3022	Tondaman	12
3034	Bhūtaccanda	45
3079	Sengu-oranda	14
3093	Sólána Chola	11

ie next names are dated in years that
w (A. D.) the Christian Æra.

3104	Kangonda Chola	11
3115	Sundara Pándya Chola	40
3155	Bódhappa Chola	24

Here the list terminates, before A. D. 79 ;
when the Salivahana reckoning commences.
This List, though conjectural, exemplifies the
Hindu method. I have translated it from an
original which uses only Titles as dates, and
is worded thus :

“In the first year of the Kali yugam,
lived king Paraxit who ruled until the year
Chitrabhanu : 63 years ; and Janamejaya ruled
143 years from the year Swabhanu until
Visvavas : and Raja Narendra ruled 140 years
from Parabhava until Krodhana &c., &c.”

THE MYSORE FAMILY.

The following Genealogical tables are
copied out of various manuscripts collected
by Colonel Mackenzie. Wishing to convey
authentic statements, I transcribe these lists
from the Telugu or Canarese originals, un-
altered ; as regards the later or historical
period, the mythological names which begin
many of the lists appear needless.

The first list is one noticed in the preface
to Colonel Wilks's History of Mysore: it is
entitled “The succession of the Kings of
Mysore, from ancient times.” Colonel Wilks
translated from a Persian version : but the
manuscript I use is the ancient Canarese
original, from which the Persian statement
was framed. This Canarese document fills
two volumes (No. 1926 and 1721) in the
Mackenzie library. They are written with
white chalk upon (kaditam) pages made of
cloth covered with black plaister. Transcripts
have been prepared on English paper at my
desire.

The Mysore rajas were Lingavants or
Jangams : sectarians who are scorned by
Vaishnavites and Saivites as heretics. Col.
Wilks knew but little regarding them, and
speaks of them as phantom kings.

In this list W denotes Wadeyar, and A
denotes Arasu ; that is, King.

Appanna Timma R. His sons were A'r-
vélla Cha'm A. Wadeyar, and Da'sappa W.

and DRW. The sons of DRW were Chōla Cham A. W. and Krishna W.

A.D. SS.

1327 1249 The son of Chola Cha'm A.W. name Pedda Cha'ma RW. was crowned.

1306 1318 And Krishna W's son was named Bet'ta W.; the second son was RW. And Pedda Cha'ma W's eldest son was Chama RW. The 2d son was Bet'tada Cha'm R.

3d son was Maduca DRW.

4th son was Chenna RW.

1399 1321 The next was Narasa RW; he

1401 1323 was the son of RW. and the second was Nanja RW., and the 3d was Bettad'aia:

1432 1354 the 4th was Immadi RW.

1435 1357 Kanthirava Narasa RW.

1447 1369 Elayūru DRW.

Mari DRW.

1478 1400 Dodda RW.

Chikka Devaia.

1486 1408 Next came the son of Immadi RW. named Chama RW.

1492 1414 Chinna DRW. whose son was Kanthirava Narasa RW. The second was Pedda Krishna RW., born in SS. 1444.

1614 1536 Immadi Krishna RW; whose younger brother was Nanja RW.

1647 1569 Nanja RW. son of Immadi.

1712 1634 Cha'ma RW.

1799 1721 Krishna RW.

The dates here mentioned are apparently those of the coronations; I have left out the specifications of the number of years, months, and days each raja reigned. The dates are given very minutely as regards lunar days, and names of years; but all the numerals of years are omitted; and I have supplied these in the margin. There are long genealogical details which also I have dropped, stating merely the names of the reigning rajas. •

THE VIJAYA'NAGAR DYNASTY.

In the Asiatic Researches, vol. xx., page 1, is an Essay by Mr. Ravenshaw and by Professor Wilson, on the Vijaya-nagar family, with copies and translations of Inscriptions.

The town ruled by Hari Hara Raya and his successors was called (perhaps at various times) by various names: 1, A'pé or Hampé. 2, Nāgar-caṭṭu. 3, (A'négondi, Anagondy of the maps). 4, Pamṭā-xētram. 5, Vidyānagaram. 6, Jayapuram. 7, Pānpavijayapuram. 8, Vijaya-nagaram. 9, Rāya-paṭnam. It was also called Paṭṭanam, that is, the Capital. When the Portuguese first heard of it, the raja was Narasimha Raya, and hence they called it the Kingdom of Narsinga. The Musulmans called it Beejanugger, and this the French pronounced Bisnagar; it is on the river Tunga-bhadra, north west of Bellary.

The following genealogy, originally printed by Mr. Campbell, was copied from the "Gutpurtee manuscript," in Colonel Mackenzie's collection. No such document is now in that Library, nor does the name appear in Professor Wilson's descriptive catalogue thereof. The genealogy, wherever found, appears veracious, but it has often been printed incorrectly.

A.D. SS.

1336 1258 Hari Hara Raya (The First)* was crowned at A'négondi.

1350 1272 He was succeeded by his brother Bukka Rāyālu.

1379 1301 Hari Hara Rayalu the Second.

1401 1323 Vijaya Bukka Rayalu.

1418 1340 PallaBukka Rāyālu.

1434 1356 Gaṇḍa Deva Rayulu.

1454 1376 Rāja Sēkhara Rāyulu.

1455 1377 Vijayalu. [DB.

1456 1378 Praudha DR; also called Pratāpa

* The expressions, First, Second, &c., are introduced by English writers: they never appear in any Hindu genealogy. In some lists the word, "Mari," (pronounced Murry, meaning 'again') is equivalent to second or third.

The final syllable lu, as Rayalu, is plural, used as a mark of honor.

- 9 Vira R.
- 3 Mallic A'rjuna R.
- 9 Rāma Chandra R.
- 1 Virūp-āxa R.
- 2 Narasimha R.
- 7 Narasa R.
- 3 (A regency.)
- 1 Krishna Rayalu; the second son Rayalu by a concubine. He was of literature. His *mantris* or were Sa'luva Timmaia (also called u, or Timma Ra'zu, and Appa'ji'.
- 2 Achyuta DR. (son of Narasa 10 was the son of Iswara Nayac.)
- 4 Sa'luva Timma Razu, who was er during the minority of Aliya u son of Vira Narasimha Rayalu: ied is included: *Aliya* (in Canarese) n-in-law: he having wedded the of Krishna Rayalu.
- 6 The battle of Rakkasi Tangedu, li-cota or Talli-cōṭa ('high town') nks of the Krishna. These names w exist. Colonel Mackenzie writes ta." This was the downfall of a-nagar dynasty. Sada' Siva Raya, the minister, took the government.
- 2 Periods of Revolutions.
- 4 Tirumala Rayalu the younger f Aliya Ram Rax, held the rule for ays; and then was succeeded by ri Ranga R. who was followed by er, named,
- 7 Vencati pati R., who was followed other, named,
- 2 Rama R., also called Rama DR. rom SS. 1560 until 1574 (A.D. 1638 52) there were wars with the ns.

COLLAM RAJAS.

wn Collam, in the Kérala or Mala-ountry, is called Quilon by the and the era there used is called the : Year." See p. 25 and 34. The town : called by us Cananore (Fr. Bu. 2.

557), in the kingdom of Venáta-nād', which we call Travancore. (Madras Literary So. Journal, 1844, page 73). A native record in the Malayalam language, gives the following list of kings, stating the final year of each reign. I have subjoined the A.D. The sign P. represents "Perumal, or King." The words printed in Italics are titles of the sun.

- A.D. KOLL. RAJA.
- | | | |
|------|-----|---|
| 1402 | 580 | Kérala-Kula-Sekhara-Perumal. |
| 1412 | 588 | Sékharā Kula Sekhara P. |
| 1460 | | Sancara S.V. Rama <i>Márta'nda</i> P. |
| 1509 | 685 | Ravi varma Perumal. |
| 1566 | 742 | V. <i>Udaya Márta'nda</i> P. |
| 1586 | 762 | <i>Mártanda</i> Raja. |
| 1666 | 842 | Another <i>Martanda</i> R. |
| 1676 | 852 | Attankal-múrti R. |
| 1700 | 876 | Rama Varma Kula Sekhara P. |
| 1728 | 904 | <i>Martanda</i> Varma Kula Sekhara P. |
| 1747 | 933 | Padma-nābha-dāsa (i.e., the adorer of Vishnu) Unchi Bala Rama Kula Sekhara P. |
| 1800 | 976 | Bala Rama varma Kula Sé. P. |
| 1809 | 985 | The Queen Gauri' Lacshmi' Rāja Rāni'. |

In the English Almanac printed at Travancore, in 1848, is a different list of the Rajas of that country, specifying the A.D. dates from 1335 to 1847: but up to 1758 nearly every name is a mere phrase for the Sun: the genealogist fancying that they were of the *Snrya Vamsam*, or Solar race already noticed. No authority is quoted for this list. To the above stated names are added these:

- | | | |
|------|------|--|
| 1829 | 1005 | Vanji Bala Rama Varma Kula Sekhara P. R. |
| 1847 | 1023 | The present Raja. |

Regarding Chandra-Varma, &c., see Wilson's Descriptive Catalogue, vol. 1, page 69.

Another statement runs thus:

"Raya Wadeyar was sent by the Raya of A'négondi, in A.D. 1610, to govern Chica-Raya-Patan (Chikka means the Lesser, or Junior). He became the first raja of Mysore. He died in 1618 and was succeeded by his

grandson Cha'ma Ra'ya who built a fort at Seringapatam. In 1638 he was succeeded by Immadi Raya: the next was Ra'ma Kanthi'rava Narasa R: the next, in 1660, was Dodda Deva Raya. Dodda signifies Great, senior, chief. In 1674 Chikka Deva Rai commenced his rule: and Aurungzebe conferred on him the title Ra'ja Jagad-Deva.

[In Colonel Wilks, vol. 1, p. 211, is another genealogy, stating that Chikka D.R. died on 12th December, 1704. Aurungzeb, if he conferred a title at all, would not have given a Hindu epithet.]

"In 1705 the throne was occupied by Kanthi'rava Narasa R. In 1716 Dodda Krishna Ray. In 1733 Cha'ma R. In 1736 Hyder Ali Bahadar usurped the rule."

[But it is clearly shewn in all the histories that Hyder did not assume the power before A.D. 1755.]

I copy this genealogy from Hickey's (anonymous) Indian Chronogist, printed at Calcutta in 1801 (Appendix, page 90). It is not stated where he obtained this table. I notice it as an instance of the fictitious genealogies and false dates that occur, even regarding a family in modern times. The dates given are merely those of the A.D.

ON SOME FRAUDULENT DOCUMENTS.

In a series of documents extending to a period of a thousand years, few have proved false, and these belong to the two last centuries.

In 1814 was printed, in Paris, "*Histoire de l'Inde, par M. Collin de Bar, Ancient Magistrat de la cour supérieure de Pondichéry.*" To this are subjoined "*Pièces Justificatives,*" No. I—XXVI. Several of these pretend to be treaties executed between French officers and the native powers, who bestow certain lands on the French. They are complete with seals, signatures, and dates. The first is between "The Company of France and Bayanor, prince de Bargaret."

This is no Indian name either of a person or of a place. The others are equally absurd, and the dates will not stand enquiry.

In the *Lettres Edifiantes et Curieuses*, the French History of Pondichery down to 1750 is given, and in the *Modern Universal History*, vol. ix. p. 220, that history is recorded from French documents. In these is no mention of such treaties.

In Grose's *Voyage to the East Indies*, 1772, (vol. 2, page 158) it is stated that in 1754, (the commissioners sitting at Sadras, a Dutch settlement near Carangooly) the French attempted to make terms with the English, basing their claims on these documents (Le Bar. 2. 72), but the forgery was discovered and the conference was broken off. In volumes printed by French writers of more modern days I have seen no notice of these occurrences.

Bonnechose (*History of France*, 1856) states that in 1747, La Bourdonnaye besieged and took Madras, which he restored for ten millions. This is also a fable.

Some papers printed in the *Proceedings of the Royal Asiatic Society*, by Mr. C. M. Whish, (who died in the year 1833) evince his skill in Mathematical investigation and in Sanscrit scholarship. The article *Vig Ganita*, in the *Penny Cyclopædia*, and pages 325, 326 of the same volume, having mentioned Mr. Whish's discoveries, with a surmise that they may be forgeries, I offer the following description of their origin.

I have reason to believe that Mr. Whish himself was the author. This belief is founded on information given me by Vivambhara Sastri, one of the tutors in the Madras College.

This learned bramhan had been intimately acquainted with Mr. Whish, and assured me in the year 1840, that the Sanscrit stanzas conveying mathematical rules were constructed under Mr. Whish's guidance in A.D. 1820, by Ayya Sastri, a professor of Sanscrit law, who, after being long employed in the College, became a Law Officer in the Court

of Sudr Udalut. Ayya Sastri was a free-thinker and derided all religions. From time to time, while framing these verses, he shewed them to my informant, who laughs at the credulity of the English in believing them ancient.

That the verses cited by Mr. Whish are apocryphal may easily be shewn. In the third volume of the Transactions, p. 509, we have a rule regarding the proportion that the diameter bears to the circumference of a circle. But this is quoted "from the Tantra Sangraham." Now this name denotes a "Summary of Magic." In the East India House, in the Madras College, and in Mr. Whish's own collection of books at the Royal Asiatic Society's Library, there are many books on the Tantras: but no one of them is named the Tantra Sangraham. Nor does this name occur in the Tantra Rajam, in the commentary on the Sarada Tilacam, or other similar treatises, which quote Tāntrica authorities.

Doubtless the Tantras often mention Magic numbers, but use these in a manner as devoid of sound reason as the "Babylonian numbers" alluded to by Horace.

Were a modern professor to write mathematical rules in Greek verse, and attribute them to "Enpolis Cratinus or Aristophanes," the writers of old Comedy, the fraud would not be more daring.

In the Kala Sāncalita, page 93, is a note by Mr. Hyne, who states that Mr. Whish ultimately replied that "he had reasons to believe the rules discovered to be modern: observing that not one who used the rules could demonstrate them."

Mr. Whish had a valuable collection of Sanscrit manuscripts: which was presented by his brother to the Royal Asiatic Society's Library in London. Being in the Tamil, Malayalam and Telugu character they probably will be useless in England. They should be sent to the Government Library at Madras.

Another fabrication was described to me by the same bramhan. Before the custom of burning widows was abolished, some enquiries

were made in Madras regarding passages in Sanscrit law books, which were said to condemn the practice. Ayya Sastri, being required to produce some texts, readily undertook to fabricate a few laws written in Sanscrit verse, prohibiting such murders.

He took care to quote respectable authors in proof: when these passages were forwarded to Calcutta, the forgery was easily detected; but, adds my informant, an English translation was prepared and published at Madras without any mention of the detection.

The Sthala Puranas (Sanskrit legends regarding the sanctity of the idols worshipped at various pagodas), usually pretend to be extracts from the Skanda Puran, a book of vast extent, of which no complete copy has been discovered. See Wilson's learned Preface to his version of the Vishnu Puran, page xlv. These furnish additional proof of the scorn of veracity so common among the Hindu framers of legends supporting the local superstitions.

I may adduce another forgery. In the Asiatic Journal for July 1819, (vol. viii., page 28) there are some Sanscrit lines regarding vaccination, describing the process and its effects. The writer quotes a "Sa'ctya Grandham", attributed to Dhanwantari.—Now Dhanwantari is the Indian Hippocrates: and a "Sa'ctya Grandham" "is a treatise on magic and on the worship of Demons." To attribute such a work to a physician is unreasonable.

This statement is very properly criticised in the London Christian Observer for July, 1819, page 441. The author says, "Its minuteness leads me to feel a suspicion that it is a mere forgery."

A letter written by the Abbé Dubois in the year 1805 (and printed in the Asiatic Annual Register for 1806 at the beginning of the Bengal occurrences) regarding Vaccination, is entirely silent regarding all such Sanscrit rules. Dubois was an ignorant man. The respectable chapters in his description of India are copied from Sonnerat without acknowledgement.

HISTORICAL NOTICES.

In the following statements the numeral of the A. D. is stated merely as a mark of reference to the numerical pages: regarding names quoted from Hindu or Musulman Inscriptions: and few of these are dated earlier than A.D. 1000.

In the Journal of the Asiatic Society, Calcutta, 1844, page 421, is a paper by Col. Colin Mackenzie, chiefly collected from native manuscripts, being a "View of Events in the Carnatic from the Dissolution of the Ancient Hindu Government in A. D. 1564 until the Mogul Government was established in 1687 on the conquest of the capitals Bejapoor and Golconda." Among the Mackenzie manuscripts there are several statements framed by natives, in Telugu, Canarese, Tamil or Marata, but of no great value: giving more fictions than facts regarding occurrences earlier than A. D. 1550. Colonel Briggs's "View of the Mahomedan Power," chiefly translated from Ferishta's Persian History of the Deccan, commences in A.D. 1000, and terminates in A.D. 1605, but this excellent work tells little more than the deeds of the conquerors.

In Colonel Wilks's History of Mysore he gives a chronology of the rajas and specifies the A.D. He does not give the Hindu numerals, and his dates earlier than A.D. 1650 are not always accurate.

The following statements as far as A.D. 1600 are chiefly taken from Sanscrit Inscriptions, engraven on rocks or on temples in Southern India, They were transcribed under the directions of Col. Mackenzie, whose messengers seem to have searched the country between the Krishna and Cape Comorin.

The dates A. D. here stated are given as probable: none being recorded before A.D. 1700.

A.D. INSCRIPTIONS.
Probable.

990 Banavasi, a town in the Sunda country, on the north west border of Mysore, was ruled by Tailapa D. son of VRD. son of

Kama DR. He was a subsidiary to Trailokya Malla Deva.

1002 Sat-ya's'raya A'hava Malla. Also Malli D.R.

1003 Trailokya Malla R.

1008 Tailapa Malla was succeeded by Bizzana D. These names again appear in later years.

1009 Birth of Ra'ma'nuja chari, the Reformer of the Vaishnava creed: it is also placed in 1017 A. D. which is K. 4118. SS. 939 See Fr. Buch. Ham. Mysore, vol. 3 page 470.

1009 Alaca nandana Chacravarti ruled Sri Salam.

1014 S. V. Gajapati Gaude'swara

1016 Year Nala SS. 938. is the first year of the Chalukya Era: beginning with Tailapa Bizzana D.

1027 A solar eclipse.

1028 Trailokya Malla's brother ruled Kalyanam.

1039 Twentieth year of Trailokya Malla, Emperor of the South.

1040 The Tirupati (Tripetty) temples were built.

1046 Tribhuvana Malla ruled Jayanti; his brother Trailokya Malla ruled Siddhavatam (vulgarly called Sedhout) near Kadapa.

1048 First year of Trailokya Malla "A'hava Malla," who is styled Chaluk-ya'bharanam, Satya's'raya-Tilacam. His minister was Sri-pati-Danda-Natha.

1052 Bhulôca Malla.

1053 A'hava Malla D. Trailokya Malla.

1058 Ka'kati Prôlu R. and Nandana R.

1059 This answers to year 1116 of the Vīcram a'ditya era, according to Prinsep.

1061 The celebrated theologian Sancar a'ch'ari was living.

1063 The first year of "Chalukya Chacravarti Sômësvara D. Trailokya Malla." These titles were borne by father, son, and grandson: but which is which is not clear.

1066 A solar eclipse. Also a great comet. The first year of Bhulôca Malla.

1. Bho'jā' Rajas reign is supposed by some to begin; and to last 100 years.
- 5 Tailapa R. son of Chaluk-ya R.
- 6 Sivagiri was ruled by Ten Malei Pa'n-dya Vannien,
- 3 V. Bhadra R. son of Hari Hara D MDR.
- 2 First year of Kulōttunga Chola.
Cha'lukya Nūrmidi Trailokya Malla.
- 1 Na'ra'yana A'hava Malla. From this year Orangallu (Warangole) was ruled by Prata'pa Rudra D.
Rāṇa Nissanca Malla.
- 3 Hoisana (or Oisana, or Haysana) Era-yanga D. (son of Vinay -a'ditya) ruled Haliya Belagola.
- 5 First year of Ka'la'churya Bhuja Bala Chacravarti BIZZALA D. Also Malla'-la D.
- 3 Vicrama Chōla DMR in the Konkan or Kokan.
- 1 Kulottunga Chola. See Kōkan genealogy. Na'ra'yana Chacravarti, of the Ya'dava family.
- 1 VISHNU VARDHANA, HOISALA, a Chōla King; of the Cha-luk-ya race: ruler of Raja-mahendra-varam, on the Gōda'vari, in the Ve'ngi, or Vēgi country, and of Vijaya'puram (Becjpoor, or Bis-nagar), or Vijayanagar. See Chaluk-ya genealogy in page 27. Vishnu Vardhana resided at Ya'dava-puri, now called Tonnūru. (Buch. Mysore, vol. ii, page 75). Wilson (Descr. Catal. vol. 1, page 264,) speaks of a Vishnu Vardhana the seventh of that name. I have shewn that he was the first, or only one. The Hindus never give numerals to their rajas, as 2nd, or 5th, or 7th.
- 5 Tribhuvana Malla, who is styled "Gonga," (or conqueror) of Talacca'du, and called Bhuja Bala Vira Gonga.
- 1 First year of Kulottunga Chola.
Cha'luk-ya Tribhuvana Malla, also called Trailo'kyā Malla, or monarch of three countries.
Vicrama Chola DMR.
From this time, SS. 1047, until SS.

A.D.

- 1361, the rulers were the "Reddis," or petty barons. Beginning of the reign of Chalukya Bhūlōca Malla, king of Kal-ya'nam.
- 1131 "The Kēsari family, in (Orissa) O'dhra Dēg, was dethroned by Chōra Ganga, or Sāvanga Dēva (error for Sa'ranga Dhara?) a chieftain from the Carnatic." (Metrop.*)
- 1132 "Da'malūr in the Guntoor country, was ruled by Gonk-Arasu," (or the Terrible Chief. In Kannadi, Gonku is terror, and Arasu is king). Dra'xa-ra'm, near Rajamahendry, was ruled by Velana'ti Gonkaia.
- 1133 Year 1390 of the Samvat reckoning. Ba'la Bha'scara Gajapati, son of Ganapati. The names Gajapati 'lord of elephants,' Ganapati 'ruler of the host;' and Aswa-pati, 'captain of horse,' were titles assumed by the Vaddeh rajas of the Odhra (Orissa) country, who became powerful about A.D. 1144. This answers to the 'Samvat' 1390, as stated by Dr. Mill in Prinsep's Journal, June, 1836, page 345.
- 1134 Gajapati Visvambhara D. was crowned, his minister was Gōpa Rāz Ra'manna.
- 1135 Vajaya'ditya became ra'ja, KALI year 4236.
- 1137 Jagad-eca-Malla, Gorasa R. became king of the 'Three Realms.' His capital was Kalya'nam. He ruled for fifty years. Vishnu Vardhana is now styled 'RR. Narendra,' or emperor, ruling Raja-mahendra-varam, that is, the 'city of the great king.'
- 1140 Accession of PC. Ya'dava Na'ra'yana Prauḍha Pratapa Chacravarti MDR.
- 1141 End of Kulōttunga Chola's reign.
- 1143 Vijaya A'ditya R. (See 1135.)
- 1144 A Solar eclipse.

* See Chronological Tables, by McBurney and Neil. Glasgow, 1857, forming part of the Encyclopædia Metropolitana. The notices regarding India are few, and not always correct. I cite this book as "Metrop."

A.D.

- 1145 Sāntala Dēvi, queen of Vishnu Vardhana is named as holding the Jaina religion.
- 1148 Vishnu Vardhana Ya'dava R., a chief of the Yadu race.
- 1149 Kulōttunga Chōla DR.
- 1150 First year of Nūrmidi Tailapa, who is styled "Cha'luk-ya Trailōkya Malla Tailapa." Also called Nūrmidi Tailapa R. of the Cha'lukya family.
- 1151 Gajapati DMR. Also Mura'ri Kēsava DMR. Bhuja-bala (i. e., Strong i' th' arm.) V. Na'ra'yaṇa A'hava Malla D. "Orissa was ruled by Chora Ganja who now was succeeded by Ganjēsvara D. who ruled from the Ganges to the Gōda'vari." (Metrop.) I can find no evidence for this statement.
- 1152 Cha'luk-ya Tribhuvana Malla.
- 1153 V. Vijaya DMPV.
- 1154 Mallio Arjana D. ruled Vijaya-nagaram.
- 1155 Orangallu (Warangole) was ruled by Balla'la R.
- 1156 First year of Bizzala : whose titles are "Kalachurya Nija-Bhuja-Bala Chacravarti, (i. e. the despotic emperor.) Tribhuvana Malla (i.e. lord of the three kingdoms) BIZZANA (or Bijjala) D. Also styled Trailokya Malla Nūrmidi Tailapa, Kulottunga Chōla.
- 1157 At Sri ca' oō lam (vulgarly Chicacole) Ananta Daṇḍa Pa'la was succeeded by Sanga R.
- 1158 R. Sōvi D. . . and V. Gonka DR.
- 1159 Bhuja-bala V. Nalla Siddi D. Chola M. R. was ruler of Nellu'r. He fought a battle against Malla D. Soma D., ruler of Pottapi.
- 1160 The Lingavānt creed was founded by Basava.
- 1162 Ka'kati'ya Rudra DR.
- 1162 Ka'kati'ya Chacravarti Tribhuvana Malla D. who is also styled (in the Canarese language) Kaṭṭ arasu, or Gonk Arasu, meaning "The terrible raja." It is a title like "His Excellency."

A.D.

- 1164 The celebrated theologian Ra'ma' cha'ri was living.
- 1167 Bizzala R. is succeeded by his Ka'la'churya Chac. R. Mura'ri Sōv or (Sōyi D.) who ruled the Kon De's'am.
- 1168 Death of BASAVA the founder of Jangam heresy.
- 1170 "Ka'kati-Chac. Ka'la-Mura'ri-Sōy Kakatiya Ganapati was succeeded his son, bearing the same name.
- 1171 Kulōttunga Chōla
- 1176 A'hava Malla-Ya'dava-Kalach Chacravarti-Raṇa-Niṣṣanca-Malla-Sama D. These seem to be titles of raja ; also called Na'rayaṇa Chac., w reign began in this year.
- 1177 Chaluk-ya Tribhuvana Malla : Banavasi, in the Soonda country.
- 1179 Tribhuvana Malla Bilvuri (or Bil Bizzana D. Gonka R. ruled the Vēg Vēngi country. He was the son of R. son of Erra Bhupal : son of Kṛ Varma.
- 1181 Vishnu Vardhana (Hoisala) V B la D.
- 1182 Kala'churya Chacravarti, Some D. son of Trailokya Malla.
- 1185 V. Balla'la D. Hoisala Nanga Vi D.R. ruled at Dora Samudram (often called Dwara Samudram). Bhuvan D. Malla R. (i. e. The prince of the v land).
- 1187 The fiftieth year of Jagad Eca l (i. e. 'the one ruler of the land') .
- 1188 I'swara D.
- 1191 First year of Ya'dava Narayana, l bala, Prata'pa Chacravanti Hoisal Batta'la D. Gaṇapti DMR.
- 1191 Nrisimha DR., son of Vishnu Vard
- 1195 Malla R. "servant of Telung "Mallapa D. Chōḍa R."
- 1198 Death of the poet Ticanna Sōm In another record it is placed in the year of the same name (Ka'layneṭi) years later. Gopal R. son of Tir gala R.

- 1 Singana D. began his reign. But it is in some records dated 1209.
Sada' Siva, (a Jaina by creed) ruled as minister until this time: according to the record given in Buchanan's Mysore, vol. 3., p. 216. But this is uncertain.
M. Mandal E'swara Ka'rta VD.
- 2 V. Balla'la D. Mallapa D. Chacravarti
3 Ba'çaya D. Chola MR.
- 4 Niṣṣanca PC. Hoisana SV. Balla'la D.
5 Gaṇapati DMR. This is year "Samvat" 1262.
- 6 Cadamba R. See Fr. Bu. Mysore 3. 233.
7 Hoisana V. Balla'la D. Narasimha.
Kadamba R. Chacravarti ruled Sa'vanur, and Banavasi (Buch. Mys. 3., p. 112).
- 8 Ya'dava-Na'ra'yana- P. Cha.-Tribhuvana-Malla-Singini-D. (or Simhana.) begins to reign.
- 9 Bhuja-bala V. Malla D. Bhūpa'la lived about this time.
- 10 Gaṇapati DR. (A Saiva name.)
11 Gaṇḍa Gōpāla Tiru Kālatti D Chola MR.
- 12 Yadava Nar. P. Ch.
- 13 Ra'ma Na'ra'yana D. Also V Malla D.
14 V. Ba'lla D Hoisana. (A Jaina name.)
15 Ka'damba Chacr. At this time Bengal was ruled by Kutb-uddīn, the Sultan, King of Delhi.
- 16 D.-Arasu-Nurmīli-Tailapa. But Ka'ka'tiya Prata'pa Rudra DMR. (who was of the Reddi, or farmer tribe) was the ra'ja's minister.
- 17 Siddaiia (son of DMR.) ruled Ka'nchi (Conjevaram).
- 18 Aṇṇala (or Utsula) DMR., ruled Ven-catagiri.
- 19 Simhana D.
- 20 Hoisana V. Narasimha D.
- 21 End of reign of Kākati Gaṇapati.
- 22 V. Malla D.
- 23 Tiruk-kālita D.-Chōla-MR.
- 24 Kulōttunga Rajendra Chōla.
- 25 Hoisana V., Balla'la D. And also SVP. Vicrama DMR.
- 26 Hoisala Sri' Dhara So'm'swara D.

A.D.

- [A Saiva name. Hitherto we seldom find a Vaishnava name.]
- 1237 Simhana - R.-Chaluk - ya - Nārāyan'a-Nalla-Sidda-D. ruled the Vēngi country (about Rajamahendry). Goṇḍa Gōpāla Tiruk - Kalita - D. - Chōla - MR. ruled Nellūru.
- 1240 End of the reign of Kumāra Kākatiya Rudra DMR. Simhana R. The Black Pagoda was erected to Jagannath (vulgarly Juggernaut), at Puri, in the O'dhra country; which is by the English called Orissa. The temple was finished in A.D. 1299.
- 1241 So'vi - DR. - Baiia - Chola begins his reign. Gaṇapati R. is succeeded by his son Kākati Rudra D., who ruled until A.D. 1203.
- 1242 Sri Havaṇi Wadayar was a ruler in the country now called Mysore.
- 1244 Simhana R. There are no records regarding these petty rulers.
- 1245 "Hari-Hara R." Also Sōmēśwara, son of Bukka R. Also Kumuda Hara, ruler of Bīradēra Arasu. This title Arasu is the Kannadi word for Rāja. These inscriptions are not easily legible on the rock.
- 1247 Takk-arasu Gangaiia DMR. At this time Trailo'kya Malla V. Nārāyaṇa ruled Kalyānam. This town is 35 miles (west-by-south) from Beder, in the Nizam's country.
- 1249 This is year 425 of the Kollam era.
- 1251 S. Kannara DRV. Malla D.
- 1252 Hoisala V. Balla'la D., Ka'kati Gaṇapati D. ruled Orangallu (Warangole).
- 1253 Vira Bukka R., the first "Golla" (shepherd) raja of the Kannadi country, which brahmans afterwards called Karṇaṭaca. He built Vijaya-nagaram: which the Portuguese and French called Bisnagar. It was ultimately usurped by Narasinga, by whose name foreigners called the land.
- 1255 Eclipse of the moon—noted in an inscription.

A.D.

- 1256 Kannara D. Gangaiia Sāhin'i. Here we find the first documents, very few, written in the Telugu language.
- 1257 V. Ball'la D. Gaṇ'apati R.
- 1259 Kannara D. In these dark ages no events are recorded.
- 1260 Nīla-kaṇṭha-Nāyaca . . . Also Ka'ma (or Ka'mba) DR.
- 1261 Ka'kati'ya Gaṇ'apati. Death of Gaṇḍa Penḍēra—i.e. "the illustrious"—Zānuga (or Zannuga) DMR. Bramha Ra'xasa Siddaiia D.
- 1262 Tripur-āntaca DR., son of Chola D.
- 1263 Paṇḍya De'v' a'lv' eṇdra Arasu was ruler of the Tamil lands.
- 1264 V. Balla'la D.
- 1265 MRM. Gaṇḍa Go'pa'la Tiruk Ka'llatti D. Chola MR.
- 1266 Ka'katiya Rudra D., from SS. 1190 until 1241, was raja of "E'ca Sila Nāgaram" (One-rock-town), the place marked by a lone or single rock; also called Oran-gallu, which word means "Single-stone:" now called Orangolu or Warangole by the English, and Arinkil by the French. Gaṇḍa Penḍēra (i.e. 'the hero') Mura'ri Na'ra'yana Bramha-ra'xasa (i.e. the giant) Zannaiia DMR. was raja of Kanchi (which we call Conjevaram).
- 1269 Vishnu Vardhana is placed by some in this year; but more correct statements place him ninety years earlier.
- 1270 Bramha-ra'xasa (i.e. the giant) Tripur-āntaca (a title of Siva) DMR. Also called Zannaiia DMR. First year of the Ya'dava rajas, of whom the first bears the titles—"Ya'dava-Na'ra'yana-Praudha-Prata'pa-Chacravarti-Sri Ra'ma Chandra-D." Here Chacravarti—'emperor'—is a title assumed by a petty baron.
- 1271 A solar eclipse.
- 1272 SPC. Hoisana V. Narasimha D., at Dora (not Dwara)-samudram; which is also called Hāleh-bidu (or Old Forest) Wilks, vol. 1, p. 10, calls it Dhoor Summooder.

A.D.

- 1273 V. Rama Chandra D.
- 1274 Gaṇḍa Penḍēra Amba R.
- 1275 Dēvanna Amritaiia.
- 1276 Ra'ma Chandra D.
- 1277 Ka'kati Prata'pa Rudra DMR.
Gaṇḍa Penḍēra Bramha Ra'xasa naiia DMR. This appears to be assumed by the "Redḍi Varu," barons, who ruled the Telugu coast from SS. 1047—1361; that is, 1125—1439. The title Redḍi is translated in Sanscrit. by Bhūpati—the Lord of the land; or King.
- 1278 Hoisana Narasimha D. In this the Black Pagoda at Jagannath completed.
- 1279 Ra'ja-nagar—afterwards called mahendra-varam, which the English Rajamundry—was ruled by V. MR., younger brother of Ra'ja Cho'la; whose son Ra'ja Ra'z abd in favour of V. Chola MR.
- 1280 Trailokya Malla DR.
- 1281 Pōlaya Reddi ruled Konḍavidu.
- 1282 Rama Chandra DR. of the Y race.
- 1283 Ranga RMR.
- 1284 Hoisana V. Narasimha D.
- 1286 Hari Hara R. was succeeded by Praudha R. And A'négondi was by Sōmanna.
- 1287 Hoisana ruled Gaṇḍ'icōṭa.
- 1288 V. Narasimha D. Yādava R. A ruler at this time was Nāga D. D.
- 1289 Rāma Chandra D.
Here (SS. 1211) begins the S (Chola) reckoning, called Srihi (vu Shree-hee): probably 'Srih.' It only a few years, and is now explained.
- 1290 Sri-Kākōlam (vulgarly Chic was ruled from SS. 1081—1213 1159—1291) by the Orangōlu dy from that time to 1273 [A.D. Kākatiya Pratāpa Rudra DR. Srika'kōlam. He was of the

baronial family. He ruled E'en-Nagaram [i.e. Orangolu] "One-own," which is now called "Wanti"—i.e. Singlo mount. Ferishta gs. i., 403) speaks of Rudra D., in the English version it is gly written Ludder Deo, the Raja irungole.

adana Chacravarti. Also V. Narad. RMR. "At this time the barons li-va'ra Samastha'nam) were ris-into power. A terrible famine h. 1, 301)."

d of the reign of Sri Kuma'ra-tiya-Prata'pa-Ganapati-Rudra-Deva called Kakati Rudra D., the 2nd?), ruled Sri'ca'cōlam for fifty-one

i-ud-Din [nephew of Jallāl-ud-Yrōz, emperor of Delhi] marched his army into the Decan. [See s's Ferishta, vol. 1, p. 304.]

invaded the Karnatic, and attacked -Deva at Devagiri—since called t-abad—who was not ruler of the as, as Colonel Briggs intimates, ing of the Kannadi, or Karna'tak, of the Marata country. Ala'yud-conquered Ra'jamahēndravavam^o e Gōda'vari, and Kalbarga, north-f Beejapoor.

lla'la DR.; whom Ferishta [see s, vol. 1, p. 373] calls Bilal Dew. avotu Reddi, a local baron. Also D.

A.D. SS.

1301 Mandēla - Bramha - Ra'cshasa - Ganda-Pendēra-Tripura'ri D. This was a petty lord.

1305 Hari-Hara R., of Vijaya-nagar, died; he was succeeded by his son Praudha DR.

1306 The Pathans conquered Deoghar.

1307 Ana Vēma Reddi was ruler of Kon-davīn.

1309 "Eca-sila-nagaram," or "One-rock-fort," (Orangolu) the capital of Pratapa Rudra, whom Ferishta (Briggs, vol. 1, p. 371) calls Ludder Rao, of Wurungolu, ruler of the ("Zelingani") Telugus, was conquered by the Musulmans, under Ala'-ud-Din; who extended his conquests southwards.

1312 The Musulmans, having conquered the Telugu country, laid waste the countries of Marata and Kannadi, and marched into the Tamil lands, going as far as the Calicut (Kallē-koṭa) and Collam (Quilon) provinces, on the Mo-abbar (vulgarly Malabar)^o coast. See Ferishta, in Briggs, vol. 1, p. 373-9.

1313 Chicca Vadayar (literally minor king) minister of Chola R., a ruler of Kannadi, or Maisūr (Mysore) country . . . R. Zuttu Ellanka Gonka Reddi, son of Pratāpa Rudrapa. These rajas were by caste Sudras.

1314 Pratāpa V. Bha'nu D.

1316 V. Balla'la R. This raja is styled "Ya'dava Vishnu Vardhana PCh. Hoi-sala Bhujā-bala SV. Balla'la DR."

1318 Kuma'ra Ka'katiya Prata'pa Rudra D. ruled Orangolu from SS. 1190—1242 (A.D. 1268—1320). In his days the Ramayan was translated by Bha'scara into Telugu. There were in succession

* "The Mahomedans of India, in common with the Arabs, call all the west coast of India 'Maubir,' or the Landing Place, from their making it after they leave Arabia." [Briggs, vol. 1, p. 373, note.] This name was applied to both coasts of India. And the Portuguese changed it into Malabar. [See Genesis, xxxii. 23. The place of cro-sing over.]

A.D.

- Vaḍḍeḥ Reddis (barons). 1, Pólāya (or Próli) Veṃa Reddi ruled Duggirā'la in the Palina'ḍu (Palnand) country; 2, Ana-vótu Reddi ruled thirty years; 3, his younger brother Ana Véma Reddi; 4, The Reddi of Kuma'ra giri; 5, Raṣa Veṃa Reddi; the Reddis were "Súdra Doralu," or Serf-barons in the Conda-vidu country.
- 1319 A.H. 719. The Musulmans conquered Guzerat and part of Mo-abbar. This is now called Malabar.
- 1321 Another Musulman invasion of "Tulingana," the Telugu country. Rudra D., wrongly named Ludder Deo, was besieged in Orangolu. (Briggs, 1, 403.) Sangama R. had five sons; 1, Harihara; 2, Kampa; 3, Bukka R.; 4, Mārāpa; 5, Mudgapa R. The priests and counsellors of these rajas were Mad'hava Chárya and Sayana' Charya. A Sanscrit Inscription dated Dhatu, SS. 1317, states this, and adds a list of his conquests, asserting universal dominion. The document is given in the Asiatic Researches, 1807, vol. ix., p. 405.
- 1322 Kulóttunga Chola ruled the Sri-rangam (Trichinápalí) country.*
- 1323 Hari-Hara R. ruled the Telugu country from SS. 1245—1257 (A.D. 1323—1335). His father was A'rvéti Bucca R., also called SVPDMR. of the Golla (herdsman's) caste.
- 1327 The Moghuls invaded the north-western provinces of Hindustan, and were marching to Delhi, but accepted a ransom and withdrew. [Ferishta, vol. 1, p. 225 and 413.]
- 1328 Praudha DR. is succeeded by his son Vijaya DR.
- 1331 Vidyāranya Swa'mi wrote his commentaries on the Védas.
- 1333 Trai-lókya-nátha D.
- 1334 Manu-maya D. Chóḍa MR. (more

A.D.

- correctly Shozha), son of Bramhaya To him the poet Ticcanna Soma dedicated his translation of the Ut Ra'ma'yan.
- 1336 Hari Hara R. founded Vijaya na (Bij nugger) which is also called Vid nagar, Pa'ndava Vijaya' puram, or B Patna'm.
- 1338 S. Ranga RMR. At this time P Reddi founded "Kunḍini-Patna (Condaḍidu).†
- 1340 Praudha DR. is succeeded by Vi Reddi.
- 1341 The Musulmans, under Turk generals, invaded "Dhakkan," (Ahmednagar territory.)
- 1344 Ballala D. ruled Vijayanagar. Kampena Wadayar [or Odayaru, plukings, in the Kannadi language.]
- 1346 'DRMR,' or 'SVPDMR.' Appa C the critic and Telugu Grammarian, li about this time.
- 1347 Tribhuvana Malla. This was now empty title: for the Musulmans ru the land. Daulatabad and Warang were under Ein-ul-Mulk, a servant Sultan Mohammad Toghlak, while Bi (Beeder, Bednore) and Kalbarga w under "Ala-ud-din." that is, "Niz Bhairi," governor of Sambul. He v killed in this year. See Briggs's l rishta, vol. 1, page 428—9. This v the origin of the Bahmini Sulta This title, often misprinted 'Bhami is said to be meant for "Braminica Buchanan's Mysore, vol. 3, page 115.
- 1350 V.S. A'rvéti Bukka Rayalu (the gol or herdsman) succeeded his father, Ha Hara R., at A'négondi.
- 1352 SYN-Bluja-bala-PCV - Ra'ma - Cha dra.

* In the History given in Col. Wilkes's Mysore, vol. i., page 34—64, a system of dates is used, which has not proved to be correct.

† The Chronology in the Encyclopædia Metrop litana describes several occurrences, but proof wanting. Thus, "The population of Delhi w transplanted to Dowlatabad, in the Deccan," (pa 266). This is a strange, wild story: the places a more than a thousand miles apart.

A.D.

- 353 Mummad'i Nayak Reddi.
 356 DRMR. This date is A.H., 757.
 358 Ana Vema Reddi. Anabótu Reddi.
 In his days Bommana Poetu Razu translated the Bhagavat from Sanscrit into Telugu verse.
 360 Vijayanagar (Beejnugger, Bisnagur) was ruled by SV. Bucca Reddi, who now was styled Hari Hara Prata'pa V. Gaud'eṣwara; also called Prata'pa Kapil Eṣwara. He ruled for sixty years. See A.D. 1422.
 361 Prolu, or Hastina'puram, or A'né-gonda, was ruled by Anavótu Vema (or, bótu).
 362 Anavótu was succeeded by SV. Bucca R.
 364 Vijaya nagar was ruled by Bukka Ra'ya.
 369 Anavóta Nayudu. In this year SE. 1291, the Basava Puran, in the Kannadi language, was completed. Muhammad Shah Bahmini (the First) invaded the Dakkan, and conquered Vijayanagar.
 370 Man'ava'la-maha'-Muni, the Hindu Saint, the disciple of Bha'shya ca'rlu.
 371 Kampena W. ruled Maisūr?
 372 Bukka RW. ruled Dora Samudram. His queen was Honna'Devi', or "Golden Lady."
 374 Muhammad Shah, Bahmini (the First) after ruling seventeen years, was succeeded by Múja'hid Shah. Briggs's Ferishta, 2, 328.
 376 Bukka R., also Véma R. and "Déva Nripati." These were the latest Reddis who ruled the land.
 378 Muja'hid Khan was succeeded by Da'ood Khan Bahmini; he soon was murdered, and the next ruler was Mahmood Shah Bahmini.
 381 Hari Hara R., son of Bukka R., came to the throne, and was styled Praudha DR. (*Sed qu.*) His vizeer was Bhavadu'ru Odayar. These titles denote that these rajas were worshippers of Siva, or Lingavants.

A.D.

- 1384 'Hari Hara R.,' ruler of Vijanagamar, was succeeded by his son, who reigned about fifty years; he is often styled Praudha DR., or else simply Deva Raya, or else SVPDR. His minister was Bhavaduru Wadayar.'
 1388 End of the reign of Feroze Toghluk, emperor. A statement made by him is given in Ferishta, 1, 462, which shews the cruelty of the preceding Musulman rulers. "It has been usual in former times to spill Mahomedan blood on trivial occasions, and for small crimes, to mutilate and torture men by cutting off their hands and feet, noses and ears, putting out eyes, &c., &c., by crucifixion, by flaying alive, &c., &c." All these he had abolished. We must hope that his clemency was not extended to Mahomedans alone.
 1390 'Ellanka Gonka Reddi, son of Pratápa Rudra.'
 1392 'Kátam Reddi Vema Reddi ruled Pithápuram in the Rajamahendri district. His son was Māra Reddi, and his son, Vema Reddi was ("hastacu") minister under Komara'dri Reddi of Addanki-nagar.'
 1393 Mahmood III. became emperor of India.
 1396 A famine, called Durgā Dēvi' Xa'mam, began; and lasted twelve years; it ruined the country between the Gōda'varī and the Krishna. Duff's Marata History, I., 59.
 1397 'Ganga D.' ruled Chōl'a; Also 'Vēma Reddi.'
 1398 Deva R., raja of Vijaya nagar, invaded Kulbarga? Ferishta (Briggs's translation) vol. 2, page 372, 373, gives long details regarding Deo Ray (i. e., DRMR.) who was, by guile, slain by the invaders.
 1400 'SVDR. Wadecyar' ruled Udaya'giri.
 1402 'Ganga D. Chola.'
 1404 'Ana Vēma Reddi ruled the Vēgi (or Vēngi) country, in the Rajamahendri

A.D.

- district; his son ruled Adḥanki, and his son was Malla Reddi. Vema was conquered by Feroz Shah, who married his daughter, and who besieged DRMR, in Vijaya nagar.
- 1410 'Prata'pa DR. Trailōkya R.' (Buch. Mys. 3. 165.)
- 1415 'Kāṭam Reddi. Also Praudha R. Also Rāṇa Vēma Reddi, son of Ana Vema Reddi.'
- 1416 Death of Vidya'ranya Swa'mulu.
- 1417 Hari-Hara R. is succeeded by his son 'VPDR.' Feroz Shah again attacked DRMR., but was defeated.
- 1418 Vijaya Bukka R. is succeeded by Palla Bukka R.
- 1419 DRMR. of Vijayanagar leagues with Krishna R. of Orangolu, against Ahmad Shah, who succeeded Ferozu Shah. Briggs. p. 406.
- 1420 A grievous famine in the Deccan.
- 1422 Death of Bukka R. (alias SVPMR.) who ruled Vidya'nagar for sixty years. His son Hari Hara DR. and his grandson Praudha DR. are often, like him, styled merely DR.
- 1425 Prata'pa Kuma'ra DRMR. ruled Vijayanagar.
- 1426 VR. Wadeyar.
- 1430 KRISHNA RAYALU'S reign began about this time. He was a great patron of literature. VPDR. at Vijaya'nagar. Also Timmappa Wadeyar. And DRMR. son of Vijaya RMR.
- 1432 Viswa-nātha Nayudu. Also Vema Reddi, son of Alla'dīa Bhūpa'l.
- 1434 A petty raja named Krishna R. appears to have died in "SS. 1387 Tarana," [A.D. 1461]. Several Telugu historians were mistaken in fancying this to be the more illustrious raja, the patron of celebrated poets, who ruled until A.D. 1529.
- 1435 'Mummaḍi Praudha R., ruled (SS. 1357—1402) A.D. 1435—1480. At this time Ad'ava'ni [vulg. Adhoni] was ruled by 'Ya'dava R., son of Pralaya

A.D.

- Ca've'ri R. son of Aṣṣappa R.' At this time the Musulmans invaded Dindigal. "SVPMR." ruled Penugonda.
- 1437 Upēndra D. Shozha. At this time the Musulmans did not use fire-arms. See A.D. 1510.
- 1439 End of the rule of the Reddis: who were lords of Kondavi'du.
- 1440 DRMR. Praudha DR. Narasa R. ruled Anantapuram and Kamptee.
- 1443 PDRMR. of Vijayanagar rebelled against Ala-ul-din Shāh, but after three battles, was quelled and offered tribute. Ferishta, vol. 2. p. 432.
- 1445 VPDR. son of V. Vijaya Bukka R.
- 1447 V. Narasimha Rayalu. At this time India was shared by thirteen independent Musulman princes. Ferishta, vol. 4. p. 555. In southern India the Bramhans chiefly worshipped Vishnu; some honoured Siva; some wore the lingam; there were many Jainas. Most of the Sudras and mālahs (pariares) worshipped the "Ammavāru," or rural goddesses and rustic deities, Poturazu, Anca-lamma, Maisamma, (from whom Mais-ur, or Mysore was named), Gangamma and the like; who were still adored as late as A.D. 1850.
- 1448 "Kapilēndra Gajapati."
- 1449 Immadi DR. V. Narasa Rayalu was succeeded by Krishna R.; this was not the patron of literature.
- 1450 Mallie' Arjuna R., son of DRMR., also called Mummaḍi Praudha R. ruled Vijayanagar.
- 1451 'Manga R.'
- 1452 War in the Kōkan (Concan), between two Musulman chiefs. Ferishta, vol. 2, p. 436—448.
- 1454 R. Sēkhara R.
- 1455 'Vara-Kara-Pa'ndien' apparently ruled the Sri Rangam (Trinchināpali) country.
- 1456 'First year of 'Sa'lava DR. (Buch. Mysore, vol. 3, p. 166). This was 'Sa'lava Tirumala DR., son of Gōpa

A.D.

- DMR., who ruled a part of the Chola (Shozha) country.
- 457 V. Pratapa MDR. (also called Praudha DR.) ruled Penagond'a. His son Vijaya DR. ruled Vijayanagar.
- 458 The Musulmans overran the Telugu country, but were defeated at Orangallu, the capital. [Ferishta, vol. 2, p. 529.] The title Niza'm-ul-Mulk-Bhairavi was bestowed by Emperor Humayūn on a Hindu who became a Musulman. [Fer. p. 521.]
- 459 Beginning of the reign of Rama R., who is also called DMR. This raja ruled for about seventy years. Also Vijaya Ranga Socca Linga Nayu.
- 460 S. Malli-Arjuna R. A rebellion by Musulman generals against the Emperor Humayūn, who subdues them and puts them to death by torture. [Ferishta, vol. 2, p. 462.] He dies, and is succeeded by Nizām Sha'h, against whom the rajas of Orissa and Rajamandry rebel. [p. 466.] The Gajapati rajas ruled Condapilli and the O'dhra[Orissa] country. Hiriya Bhairava D. ruled Nagar.
- 462 Sultan Mahmood, of Malwa, invades Ahmedabad and Bidar.
- 464 Death of Krishna Rayalu, a petty raja, of whom nothing is known—not the celebrated patron of literature—who died in [SS. 1451] A.D. 1529, sixty-five years later. The date is recorded in a popular verse.
- 465 A petty war was waged by Bramhi Nayudu in Palnand (Palli-na'du, in the Guntoor country). Kāṭha'ri Saluva Narasinga DMR. ruled at Vidyanagar. The Portuguese writers called him Narasinga, and fancied that this was the name of the country of which the capital was "Bisnagar," that is, Vijayanagar.
- 467 Virūpa'xa RDMR. ruled Vijayanagar. The Musulmans were spreading through many districts without regular battles.

A.D.

- 1471 Kāṭha'ri Saluva Narasinga DMR. ruled Masulipatam, Vijayanagar, &c. [Ferishta, vol. 2, p. 498.] Muhammad Shah invaded the Orissa and Rajamandri countries.
- 1474 A famine for two years in the "Talang," or Tylung, or Telung [i.e. Telugu] countries. [Ferishta, vol. 2, p. 494.] Hari Hara R.
- 1475 V. Paṇḍ'ya D. Nalāra'ma S. Ranga R.
- 1476 S. Ranga R. Narisimha DMR.
Sada' Siva's minister was Tirumalāia, of Gutti [vulgarly Ghooty]. He was the son of S. Ranga R., son of Arvāṭi Rama R., who was styled Cha'lukya Narayana.
- 1477 R. Sa'hini Na'gani Vencata-pati Nayudu. Until this time the inscriptions are in Sanscrit. A few are now written in Kannadi or Telugu.
- 1478 Virūp-a'sha R.
The "Metrop." Tables regarding India, under A.D. 1478, notice the "death of Kapila Rudra (misprinted Judra) Deva, adopted son of the Surya Vamsam, in Orissa, on the banks of the Krishna." But this river is far south of Orissa. "He was succeeded by Purushottama D." [See note in page 43]
- 1479 Muhammad Shah plundered Kanchi' (Conjevaram, as we call it) and Masulipatam, in the dominions of Narasinga R.
- 1481 Virūp-a'xa R. crushed the merciless ("Pa-lé-ga'r") barons.
Also Malli-Arjuna R. Mohummud Shah murdered his (prime minister) vizeer. Ferishta, vol. 2, p. 509.
- 1482 Siva R., of Vijayanagar, sent an army against Goa. From 1481 to 1501 Narasinga R. ruled.
- 1483 Death of Mohammad Shah Bahmini the first. His successor was second of the name.
- 1485 Praudha R. was hitherto Viceroy, and was now succeeded by V. Narasinga R. Feuds arise among the Musulman rulers.
- 1486 Kawa'm ul Mulk (senior), ruler of Rajamandri, seized Orangolu; and was

A.D.

slain in a civil war among the courtiers. Finally Nizām ul Mulk gained the mastery, and became vizier to Mahomed Shah, appointing Kowām ul Mulk (junior) ruler of the Telugu country. Then Mahmūd Shah ordered all his viziers to be slain by Dila'var Kha'n.

1487 Ra'machandra R.

1488 Virūpa'xa R. Also V. Narasanna R.

1489 V. Nanzaiia R. Wadayar.

End of the reign of Rama Raya, also titled DMR., who ruled from SS. 1381 until 1411. [A.D. 1459—1489.]

1490 Nizam ul Mulk is slain by King Mahmood, his master; to murder whom a plot was laid. Three days' massacre in Bidar-Ahmadabad. The Sultan's troops were defeated. Ferishta vol. 2, p. 543 and 586.

1491 Virūpa'xa R. is succeeded by Kaṭha'ri-Sa'luva-Immadi-Narasimha DMR.

1492 At this time no fire-arms were known in India. See Briggs's Ferishta, vol. 2, p. 533.

1493 Sa'luva Timma Raz is vanquished at Beejnuggur (Vijaya-nagar), by Yūsef Adilkhan. Ferishta, vol. 3, p. 12. Condapilli and Bezada were ruled by Mallaya M. Patrule. Muhammad Bhamini was ruler of the Deccan. See Asiatic Annual Register, vol. 1., "Miscellany," page 155.

1495 Narasa R. succeeded Sa'luva Narasinga R. Meanwhile Sultan Kullī-Kutb-ul-Mulk-Hamdani was appointed governor of (Orangala) the Telugu and Gōdavari countries. Fer., vol. 2, page 544.

1496 The Vaddich Razula (Orissa rajas, as the English write the name), or Gaṭapatis, "elephant lords," commenced their rule. The first was Vira Bhadra Gaṭapati, son of Pratapa Rudra, son of Purushottama Gaṭapati. They ruled the Kalinga and Andhra country. These are the same as the Ganapati family.

The Muslim ruler of Ahmadabad (Bidar) rebelled against the emperor

A.D.

Sicandar Lōdi. Ferishta, vol. 3, p. and 18. Civil wars between Muslims. No fire-arms.

1498 Praudha R. was succeeded by Narasimha DR. at Covilguntla, in (dapa. The Portuguese, under Vas de-Gama first landed in India, 1st May, at Ca'na'nūr, Calli'co'ta, Colli Kochi, which they call Cananore, Cut, Quilon, and Cochin, in Moab which they call Malabar.

See Briggs, vol. 3, p. 502, summary of statements made by Portuguese writers.

1499 Trinetra Katha'ri Sa'luva-Immadi-Narasimha R. Wadeyar, Trailol R. was nominal ruler of the Carn (see Bu. Ham. Mysore, vol. 3, p. 16). He ruled at Anégondi and Ha Trinetra (the three-eyed, an epithet Siva) seems to be another phrase Trailōkya, or Tribhuvana. He re until 1501.

D. Arasu (this word means ki WV. Nanja R. Also SV. Bhairava. These were petty rajas.

1500 The Sa'mūri of Kallicōta, whom Portuguese call Zamorin, defeated and deposed the raja of Kochi.

On the 17th of September, Vasco Gama cannonaded Kallicota [Calicut]. "The Indians used fire-ships."

Thus far the record has chiefly been drawn from Inscriptions, written in Sanscrit, Pali, Telugu, and Persian. We now commence the Modern History of the Peninsula, still using Hindu inscriptions and records, but adding the statements made by Portuguese, French, and English authors.

HISTORICAL RECORDS.

A.D.

- 501 End of the reign of Saluva Narasinga R., ruler of the Karnátaca.
- 502 The Sámúri R. conquered the R. of Kochi.
- 503 Immadi Kathari Narasinga R. Albuquerque arrives in India with nine ships. The Portuguese invaders erroneously called the country Narasinga.
- 505 The Portuguese invaded Ceylon. Thirteen ships arrive at Calicut from Portugal.
- 506 The Musulmans contend among themselves concerning tenets of faith. Albuquerque returns to Europe.
- 507 Mallic Arjana R., son of DMR. Portuguese ships arrive at Calicut.
- 508 Death of Saluva Narasingaia; he was a Chatriya. His minister was a brahman named Saluva Timmaia. This raja was succeeded by the celebrated PV. Krishna DR., whose minister was (Appaji) beginning on Magha Suddha 14, in the year Sucla, SS. 1431. Albuquerque was appointed Governor-General. Twelve Portuguese ships arrived.
- 509 The first Portuguese viceroy at Diu and Goa (named Fr. de Almeyda, governor of India) is ordered to resign his command to Alfonso de Albuquerque; but does not obey. Albuquerque ravages Ormuz, Socotra, and Diu. He obtains the government, and remains at Cochin.
- 10 Albuquerque unsuccessfully invades Kallicota (Calicut) and Goa. Fifteen more ships of war arrive from Lisbon. Cannon and musketry were unknown in Southern India before the arrival of the Portuguese. On the 20th of February the town of Goa was conquered; but was taken from the Portuguese in May.
- 11 Timma Raz DMR., minister of Krishna R.
- The Odhra (vulgarly Orissa) country was ruled by Púsapāti Vijaya Rama-

A.D.

- Raz. His nephew was A'nanda Raz, on whom he bestowed the title Jagapati (lord of the world), and gave the title Gajapati to Vatsavāya Rāyapa R., ruler Peddāpuram, in the Rajamandri district. Krishna Rayalu was styled "Narapati" (king of men), and he marched from Vidyānagaram (vulgarly Bijnugger) to proceed to Katakā-puri (vulgarly Juggernaut in Orissa) to vanquish the Gajapati [or lord of elephants], who ruled the Kalinga and A'ndhra countries. Stated in a Telugu manuscript.
- 1512 Sultan Kulli-Kutb-ul-Mulk, who commanded "Telingana," the Telugu country, rebels against Mahmūd Shah, emperor of Delhi, and in a battle fought at Ahmedhad-Bidar, the emperor's army was defeated. (Briggs's Ferish. 2., 549.)
- "Shah Nasr-ud-din, emperor of Delhi had sent Hamid shah to subdue the "Canara" country; ultimately he cast off his allegiance to the emperor, and made himself lord of the kingdom of DECCAN, so named from the "sundry nations" wherewith he conquered it; (Stevens 1, 164) "the word signifying this in that language." One part of Deccan was GOA (correctly Gōvah)
- The Deccan was divided into five realms:
- Mālik Ibrahim Alli A'dil Shah ruled Bijapur (Vijaya nagar).
- Ibrahim Kutb Shah ruled (Haidarābād, or Bhāga nagar) in Golkonda.
- Ali Mardān Immad Shah ruled Berār.
- Murtiza Nizām ul Mulk Shah Bhairi ruled Daulatabad and Ahmadnagar.
- Bereed Shah ruled Ahmadābād Bidar.
- These five dominions are clearly stated in the travels of Della Valle, who was in India at the time. Also by Cæsar Frederic, and by Stevens. See Asiat. Ann. Reg., 1800, and of 1804, page 28 of "Characters."
- 1513 Púsapāti Mādhava Varma had con-

A.D.

quered the (Rāyalu) *Velama* barons, but was vanquished by SVPSV. Krishna D. Rayalu in a battle fought near Bezava'd'a (vulg. Bezoara). The victor ground him in a stone mill; and slew the pregnant women of the Chitnédi Raya, at Ka'kina'da (Cocanada of the maps). Copied from Telugu manuscript histories.

Pratapa Rudra's son was Vi'ra bhadra; their mantri, or minister, was Sada' Siva.

1514 Albuquerque dies at Goa.

1515 The Portuguese *officers* first began to trade. De Souza considers this the first step to the downfall of the Portuguese power in India. A Portuguese fleet sails to attack Aden on the Arabian coast. The Portuguese at Goa engage in war against the rajá of (Beejapoor) Vijaya'puram, who retires from the Concan (or Kókan).

1516 Vijayanagar was ruled by Sada'siva. Vinuconda (Inuconda of the Maps) Kondavi'du, Bellam conda, Na'g-a'rjana Konda, Ammanabólu, Addanki, Tangēdu, Kētavaram, and Udayagiri were ruled by Prata'pa Rudra Gajapati.

1517 A Solar eclipse. Saluva Timma R. was mantri to Krishna R. The Portuguese settled at 'Paleacate' ('Pulicat,') near Madras, in the province of Coromandel, in the kingdom of Bisnagar, "(Vijayanagar)." Stevens, 1, 268—9. "Mir-Jumla" (Sayad Moh. Zulf-ukkar Khan) was nawab of Golaconda. He was the vizir of Nawa'b Abd-ul-Kutb Shah.

1518 The "Metropolitana" states that "Bijapur is invaded by Krishna Rayalu, raja of Beejanugger, with 600 elephants." But these are two names of the same town; and he already was ruler there.

1519 Battle on the banks of the Krishna. (See Briggs's *Ferish*. 3, 50—52.) Ismael Adil Shah attacked Krishna R. raja of Bij-nugur. The Hindus used musketry and cannon. The nabob was

A.D.

defeated.

1520 Saluva Narasinga Rao is succeeded by Achyuta R. and Krishna R. Bu. Mys., 3, 121. They ruled until A.D. 1563, vpd. Ramachandra D. Also Virūp-a'csa R.

1521 The Musulman invasion was repelled by Krishna DR. Stevens, vol. 1, p. 236. Bu. Mys., vol. 3, p. 171. His titles were Raja - maṇḍal - E'swara - Krishna-Dev-Arasa-Wadayar, ruler of Nagara (i.e. Bednore), Haiva, Tulava, Kokan, &c. He was the son of a concubine. His wife was Padma Dēvi, or Lady Lily. At this time, in the Tamil country, there was Maṭla-Kōna RD. Shozha MR.

The Portuguese aided the raja of Kochi (Cochin) against the raja of Kallikōta (Calicut). They again attacked Diu, the south point of Gujarat, but were defeated.

1522 The two theologians, Appaiia Dīshatlu (of Virinchipuram) and Tātāchari, lived at this time.

Kakatiya Rudra was reigning.

Vitt-arasu W. ruled Bārcūr. The raja of Bijapur recovered the territory occupied by the Portuguese near Goa.

Saint Xavier first preached at Gōva (Goa).

1524 Timmaia DR., son of Bukka R.

1525 V. Rudra Pratāpa D. ruled Kaṭagam (Cuttack). Sultan Babar became emperor of Hindustan. This was the beginning of the Mogul empire.

1527 The King of Guzerat sends a fleet of eighty vessels to attack the Portuguese, at Chaul; but the Portuguese are assisted by the King of Ahmednagar in the defence. The Guzerat fleet is destroyed, losing seventy-three vessels. The Portuguese proceed with the King of Ahmadnagar's troops, and take Nagotna, a fort belonging to Guzerat, which is given over to the Nizam-Shāhī general. The Portuguese proceed northwards, and levy contributions

..D.

on Tanna and Bassein, compelling each place to pay annual tribute to the crown of Portugal.

529 The Tannashah, or Tánēshá, or Táníshah (a title of Abdul Hash, Kutb-ul-Mulk) was Nabob of Golconda.

530 Achyuta Raya was ruler until 1575. The Emperor Babar of Delhi died, and was succeeded by Humáyūn. The Portuguese had 400 sail and 20,200 troops. (Briggs, vol. 3, p. 514.)

531 Civil wars between the Musulman rulers in the Deccan. Damaun, near Goa, was taken by the Portuguese, who destroyed Surat; but they were repulsed at Diu. Krishna R.'s ministers were Timmaia and Saluva Heriya Tirumala R.

Kandanūl (now Kurnool) was ruled by Sadāsiva. Vijayanagar was ruled by Achyuta DR.; he was a worshipper of Channa Kēsiva Perumallu, a title of Vishnu.

1534 Ferishta states (Briggs, vol. 3, p. 84) Tirumala R. invited by Ibrahim Adil Shah, persuaded him to depart, and then killed himself. He gives details. "Krishna Raya was the greatest Hindu monarch that has appeared in modern times; but is never mentioned by Ferishta. It would not become a Musulman historian to disclose the disasters of the faithful." Bu. Mys., vol. 3, p. 121.

535 Bukka R. and Timmappa DR.

536 The Portuguese having ravaged the Kochi (Cochin) Mangalore coast, the Hindu rajas formed a league against them.

537 Bengilūr (Bangalore) is founded.

538 Ceylon was partly conquered by the Portuguese; they besieged Diu in Guzerat, and took it. (Stevens, vol. 1, p. 412, 436, and 440.) Diu was besieged by Bahádar Shah, and the Portuguese defended it well. After a year's siege he retreated. Briggs, vol. 2, p. 516,

A.D

1539 Bassein was held by the Portuguese, and was besieged by Khája Jahán of Guzerat, who is repulsed.

Tannashah sent his ministers, Akkanna and Mádanna, to govern the Telugu country. They appointed Podili Lingappa to rule the districts south of the river Krishna. Akkanna's title was Surya-Pratápa-Madhava-Bhánji-Accanna-garu.

1540 Death of the celebrated raja KRISHNA RAYA.

1542 Death of Achyuta R.

1544 Sadāsiva was sent to govern Vidyanagar. Kathári Sáluva Narasinga R. governed Orangallu.

1545 The Portuguese in Diu, in Guzerat, were again besieged by Mahmood Shah of Guzerat, with an army "of whom 500 were sent from Mecca." Stevens, vol. 2, p. 98—116. The siege lasted three years, when the Portuguese were victors. (Briggs, 517.)

1547 The Portuguese ravaged the west coast of India. Second siege of Diu. The Portuguese settled at Mailápúr which they named St. Thomé, from the theologian, Thomas Aquinas. The town of Madras, called Mand-raj, or by Hindus Chenna-pattam, was afterwards built near St. Thomé.

Nandéla Timmaia was an officer under the minister Sadá Siva.

1548 The Portuguese in Goa were besieged by the Turks.

S. Ranga R. became ruler of Talacádudú, now called (S. Ranga-patnam) Seringapatam.

The Deccan was originally divided into seven realms, but now settled in five.

Ibraheem Ali A'dil Shah ruled Bijapur (Vijayanagar) and the western coast.

Kutub Shah ruled Golconda (Bháganagar) in Telingana. His successors

A.D.

were called the Kutub Shāhi Pa'd-shahs.

Imad Shah ruled Borar, the Nagpoor country.

Bhairi Nizam Shah ruled Daulatabad, and Ahmadnagar.

Amcer Biroed Shah ruled Ahmadabad Bidar, (Biddur, or Nugger, or Bidar-nagar.)

See Asiatic Ann. Reg. 1800, "Characters," page 4, and 1804 Characters, page 28. Ferishta 3, 232.

1551 Pemma-sāni Timma Nayudú built the fortress of Gan'dicót'a; and Aliya Rāma Raya was a celebrated patron of literature; the poem Vasu Charitra was dedicated to him. He was son in law to Krishna Rayalu, and now succeeded to his throne.

Up to this time the Inscriptions were chiefly in Sanscrit; a few dated later are written in Haleh Kannadi (old Canarese) or in Telugu.

1554 Kanchi (which we call Conjevaram) was ruled by Erra Rājaiia.

1556 Death of the emperor Humáyūn, the Great Mogul. Accession of Acbar (Muhommad Jalāl ud-din Akbar), on 15 Feb., 1556 (Briggs, 2, 182). In some books it is dated three or four years too early.

1557 S. Ranga DR. at Penugonda, and Timma R. at Gutti (Ghooty).

1558 Rama R. of Vijaya nagar marched to (St. Thome) Meliapur (Madras) and found it not worth plundering. Stevens, 2, 194.

1560 Hari Hara P. The land of Guzarat was ruled by Sultan Bahadar, who was a Pathān.

1561 See Ferishta 3, 241—2. The Musulmans were forced to sue for peace to Rama Raya.

A queen named Chenna Bhairava Devi ruled Haiva, Tulu, and Konkan.

The Vaḍḍe Razulu, or Karnāṭaca Prab-

A.D.

huvulu are the rajas of the Vijayanagar dynasty, of whom Krishna Rayalu, Rama Rayalu, and Tirumala Rayalu were the greatest.

1563 A.H. 1060. Fasli 966. The three Musulman princes invaded Adhwāni (vulgarly Adōni), and slew Aliya Rāma Rāya, who was seventy years of age. See Asiatic Annual Register, 1804, "Characters," page 28.

Seif Khan (Seif ein ud Din) became ruler of the Telugu country, but was expelled by Kutb Shāh. Briggs's Ferishta, vol. 3, p. 105, 235, 286, 384, and 394.

Seif Khan (page 110) was the rebellious servant of Ibrahim Ali A'dil Shah, of Beejapoor, and was slain.

Rāma Raja and his younger brother Vencatadri Nayak, rulers of Beejapur, aided Ibrahim Ali A'dil Shah (p. 105, 110, and 235). This Rama R. was Aliya Rama Reddi, son-in-law ("aliya") to Krishna Raz. From the details given in p. 121—123 and 241—244, it seems that he greatly humbled the Musulman invaders, who at last formed a league against him (p. 124 and 246) and slew him.

1564 Ferishta says that Rama Reddi's youngest brother was "Yeltumray." This is meant for Aliya Timma R., who was raja (Narapati) of A'ncōndi (vulgarly Annagoondy). The battle happened on the 26th December, 1564, on the banks of the river Krishna, at a place called Rāxasa Jangada, or Rāchasa Tangeḍu, or Talli-cōta, also called Tekkul-cōta. The town of Vijayanagar was plundered. Ferishta. vol. 3, p. 126, the details are given. See Wilks, vol. 1, p. 61. Moor's Little's Campaign, page 274. he dates it 1565. A manuscript states that this battle was fought at the Sangamam, or confluence of the rivers Siki Tangaḍi [Tumbudra] and

A.D.

the Malápahári, near A'nágondi, that is, Vijayapuram. See statement in Bernier's Voyages, and those of Cæsar Frederic.

1565 Pūsapāti Mādhava Varma was conquered by Anabōtu Nayudu, whose son Sarvajna Singama Nēyudu patronized the poet Sri Natha. Singama's brother Mādana Rao, hitherto a Jain, embraced the Vishnu religion. Poetu Razu translated the Sri Bhāgavat into Telugu.

1566 With Achyuta Rayalu terminated the power of the Rāya Samasthānam, or Carnāṭaca Dynasty, "the Waddēh Reddis" (Vaddeh Doralu) who were styled variously Gajapati, Narapati, Jagapati (i.e. Lords of Elephants, Men, and the World), and their power was seized by the Moguls, who seem to be intended by the phrase "Aswa-pati," lords of horse. There were descendants of the Carnataca Dynasty as late as 1574.

1567 The principal captains of the Muslims were Turks; and hence the name Toork in southern India is used for a Muslim. Ali Adil Shah subdued the the Soonda and north Kannadi country.

1568 The Turks took Caḍapa (miscalled Kurpah).

1569 Narasinga R. ruled Vijayagar, and now conquered Penagonda.

"In November, the Portuguese Viceroy leaves Goa with a fleet of one hundred and thirty sail, conveying three thousand Europeans, besides natives, to besiege Onore (Honnávar), which is taken. The Portuguese fleets cruise along the west ("Malabar") coast, taking all the vessels they meet, landing, and burning the towns. It is estimated that 60 vessels are destroyed, and 1000 men either killed or made prisoners." (De Faria. Briggs, 3, 520.)

1570 The Calicut coast (vulgarly Malabar, a mistake for Moabbar) was ravaged by

A.D.

the Portuguese. (Stevens, vol. 2, p. 278, 281, and 323.) Siege of Goa. The Samorin (Samudri raja, lord of the sea) resists the Portuguese. Ultimately the Portuguese come to terms with the Muslims. A solar eclipse. The celebrated poem "Vasu Charitra" was written.

"The kings of Ahmednagar, Bi'jāpur, and Calicut resolve to attack the Portuguese in all parts at once. Ali A'dil Shāh descends into the Konkan by the Poondā Ghaut, with an army of 100,000 foot, 35,000 horse, 2,140 elephants, and 350 pieces of cannon.

Stevens, 2, 283, tells the same tale. Here is evident exaggeration. Colonel Briggs, Intro. page lx., and vol 1, page lx., has a conjecture reducing each number to one-ninth part. I fancy that one-tenth may be the truth.

He marches without opposition to Goa, and invests it on three sides by land. The Portuguese have only 1,600 soldiers and thirty pieces of cannon to defend the outworks. They make several successful sallies. Suleiman agha, with 5,000 men, gains footing on the Island of Goa; he is expelled and killed. The Viceroy, Luis de Ataide, makes overtures to Noor Khan, the Beejapoor general, to assassinate Ali Adil Shah. (This is also stated by Stevens, p. 294). After a siege of ten months, Ali Adil Shah retires, having lost 12,000 men, 300 elephants, 4,000 horses, and 6,000 head of oxen. (This sum may be reduced as stated above.)

At this time the Portuguese garrison at Chowl, or Reevadunda, (near Calicut) according to Ferishta, was besieged by the Nawab, Murtiza Nizam Shah, whose army descends into the Konkan. The Portuguese estimate his army at 34,000 cavalry, 100,000 infantry, &c., and forty pieces of cannon of great size. Two hundred Portuguese desert from the fort. A general action is fought on the plain, in which the Nawab loses

A.D.

3,000 men. (Br. 3, 522).

Chale, or Chowli, was on the point of being taken by the Zamori, but in September a reinforcement arrived from Goa. Peace was concluded.

1571 The Moguls captured Cambaya.

1572 Until this year Aná Vēma Reddi was ruler of Rajamahendri, which was now taken by the Turks. Death of Abdul Nabi Khah.

1573 The Portuguese in Goa successfully resisted Idal Khan. The raja of Vijayanagar Venkatesa R. is conquered and put to death by torture by Ali Adil Shah (Ferishta, vol. 3, p. 135), who subdued the Condavid country.

1574 Penagonda still was the capital of the Karnatic, where VPS Ranga I.R. was the final nominal king of the Vaddel Reddi dynasty. See notes on A.D. 1542.

1578 End of the reign of the Karnataka Reddi; nearly all the Peninsula was now under Musulman rule. The Hindu agents of government were styled Dēsa-Pandiya (vulgarly Despondias). End of Sada Siva's power. A lunar eclipse.

1579 Kali year 4680. Hejri 987. Fashi 988. The Wadaya (Lingavant) chiefs of Mysore were becoming more powerful.

1581 Pemmasani Immaṭi Timma Nāyudu.

A Mogul force, from Surat, attacks Damann, but is repulsed. Five ships arrive from Portugal. Muradfar Shah, the ex-king of Gujarat, recovers great part of his kingdom; he besieges Baroch. A son of the Musulman prince of Goa aspires to the throne of Bejapoor, but is defeated, made prisoner, and has his eyes put out. (Br. 524)

1582 The Musulman conquerors are resisted in the Kadapa country.

1583 Sincara Narayana Swami, a celebrated saint.

1585 S. Ranga R. is succeeded by SV. Venkatesa R. at Penagonda. Death

A.D.

of Pemmasani Timma Nāyudu, who is succeeded by Pemmasani Narasimha Nāyudu.

The Portuguese join Rustam Khan from Poonda, and form alliance with the Raja of Bejapoor to attack the ruler of Sangam Eswara, whom they expel.

1586 Haidarabad (Hydrabad in the Dakkan) was founded by Sultan Moh. Kulli Kutb Shah, near two Hindu towns named Gōl-conda [Kōlu-Konda. "Great hill"] and Bhāganagar. [Ferishta, vol. 3, p. 451.] But the Hindus, down to 1850, still use the old Hindu name, which they declare was given long before this Musulman invasion.

1587 A queen named Sālavi Immaḍi Chenna Bhairava Dēvi.

1588 A.H. 997. Nek-nām Agha Moh. was appointed by the Emperor A'lamgir to rule Kadapa—which Musulmans call Kurpah.

1590 Ibrahim Kutb Shah, king of Golconda and Telingana, died and was succeeded by Muhammad Kulli Kutb Shah.

1592 Ghaṭṭ Endra W. (alias Ghanta W.)

1594 Mir-Jumla-Zulfakkār, an officer of Almagir, conquered Pemmasani Nāyudu and besieged his fortress, Gandikota, which he captured.

1595 V. Venkatesapati D. ruled Penagonda.

1597 Ceylon was partly usurped by the Portuguese.

1599 Sada Siva, who was son of Achyuta MR. Also Malik Ibrahim.

The first East India Company was chartered by Queen Elizabeth, 31st December.

1600 The Portuguese introduced tobacco from America into India.

1601 The Dutch first visit India. "They were the source of the Portuguese pride and covetousness." Stevens, 3, 94.

1602 The Dutch establish an United East India Company. Abul Fazl, the historian, was murdered by Narasinga R.

A.D.

at the instigation of Sultan Selim, who afterwards became the emperor Jahangir. V. Vencatapati R. ruled Nidigallu, Vencatagiri and Penagonda.

1605 Emperor Akbar is succeeded by Jehangeer.

1606 Sri Salam, also called Parvatam, or Sri-Giri, the "holy mountain," in the Kandanul (vul. Curnool) country, was ruled by Gobburi Giriappa.

1607 Insurrection by the Moguls in Hyderabad. (Ferishta 3, 476.) The Reddy-wars in Rajamandry and Ellore were rebellious. (*Ib.*) p. 466—468.

The Reddi-varu were petty barons; the Manneh-varu were highland chiefs; the Nayac-vadi is the posse comitatus. Briggs, 3, 466, says these are local militia. These now began to rebel against the Musulman invaders.

1608 Duhur, near Kadapa, was seized by the "Turks."

1609 Emperor Shah Selim, "the great Mogul," sent an army to invade Southern India; he was opposed by the three Musulman Nawabs. See Kerr's Collection of Voyages viii. 273. Also the journal by Floris, in Purchas's Pilgrims, and in Astley's Voyages, vol. 1, p. 422, 437, 442. The voyage written by Floris states that in 1611, "Cotobara, king of Badaya, or Lollongana, died at Masulipatam." This probably means Vencatapati R. Badaya is meant for Badaga, the Tamil word for "North," which several old writers fancied was the name of the Telugu country. Lollongana is a misprint (which I verified in the black letter edition of Purchas, folio) for Telingana, the Musulman pronunciation for Telugu-desam.

1610 Gandikota was commanded by Jillella Rangapati, an officer under Abdul Moh. Khan. Gladwin's Jahangir, p. 101.

1611 Death of Mohammad Kulli Kutb Shah, king of Golconda and Telingana, (the Musulman phrase for the Telugu country).

A.D.

1612 The English traders first landed at Surat, being granted permission by the Emperor of Delhi, Jehangir, son of Acbar. Briggs, iv., 540.

1613 SV. Vencatapati ruled Dūpād (in the Kadapa country) and Penagonda Sultan ul Kutb Shah.

1614 Immadi Krishna RW. became king of Mysore. Immadi means The Second. The miserable condition of India at this time is stated in Kerr's Voyages, ix., 320—321, and in viii., 58, stories regarding Vencatadri R., who died at this time. Stevens 3, 211, says "The Blacks besieged the city of St. Thomas," that is, the Hindu rajas attacked Madras, and it seems that the Portuguese also besieged the fort, which was surrendered for want of water. A peace was then concluded between the Portuguese and the Musulmans (under Jehangir) by the intervention of Xavier, the Jesuit, stipulating that Jehangir should have no intercourse with the English or with the Dutch. (Stevens 3. 221.)

1615 Sir Thomas Roe reaches Agra as an ambassador from king James I., of England.

1619 Rag-hu-Natha-Nayac, king of Tanjore bestowed Toranga-puri ("Tranquebar") on the Danes. Bartolmeo, p. 48.

1620 Nan-lela Narasimha R. sent Pemmasani Timma Nayudu to command Gandikota under the orders of Penugonda Vencatapati R.

1622 Tirumala Nayak begins his reign of twenty years at Madura. The Portuguese were expelled from Hormuz, or Ormus. Massacre of the English by the Dutch, at Amboyna.

1623 After the downfall of Vidyanagar (Bisnagar), Vencatapa Nayak and other Nayudus seized the realm. "They gave the Portuguese a notable defeat." The Portuguese then sent an embassy to him from the King of Portugal.

A.D.

"Coromandel" is first named under this date in the Dutch accounts of India.

Coromandel was the Dutch spelling of Kuru-manil, that is, "Blacksand," a fishing village a little north of Madras. Among Europeans the entire coast has acquired this name, which also has been changed by pedantry into Kuru-mandalam (land of the Kurus; which it never was). The name Coromandel as denoting a region is wholly unknown to the natives.

1624 SVPSV. Rama Deva MR. ruled Penagonda.

The French writers allege that in this year "Rama Raja of 'Gengie' (Gingee, correctly Zangzi) ceded Pondicéri (correctly Pudichéri, which signifies 'New Tank') to François Martin." (See Collin de Bar, t. 2, p. 6.) Bartolomeo, p. 9, gives the date 15th of July, 1630. This is alleged to be a donation by the Marata princes Rama raja son of Sivaji. But at this period Sivajee was an infant one year old. See Wilks, vol. 1, p. 84.

1625 The Danes purchased Tranquebar (i.e. Tiru-Rangam-bari) from the Raja.

The Portuguese ceded Bombay (Mumbái) to England as part of the dowry of Henrietta wife of Charles the First of England. This event is passed over without notice by Faria de Sousa, whose History is translated by Stevens.

1626 The English first began to trade at Pallighat, now called Pulicat.

1628 Death of the Emperor Jehangír. He is succeeded by Shah Jehán. Kollam year 804. Rama R., or Rama DR.

1630 "Pudicéri [Pondichery] was given up to the French on the 15th of July, 1630, by Rama Rája, a son of Siváji, king of the Maratas." [Bartolomeo, p. 9.] But in 1630 Sivaji was only four years old.

1631 The Portuguese attempted to build a fort at Cambolin, forty leagues from Goa; but were prevented by v. Bhadra Nayak. [Stevens, vol. 3, p. 377.] The Portuguese trade was ruined by their

A.D.

own pride and covetousness. [ib. 38] Vijayanagar was besieged by the Muzumans [ib. 395]; and the Portuguese besieged Mumbáça [Bombay], and again lost it. In this year the Portuguese again conquered Ceylon [ib. 389], and again lost it. SS. 1. C'ollam 808. Vicramaditya 1689.

1633 Kempana W. in the Bangalor court. While v. Vencatapati RDMR. still ruled Penagonda.

1634 The English traders were first permitted to enter the Ganges, or Hooghly.

1636 The raja of Vijayapur invaded Carnatic (Payenghat) lowlands.

1637 Keladi v. Bhadrappa Nayakar.

1638 Aurungzebe was sent to rule Deccan. He became emperor in 1657. Shah Jehan invaded and ravaged Telugu country. [Dow., vol. 3, p. 170.]

"Sada Siva R. of Tanjaur best known upon the French the seaport of Karikal, which they call Carical." Bartolomeo, p. 48—9.] Query: Sada Siva still alive; and was not in another part of the country? never ruled Karikal.

Kanthirava Narasa W. was ruler of Maisûr [vulgarly Mysore]. His name "Kanthirava," means a lion, and a gold coin issued by him, "Kanthiravonnu," is vulgarly miscalled a Caricoy fanam.

"Rana-dulha Khan established rule at Bangalore," says Mackenzie; more probably it was in 1654—5.

1639 The village of Madras was founded as Mackenzie conjectures.

1640 The English first obtained, from the raja of Vijayanagar, a spot of ground on which Mr. Francis Day began to build a fort, at Chenna-patnam, near Madras; and thus Madras was founded. The native name still (1850) is Chenna-patam, or Putnum. The Muslims call it Mundrâj.

- A.D.
- 1641 Narasa RW. ruled Maisür (Mysore).
- 1644 Pemmasáni Timma Nayudu ruled Gandicoṭa, succeeding Timma R., who had ruled for thirty-three years.
- 1645 The Musulmans again took possession of Kadapa.
- 1646 Establishment of the Marata dominion in Deccan. The Condavidu, or Guntoor, country was reconquered by the Golconda Nabob.
- 647 S. Ranga R. was dethroned [probably raja of Chandragiri]. R. Vizaia-Ranga-Socca-Natha-Nayudu, of "Trisiram" (Trichinopoly), was succeeded by Bangáru Tirumala Nayudu. At Maisur was Chikka DRW.
- 648 Ballári, or Bellary, was ruled by Handeh Malacapa Nayudu.
- 649 SV. Ranga R. ruled Penagonda.
- 1650 The whole of the Karnátac (Carnatic) was now under Musulman rule. "Bálaghat" signifies highlands, and "Payen-ghat" is lowlands; lands under the mountain-passes.
- 1652 Daood Khan was sent from Delhi as governor of the Karnatac. See 1662.
- The English traders commenced at Bombay.
- 1653 Fort St. George, at Madras, becomes a Presidency, with two factors and ten soldiers.
- 1654 Rana-dulha-Khan. See Wilks, vol. 1, p. 51—55.
- 1655 Calicut (Kalicōṭa) was taken from the Portuguese by the Dutch. (Hickey.) Keladi Sōma Sekhara Náyac.
- 1656 The Dutch took Columbo, in Ceylon, from the Portuguese. Sultan Moh. Ali Padshah.
- 1657 First year of the Emperor Aurungzeb-A'lamgir-Mohi-ud-din. More correctly it began in 1659. He reigned until A.D. 1707. S. Ranga DMR.
- 1658 The Dutch took the whole of Ceylon, and took Negapatam from the Portuguese.
- 1659 Aurungzebe conquered Agra; and

- A.D.
- his reign dated from this year, A.H. 1069.
- 1660 The Dutch took Collam (Quilon) and Cananore from the Portuguese (Dodsley, 355), and also Cochin, Poraca, and Cranganor.
- 1662 Khoja Da-ood Khan was sent from Delhi by the Emperor Aurungzebe A'lamgir to rule the south. He appointed Abdul Nabi Khan to govern Kadapa.
- The Portuguese ceded [Mumbai] Bombay to the English, as part of the dowry of Catherine of Braganza, on her marriage, on the 21st of May, with Charles II. He afterwards granted it to the East India Company. But the English did not gain possession until 1664.
- DRW. ruled Mysore; and at this time Keladi Soma Sekhara Nayac was in power.
- 1663 S. Ranga R., the final raja of the Vijanagar dynasty.
- 1664 The French East India Company was established. Chikka DRW. Rebellion in Vijayapuram against the Musulman rule. Sivaji, the Marata chief, plundered Surat and Kurnool. [See Ovington, p. 187.]
- Abu Hasan 'Kutb-ul-Mulk,' who is named Tannáshah [perhaps named from Tanna, near Bombay,] ruled Golconda. His ministers were Accanna and Ma'danna. See Foriahta; also the Seir ul Mutakh. III., 399, 402, and 451.
- 1666 Biddar-oor [vulgarly Beder, or Beder] was the capital of Telingana, as the Musulmans call it; says Thevenot.
- 1668 The Portuguese power was now extinct in India.
- 1669 Kollam year 844. Kula Sekhara Perumállu. MLSJ. vii., 333. The first French ships (see Collin de Bar, vol. 2, p. 6) were sent to India. The fortress of Zangi, or Gingee, was conquered by Sivaji. Wilks, vol. 1, p. 164.

A.D.

1671 Mir Sayad Husen, who is styled Ne'k Na'm Kha'n. At this time Sivaji, the Marata chief, invaded Tanja'war (Tanjore).

1672 A great battle in Tanji-oor (Tanjore).

1673 Banavasi in Soonda was ruled by Sôdê-Sava'ji-Rama-Chandra-Nayac.

"Being besieged by the Dutch at [Mailapur, near Madras] St. Thomé, the French obtained from Churkam Loudi [Shêr Kha'n Lodi?] the ground on which they built Pudichery (Pondichery), which was governed by Mons. Martin, he having lent money to this nabob." Dodsley, p. 81. Collin de Bar, t. 2, p. 6, who does not give the name of the nabob. This is all a fable.

1674 After the surrender of Mailapur [Meliapore or St. Thomé,] near Madras, Le Sieur Martin, the governor, retired to Pondichery: and as the Dutch cut off all trade, he lent part of his funds, at interest, [18 per cent] to the lord Chirkam Loudi [Shêr Kha'n, Lôdi] governor of that country, under the king of Visapur [Vijayanagar] the declared friend of the French nation. Shêr Kha'n sent 300 infantry to support Martin at Pudichery: which the Musulmans call Phôôl-chêry, and this some have spelt Pullicherry; where they fortified a house. In 1677 the trade in cotton goods had vastly increased. Shêr Khan was at war with a ruler, [unnamed] whose troops were garrisoned in the fortress of Zanzi [which we call Gingee]. This place was attacked by Sivaji the Marata chieftain, and surrendered, in lieu of other lands promised in the kingdom of Golconda. Sivaji then marched to Vêlûr [Vellore] which he besieged, and then sent a force against Shir Khan: who retreated, and at last submitted. Le Sieur Martin then sent away the property of the French company by sea to Madras. Then he sent messengers to pacify Sivaji: and at last Sivaji granted

A.D.

him a [cowle] permission to remain, on condition of standing neuter in all his wars. See 1679. [Dodsley]

1675 E'côji R. the Marata, became raja of Tanjore. Penagonda was ruled by Vencatapati Nayac.

1677 Vencata DMR. ruled Trichirapalli (Trichinopoly). Birth of Takkôji R., son of the raja of Tanjore.

1679 See 1674. [Dodsley, p. 86 continued]. Chirkam Loudi being rebellious, troops were sent by the Nawab of Vijapur to subdue him. M. Martin pressed him for payment of 69,741 rials, [about 8,000 pounds]. Shir Khan therefore ceded to the French, till payment, the revenue of the lands in the district of Pondichery. See 1689.

1681 Death of Siva'ji, founder of the Marata power. He was succeeded by his son Shambhôji.

1682 A'ne'gonði [Bijpoor, Vijayanagar] was conquered by Alamgi'r. The English government of Madras prohibited slavery. See proclamation dated 13th Nov., 1682, in Journ: As: Society of Bengal, 1844, page 609.

1686 A famine. The coin called Arcot Rupee was struck by the English for the Nabob.

1689 The French (Mons. Martin) prevailed on the Marata general Sôma'ji Raya, and, with difficulty, obtained permission to fortify himself in Pondichery. The Great Sivaji's son, Shambhoji, (in the French the names are confounded) was caught in an ambush by the Moguls.

War having arisen between France and Holland, the Dutch intrigued to obtain possession of Pondichery, which was now armed with six pieces of cannon.

1690 Mons. Martin prepared for a siege, sending all idlers out of town to the Portuguese at (Madras) St. Thomé.

Aurungzebe took Haidarabad (Ferishta 2, 73), conquering Abul Hasan Tannâ

A.D.

Shah (vulg. the Tanisha), who had ruled from A.D. 1666 to 1690. Aurungzebe also seized on the English factories at Surat, Masulipatam, and Vizagapatam.

391 Mubárik Khan, Subedár of the Decan, governed the Kondavíd (Guntoor.)

392 The English factors purchased Gúdalúr (Cuddalore) from Rama R.

393 The Dutch made an attack on Pondichery by sea and by land. M. Martin capitulated on the 6th Sept. The Dutch had paid fifty thousand pagodas for this place to the prince of the country [he having first sold it to the French]. Collin de Bar, 2, 7; Dodsley, 90.

At Masulipatam were built two squares, called English town (Péta) and French (Péta) town.

A charter was granted in London to the new English East India Company. Established in 1698. Keladi Basavapa Nayak.

395 Zangí (vulgarly Gingee) was taken from the Maratas by the Moguls. Mackenzie places this in 1700. (See *Prinsep's Journal*, No. 152, p. 593.) "After it was captured the French declined paying revenue to the Maratas." Bartolomeo, who dates it 1695.

396 Maṭla Kumára Yácam Nayudu. The records of inscriptions regarding the Maṭla family are numerous, but of small importance. The dates are generally doubtful.

397 Zulfukka'r Khan, "Nasrat Jung," was sent by Aurungzebe Alamgír to rule Gaṇḍicôta. Daood Khan was slain. He had ruled Kadapa from A.D. 1661.

Keladi Basawapa Na'yak.

399 The Dutch restored Pondichery to the French, who fortified it. (Collin de Bar, t. 2, p. 7 and 8.) Captain Kidd, a pirate, plundered the Portuguese on the west coast of India.

400 Chikka DR. assumed the title Jagad-êca-roya, or "Emperor." He was a petty raja. The rivalry between the

A.D.

old and new English East India Companies ruined all trade. The native rulers took bribes from all parties. In 1702 they came to a reconciliation. (Hickey.) See 1709. The Christians in Madura were persecuted by Hindu rajas. Sada'siva R., the second or third. Zangí (Gingee) was conquered after a ten years' siege, by the Moguls. Kûmara Ananta-Rama-RD-Chola-MR.

1704 The wall round the town of Madras was built by Mr. Thomas Pitt, governor. From him the Pitt diamond was named.

1705 Kanthirava Narasa RW.

1706 The Christians in Tanjore were persecuted by Musulmans. See "*Lettres Edifiantes*;" letter of the 10th of January, 1709.

1707 The Emperor Aurungzebe died the 21st of February; the 10th day of Bakreed, A.H. 1118. Civil wars. He was succeeded by his son Moh. Mauzem, Kutb-ud-Din, Shah Alam Baha'dar Shah. (Fraser; Holwell; in Hickey.)

1708 The new East India Company was established; they lending £1,200,000 to Queen Anne's government.

1709 Madras was now visited by a severe famine. (Ziegenbalg.)

1710 Saadat Ali Khan, of Arcot, became governor of the Carnatic. Asaf Jah, Nizam ul Mulk, ruled Golconda. Abdul Nabi Khan Maya'na ruled Gaṇḍicôta. He sent Fateh Sing to rule Siddhavaṭam (Sidhout). Cha'ma RW. ruled Mysore.

1712 Death of the new Emperor Bahādar Shēh. He was succeeded by Aazim Shāh.

1713 Ferokhsar became emperor. Vijayanagar was ruled by A'nanda Rao.

1714 Hamilton [*Voyages in Pinkerton*, vii., 376] says, "The English incited the Samorin to make war against the raja of Kochin for a worthless bit of land. The King of Kochin made over his claim to the Dutch."

A.D.

The peace of Radstadt, between England and Holland.

1716 The Maratas now ruled the Deccan, levying the Chout, or tribute. Seyr-Mutakkerin, t. 1, p. 119.

1717 This year, SS. 1639, "Hevilambi," is written "sixteen hundred and thirty-five" in words as well as numerals.

Battle at Siddha-vatam (vulgarly Sedhout) between Mayána-Abdul-Nabi-Khan and Fatih-Sing, servant of Saâdat-Ulla-Khán, of Arcot. The son of Abdul-Nabi was Abdul-Hamid-Khan, who is also called Hammu-Miyán, *alias* Bara-Miyán. He ruled Siddhavatam from this year until SS. 1666 (A.D. 1744).

1718 Abdul Husén Khán. Also lived Khôja Ahmad.

1719 A.H. 1131. Ferokhsir was dethroned, and Mohammad Shah became emperor, Great Mogul. The second French East India Company began. It lasted until A.D. 1750.

1721 Maṭṭa Kumára Ananta R. ruled Penagonda.

1722 A French corps was at Répalleh, in Guntoor, commanded by M. Quelasqui, or some such name. [Telugu records.]

1724 The battle of Sakkar Khëra, on the 2nd of October, ended the rule of the house of Taimúr. And Asif Jah now became Nizam-ul-Mulk. Br. Seir., p. 338; he omits the name of the village.

In James Grant's British India Analyzed, he names the village; he adds, "Thus ended the rule of the house of Taimúr."

1725 The French captured Mahi by assault. It is a port a few miles south of Tellichery in Malayala.

The French writers assert that in 1720—26 they obtained various grants of land from a certain "Bayanagor, King of Bargaret," which were executed at Pondichery. These are mere fables; the documents printed by Colin de Bar, tom. 1, p. 307—311, are weak fabrica-

A.D.

tions. In the Universal History, vol. 9, p. 220, the history of Pondichery is given from French documents; and no such grants or treaties are mentioned; nor in Dodsley; nor in Henault's Chronology. On such forgeries, see Wilks's Mysore, vol. 2, p. 55.

1726 The Court of Mayor and Aldermen was established at Madras.

1730 Abdul Nabi Khán of Kadapa. His son Nawab Hamid Khan was succeeded by his brother Abdul Mosim Khán—*alias* Môchá Miyán.

1731 This is the Kollam year 907. See Bu. Mysore, vol. 2, p. 557.

1733 Bangáru Tirumala Náyuḍu.

1735 Nádir Shah usurped the crown of the Great Mogul.

The Nawab of Arcot, Dost Ali Khan, ordered the French to coin money at Pondichery with the stamp of the Mogul Emperor. Some modern French authors have erroneously stated that the coin was French.

1735—37 A terrible famine in southern India, in Tanjore, Kadapa, &c. Lettres Edifiantes, edit. 1840, t. 1, p. 628 and 669. Or, in edit. 1810, t. 14, p. 147.

1736—7 Trichinapali was besieged and taken by Safdar Ali Khan, who appointed his brother-in-law, Chanda Saib, governor.

1739 The Maratas plundered the Carnatic, and (1740) the Cadapa country.

1740 On the 22nd of May, about four leagues west of Pondichery, Dost Ali Khan was slain in a battle against the Maratas, led by Murari Rao, son of Hindu Rao, who levied an impost of one hundred lacks of rupees. Lettres Edifiantes, p. 698—700. The cholera appeared at Murshidabad in Bengal. Seir, t. 1, p. 477.

1741 Mons. Dupleix became governor of Pondichery.

1742 The English took Trichinapali, and then lost it again to Nizam ul Mulk.

A.D.

1743 The Musulman captains contend with each other for the rule of Arcot. The Marattas over-ran Orissa, and were rulers of Jagannath (vulgarly Juggernaut) until 1755.

1744 War commences between the French and the English.

1746 Madras was surrendered to the French on the 21st of September.

1747 Death of the Great Mogul, Thámas Kouli Khan Nadir Sháh, Emperor of India. The Maratas, who held Orissa, were expelled by the Musulman forces. *Seir-ul-Mu.*, vol. 1, p. 536.

Hyder's first victory at Bálápör.

Death of Abdul Nabi Khan Mayana. He ruled Kadapa eleven years. He was succeeded by Abdul Moh. Khan, who, being short-sighted, is known as the ("Guḍḍi") Blind Nabob.

Famine at Pondichery. *Lettres Edifiantes*, p. 687.

First year of Ahmad Shah Abdalli, Emperor of Delhi.

1748 The Musulman dominion was broken up by wars between the different nabobs.

July 29th. The English fleet attacked Dupleix at Pondichery; but raised the siege on the 30th of September. Madras was restored to the English.

This was the beginning of the English power in India.

The treaty of peace dated at Aix-la-Chapelle, was dated the 18th October (old style, 7th October), 1748.

1750 A battle was fought at A'múr, or Am-moor, or Anbúr-ghar, or A'búr-gad'a, which the French call Ambour; it is on the river Palar, a little west of Vellore. It was fought by Chunda Saib and Mozuffer-Jung, aided by six hundred French and a train of artillery, against Anwar-ud-din Khan, Nawab of Arcot. A Persian record gives the date Tuesday, the 14th of Mohurram, A.H. 1164 Ac-

A.D.

ording to Warren's Tables (Appendix, p. 47) this is the 3rd December, 1750 (13th December, according to Von Gumpach's Tables). But Hickey dates it the 23rd July, 1749—quoting Owen Cambridge; but that author prints Lawrence's statement, which says nothing of the battle.

Nasir Jung was slain on the 5th of December. (Hickey.)

1751 Battle of Lakri-palli, on the 2nd of February, near Kandanúl, where Muzaffir Jang, aided by the French, vanquished Himmat Khan and other Pathan chiefs. (*Asiatic Ann. Reg.*, 1800, "Characters," p. 17.)

1752 Birth of Tippoo Sultan, son of Hyder. "Sultan" is not a title, but the proper name. He was so called after a saint named Tippoo Sultan. Fakeers are often styled *sultan* or *shah*.

The Marata force, commanded by Murari Rao, joined the English. *Grose*, vol. 2, p. 99.

1753 Hyder besieged Major Lawrence, in Trichinopoly. Abdul Hamid Khan's son, Majid Khan, ruled Kadapa (vulgarly Kurpah).

Mons. Bussy was appointed (by the Diwán) "Shahnewáz Khan," and appointed governor of the four ("Circars") districts—E'lúr (Uppoo Elloor) Guntoor (called Mustufá-nagar), Rajahmandri, and Chicacole; besides Masulipattam and Condavídū.

The French were now masters of the sea coast of Coromandel and Orissa in an uninterrupted line of six hundred miles, from Mootapilly (south of Nizampatam) to the Pagoda at Jagannath (Juggernaut). The revenues of these produced, in 1753, 4,287,000 rupees—equal to 535,000 pounds sterling.

The French hold the port of Myhie, or Maihi, near Calicut, and miscall it Mahé, it having been taken by François Mahé de Labourdonnais. Mr.

A.D.

Mill commits this error uniformly. See Nolan, vol. 2, p. 187.

Mons. Dupleix proclaimed Rāja (Reza?) Sahib, son of Chanda Saib (the French Nabob) to be nabob of Arcot. Dupleix considered himself sovereign. Grose, vol. 2, p. 117.

1754 Death of Himmat Bahādar. On the 17th of August Hyder attacked the English troops, near "French Rocks" (that is, Hārōd'u, or Erroure). Hickey, p. 38.

1755 Masulipatam and Ganjam (miscalled the Northern Circars) were governed by the French. Until this time Orissa was held by the Maratas. In Bengal the English possessed only a spot of land three miles and a half long and one mile broad, at Calcutta.

1756 The Danes founded 'Frederick-nagar,' at Serampore, on the Hōogli. Hyder conquered Seringapatam. Admiral Watson and the Maratas attacked Angria, the pirate, at Gheriah, and ruined him. It was given up to the Maratas, who, in exchange, gave Bankótu, now (1756) called Fort Victoria, a few miles south of Bombay.

On the 20th of June Suraja Daula captured Calcutta (Kālī-Ghāt; he changed the name to Ali-nagar), and imprisoned 146 English in the Black Hole, where 123 died.

The Danes, at Tranquebar, attacked the raja of Tanjore, but desisted.

1757 On the 2nd of January, Clive, Coote, and Watson recovered Calcutta. The Sepoys, called Tylangs, Toilungs, or Telingas (errors for Telugu men), were long employed in the Musulman armies; and were brought to Calcutta by Col. Clive; who defeats Suraja Daula, at (Palás'i) Plassey, on June 23rd (sometimes wrongly dated 20th). Fort William was built at Calcutta. The Musulman chiefs of Kadapa were beaten by Bala-vant Rao, the Marata.

A.D.

The town of Chandernagore, on the Hoogly, was taken on the 23rd March, by the English, from the French, whose power and commerce in Bengal now ended. The fort, "Fort Orleans," at that town was destroyed.

On the 26th of June, Vizagapatam surrendered to the French. [Hickey.]

August 19th. The English established a mint at Calcutta; and the first rupee was struck.

1758 The Maratas conquered Delhi, Lahore, Mooltan, and Attok.

The English coined money at Madras for the Nabob of Arcot. These were called Arcot rupees, and dated A.H. 1172 [that is, A.D. 1758]. The dies so dated remained unaltered for fifty years.

The French, under Lally, attacked Tanjore and Madras. On the 6th of March they raised the siege of Madras.

Surat was rescued by the English. The Dutch were defeated in Bengal.

The French took Arcot.

1759 Madras, commanded by Governor Pig-gott, was besieged by Lally, who retreated on the 17th Feb. The English took Arcot, on Feb. 10th, Masulipatam, April 7th, and took the castle of Surat. Conjevaram [correctly Kanchi, often misprinted Coryeveram] taken by storm, April 13.

The French squadron on the Coromandel Coast was defeated by Admiral Pocock, near Pondicheri, 10th Sept. Pondicheri was desolated by famine.

Surat was rescued by the English, and confirmed to them by the emperor of Delhi.

Battle of Bederra, Nov. 25. The English, under Colonel Ford, defeated the Dutch, whose council at Chinsura were compelled to disavow the hostile acts of their fleet.

1760 Battle at Wandewash (correctly Vandé-vási, west of Sadras) on Jan. 22, (in some books wrongly dated 1759)

A.D.

when Colonel Coote defeated the French army under Bussy and Lally.

Bangalore (correctly Bengilûr) was besieged by the Marata army under Gopal Hari; he was conquered by HYDER ALI, who took the title of "Bahadar" (or Valiant), and usurped the kingdom of Mysore. In the Marata annals this is dated two years earlier.

The Affghans again drove the Maratas out of Delhi.

Colonel Clive returns to England and is created Lord Clive, baron of Plassey.

Almagir the second, emperor of Delhi [the great Mogul] was murdered, whereupon Ali Gauhar (Jauhar?) the second son of the emperor, was raised to the throne by the title "Shah-A'lam," (lord of the world).

1761 Hyder vanquished Khandeh Rao, and treated him cruelly, as a traitor.

The English defeated the Mogul Emperor Shâh A'lam, 15th Jan. The Emperor surrendered himself to Major Carnac. Mons. Law and the French party were taken prisoners. (Hickey, p. 44.)

The battle of Pâni'pat; 150,000 Musulmans "Abdali" defeated 200,000 Maratas. A Marata document dates this event in "Iswara," which is four years earlier. This was the downfall of the Marata power.

The Dutch were very cruel in Ceylon; the natives flew to arms; and cut down nearly all the cinnamon trees. (Hickey.)

The Musulman chiefs in the Deccan deposed Salabat Jang, and raised Nizam Ali to the throne. (Hickey.) But the French supported Salabat Jang, and refused to acknowledge Nizam Ali. (Grose, 2, p. 132.)

Pondicheri was surrendered by Lally to the English under Coote, 16th Jan.

1762 Murari Rao 'Ghôrparé' (a Marata general, son of Hindu Raya) conquered

A.D.

Vencatadri Rao, ruler of Gutti (Ghooty.)

1763 Until this time Masulipatam and Guntoor, the "Northern Circâr," were under the power of the French.

The name 'Circar' is meant for Sarcar, and means a District. The phrase 'Northern Circars' ought to be laid aside; it is a mere French expression.

The Peace of Fontainbleau was concluded at Paris between the French and English.

1764 Hyder Ali was now, by usurpation, the ruler of Mysore, Bednore, Soonda, Malabar, the Bara-mahal, and the Karnatic.

The battle of Buxar, 23 Oct., Colonel Hector Munro defeated Sujah ud Dowla, Nawab of Oude. Thus ended the Mahomedan dominion in Bengal.

1765 Condapilla, near the river Krishna, (vulgarly Kistnah) was taken by the English.

1766 Nizam Ali Khan leagued with Hyder, but also gave the English a Sanad (Sunud) or grant of "the Five Circars," viz., Rajahmandri (Uppu-)Elore, Mustafanagar (alias Guntoor), Chicacole, and Murtiza nagar (alias Guntoor). It is printed in Hickey, p. 30.

The English took Rajamandri.

1767 League between the English and the nabob of Arcot. (As. Ann. Reg., x., 54.)

Murari Rao of Gutti invaded Kadapa. War began between Hyder and the English. Battle of Hôrôdu (vulgarly Errode, or Erroure), which is called French rocks, near Tiruna'mali.

1768 Hyder attacked the English at Madras. Battle of Mulu-vâgal (lit. Thorn-gate, vulgarly Mulwâgal, Mullwaggley, Manbagul,) on the 4th Oct.

1769 The English made peace with Hyder.

1770 The Nabob of Arcot invaded Tanjaur. A famine in Bengal. Death of Aurungzebe, the emperor or Grand Mogul.

1771 Tanjore was besieged by the Nabob of

A.D.

Arcot. Gandicôta was plundered four times in fourteen years.

1773 I'gala (Eagella) Shaum Rao, the Marata, plundered the Kadapa and Tanjaur countries.

Hyder took Calicut (Kallicôta).

1775 Hyder besieged Gooty.

1778 War between the English and the French. Feb. 6. The English took Pondicheri. War with the Maratas. Hyder vanquished the ('Mayána') nabob of Kadapa.

1779 Tellichery and Mabi were taken from the French by the English, March 17.

1780 Hyder commenced his final plundering excursion. Colonel Baillie's detachment was cut off. Sep. 10.

1781 Negapatam was taken by Sir Eyre Coote, who defeated Hyder near Porto Novo, July 1, and at Sholungur. See New Ann. Reg. 1784. A record written in Hebrew says "A.D. 1781 is Kali 4881, and this is Collam 956."

1782 Depopulation of the Carnatic at this period :

	Lives.
Destroyed in the (Jageer)	
Madras district	150,000
By sickness in Madras ...	20,000
By famine	10,000
Inhabitants of the neighbourhood	50,000
Died in making escape ...	40,000
Manufacturers, &c., carried off	20,000
Elsewhere	250,000

Total..... 540,000

To which add the loss of life in Hyder's army. See Sullivan's British India Analyzed, 1793, p. 521.

Death of Basalat Jang, 5th Oct. A famine in Western India, which even approached the Company's borders. (Hickey) *

* "The great famine of 1783 is called Chalisa 'forty' because it happened in Samvat 1840." See H. H. Wilson's Glossary, p. 99.

A.D.

A famine and a hurricane at M (Hickey.)

Hyder Ali died on Saturday, 7 which was the first day of (Mohu A.H. 1197. This event was long a secret, and has often been recorded under erroneous dates. Accessed his son Tippoo Sultan.

1783 Guntoor [Mustufa-nagar] was taken to the English, June 13, battle of Cuddalore between the French and the English. The English took Nágapatam [vulgarly Negapatam] from the French.

1784 Mons. Bussy [whom Hindus call Moosai Boosi] became governor of Pondicheri.

1785 Gootti was plundered by the Maratas.

1786 The English took Gúdlur (Cuddalore).

1787 Tippoo attacked A'úhoni. A great inundation at Coringa. Gent.

1788, part I, 264; there it is said to be as incredible, but Roxburgh verified it and has recorded it in his Flora 2, p. 84.

1788 Kollam year 964.

1789 Tippoo began to make war against the English. He invaded Tanjore.

1790 Sept. 14, battle of Sítamangalan. Nizam conquered Kadapa. The English took Bangalore from Tippoo.

1791 In this year (Virodhicrut) happened "Mina-Sani-Pravésham," or the conjunction of Saturn with Pisces. The dreadful portent according to astrologers, who say its "poison" lasted months. "The famine of 1791, 9 carried off half of the labouring class." Rox., Flora. 1, 85, note. Cornwallis stormed Tippoo's camp at Seringapatam 6th Feb. Bangalore taken by Cornwallis, 21st March. Battle of Seringapatam 25th May.

1792 The Maratas attacked Bidar-urgar (Bednore.) On the 18th of 1 peace was concluded between the English and Tippoo. He ceded half his

A.D.

minions; particularly the Coorg country. He surrendered two of his sons as hostages, and he paid as a penalty three crores and thirty lacs of rupees—that is, three millions and thirty thousand pounds.

In the Book of Dates (Metrop.) it is printed three-score of rupees: a curious oversight.

The battle of Lukairee, where Tukaji Holcar was beaten by De Boigne. (As. Ann. Reg., 1805, part 2, p. 25.)

1793 The English again took Pondicheri, on the 23rd of August, which they dismantled the next year. In Bengal, Courts for civil and criminal causes are appointed. Until this time Musulman law alone was administered, the English being lieges of the Great Mogul.

1794 Tippoo's sons are restored on the 29th of March. "Up to the present time England has made no great and lasting impression on the Indians, except by her military power."

1795 Kochi (Cochin in Travancore) surrendered to the English on the 20th of October.

1798 Lord Edward Clive (the second) came to Madras as governor.

Tippoo broke his treaty, and intrigued with the French, while he endeavoured to incite all the native powers to rise against the English; who therefore besieged him in Seringapatam.

1799 On the 4th of May the English took Seringapatam by assault, and Tippoo was slain. Mysore was partitioned. The districts of Kadapa and Bellary were ceded to the English by the Nizam on the 30th of December.

1800 The English took possession of Nelloor, 100 miles north of Madras.

1801 The English government of the Carnatic began. Troops were sent from India to Egypt. Zemaun Shah, King of Cabul, was deposed by his nephew. War in Mysore between Holcar and Saindhya (vulgarly Scindea).

1802 Holcar captured Puná (vulg. Poonah). Flight of the Paishwah. Defeat of Saindhya. Treaty of Bassein between the English and the Paishwah, 31 Dec. This treaty sealed the fate of India. The Paishwah agreed to receive a subsidiary force; the English undertaking to establish him on the throne of Poona.

1803 September 12, General Lake entered Delhi, defeating the Seiks and Maratas. Agra was surrendered to the English. The battle of Assaye (A-sahāyi, "Unaided"), in which Sir Arthur Wellesley, on the 23rd September, with 4,500 troops, of whom only 2,000 were British, defeated the combined forces of Danlat Rao Saindhya (vulgarly Scindiah) and the Raja of Berar, amounting to 50,000 men. Fall of Poonah. Holcar was expelled. Lord Lake took Agra; he defeated the Maratas at the battle of Laswaree. On the 17th of December peace is concluded with the raja of Berar, who cedes Cuttack (the Juggernaut country) to the British. Peace with Scindia on the 30th of December. He surrenders Baroach, Ahmednagar, and his forts in the Doab. This is the country properly called the Deccan (Dakhan, the South).

Treaties of alliance were made with the rajas of Bhurtpore, Joudpore, and other chiefs near the Jumna. Pondicherry was again taken from the French.

1804 The Maratas, under Holcar, were defeated by the English in several battles. The treaty of Burhaun-poor is concluded on the 27th of February, with Saindia. On the 16th of April, war is declared against Holcar, who lays siege to Delhi, but is forced to retire on the 8th of October.

A storm and flood for three days at Kadapa; followed by a famine.

A.D:

- 1805 Marquis Cornwallis became Governor-General; and died. Orissa was conquered from the Maratas. Holcar retires to Central India.
- 1806 The Vellore mutiny on the 10th July; 800 Sepoys were executed. In many books this is wrongly dated the 13th or 31st of January, 1807, which perhaps was the date when the event was published in England. See Gentleman's Magazine for 1807, part I., page 170. In a late work by Dr. David Allen, it is repeatedly miscalled Nelloor; which is a town 100 miles north-east of Vellore.
- 1807 Lord Minto arrived as Governor-General on the 31st July.
- 1808 War with Travancore; arising from dissensions between the British President and the Dewan, or minister, of the Raja, or "Samorin." December.
- 1809 The Travancore army is defeated in January, and in February the English stormed the lines and ended the war. A mutiny was quelled in Seringapatam.
- 1812 The Madras Government, under Sir George Barlow, stopped the Tent Contract. This led to a mutiny among the officers themselves. See History of British India, by Charles Macfarlane, 1854, p. 356; and the Edinburgh Review, for Aug. 1810, p. 399. In September, Lord Minto came to Madras, and granted an amnesty to the offenders.
- The Pindarries (Pend'éri) shake off the Marata authority and assert their independence. They plundered Mizapoor.
- 1813 A new charter for twenty years was granted to the East India Company. The first Bishop of Calcutta (Dr. Middleton) was appointed.
- The Marquis of Hastings (Lord Francis Rawdon) became Governor-General.
- 1814 War was declared against Nepaul.
- 1815 War with Nepaul ended; Kemaon being ceded to the British. Capitulation of Malown.
- 1816 A treaty was made with the Maratas.
- 1817 The Marata Confederacy is dissolved, and Ahmednagar and other places are ceded to the British, June 13. The great and final Pindaree war. Battle of Mahidpoor, where Holcar is defeated by the English, under Sir T. Hislop, and the troops of Scindea's army.
- The cholera broke out in Bengal, and spread through India.
- 1818 The Pindari war ended. Peace was concluded with Holcar. The Paishwa Baji Rao (who afterwards adopted Nana Saib) surrendered to the English, abdicating his power, and relinquishing all right to the Deccan. He retired to Benares, and received the stipulated pension of eight lacks of rupees yearly.
- 1819 The Vizeer of Oude throws off his allegiance to the Great Mogul.
- 1822 Treaty between the English and the Nizam—chiefly on exchange of territory.
- 1823 Lord Amherst became Governor-General. Runjeet Sing invaded Peshawar.
- 1824 The Burmese war began. The British took Rangoon. Mutiny of Sepoys at Barrackpore, near Calcutta.
- 1825 The first steam voyage to India was effected. A rebellion at Bhurtpoor (Bharata-puram), consequent on the death of the raja.
- 1826 The British conquered Bhurtpoor, January 18. Peace with the Burmese. The English retain Arracan.
- 1828 Freedom of the press was granted at Madras.
- 1829 Lord William Bentinck arrives as Governor-General. In December he passed a law for the abolition of suttees, or burning Hindu widows alive. Attempts at a

A.D.

mutiny at Bangalore, in October.

1834 The Raja of Coorg (Travancore) revolts, is defeated, and deposed.

1835 Lord William Bentinck abolished flogging in the Sepoy army.

1837 There was "a fourth revolution at Goa against the Portuguese Government." *As. Jour.*, August, 1837 (*As. Intell.*), p. 303.

1838 Slavery was abolished in India, October 1st. The English began to coin money in their own name, abolishing the Mogul's title. The Affghan war commences.

1839 Treaty with the Ameers of Scinde, March 11. The British forces enter Candahar on the 21st April. Ghuznee is stormed by Sir John Keane on the 23rd of July. Invasion of Sinde.

Jelalabad surrenders to Colonel Wade. Aden, the nest of pirates, was purchased of the Arabs by the English.

Dost Muhammad was defeated in Afghanistan, and surrendered to the English on the 3rd November.

1841 The Hindu pagodas and their revenues had hitherto been managed by the Honourable Company's government, who now relinquished the charge and gave up the income.

1842 The British evacuate Cabul. General Elphinstone's army is destroyed. The English army of retribution arrives at Peshawar. Cabul again taken by the English. End of the Affghan war. Ghuznee was again taken by General Nott.

1843 Sir Charles Napier defeated the Ameers of Scinde, at the battle of Meeanee. The Gwalior territory is subdued by the British.

1844 A revolution at Lahore.

1845 Battles at Moodkee and Ferozepoor. The Sikhs are defeated by the British.

1846 Battle of Aliwal; the English conquer the Sikhs. Also a battle at Sobraon, gained by Lord Gough; followed by the treaty of Lahore.

1847 A conspiracy at Lahore, by Vizier Lall Sing. He is deposed. The throne was given to Golab Sing, to whom Candahar is ceded.

1848 The British war with the raja of Ungool. The Ameers of Sinde were subdued. War in Mooltan. The siege of Mooltan was raised by General Whish on the 23rd of September; Shere Sing having withdrawn with 5,000 men. Battle of Ramnagar on the 22nd November, when Lord Gough expels the Seiks; who are also defeated by General Thackwell at Vizeerabad.

The Insurrection of the Moplahs at Calicut put down after great slaughter.

1851—52 The Persian war. Invasion of Herat. Expedition of the Persian Gulf. Capture of Bushire, &c.

1855 The Persians besieged Herat.

1856 War was declared by England against Persia.

1849 Mooltan was taken by storm on the 2nd of January. Battle of Chillianwalla. Gough defeats the Seiks on the 13th of January. Surrender of the city and garrison of Mooltan; Moolraj is taken prisoner. Lord Gough defeats and routs the Seiks at Goojerat on the 21st Feb. Surrender, at Raval Pindee, of the principal Seik chieftains, with 16,000 soldiers, to Major General Gilbert, 4th March. On 29th March the Panjab country was annexed to the British dominions.

1850 Mutiny of a Bengal regiment of native infantry at Umritsir, 2nd Feb. End of the war in Lahore.

1851 Bajee Rao, formerly Paishwah (chieftain) of the Marata Pindaris, dies at Bithoor.

A.D.

His nephew Nana Sahib claimed a continuance of his pension, which was refused.

1852 War on the Eastern coast; the British force the passage of the Irawaddy on the 4th of January. Martaban is stormed on the 5th of April. General Goodwin storms and takes Rangoon. Pegu is taken, but is soon evacuated. Prome is again taken. Pegu is recaptured on the 21st of November. On the 23rd of December the Burmese invest Pegu, which is relieved by the British. Annexation of Pegu to the British Indian empire.

1853 End of the Burmese war. Death of the Raja of Nagpoor: his domains are annexed to those held by the British.

1855 The Churruck-puja, or Swing-feast (a Pariar custom, in which devotees were swung by hooks put in the skin of their backs) was abolished in the Madras territories. The titular Nabob of the Carnatic (or Arcot) dies without an heir. His title terminates. The troops of the King of Persia besiege Herat.

1856 The annexation of Oude. War was declared by England against Persia.

1857 The great mutiny in the native army of Bengal broke out, 24th of January to the 6th of May. At Meerut, 10th of May. The mutineers establish their head-quarters at Delhi on the 12th of May. They proclaim the King of Delhi Emperor. Mutiny at Allahabad and Cawnpore. On the 1st of July the rebels besiege Lucknow. On the 17th of July General Havelock enters Cawnpore; on the 19th of July he defeats Nana Sahib at Bithoor. On the 10th of August General Nicholson arrives before Delhi. On the 14th of August Sir Colin Campbell arrives from England in Calcutta; [He was afterwards created Lord Clyde.] On the 14th of September to the 20th, storming and capture of Delhi by General Wilson. The sons of the King of Delhi are slain by Lieut. Hodson on the 25th of September. Havelock relieves the Europeans besieged in Lucknow. On the 10th of October General Greathed defeats the Agra contingent near Agra. On the 3rd of November Sir Colin Campbell arrives at Cawnpore. On the 17th November Outram, Havelock, and Campbell meet at Lucknow and dislodge the mutineers. The British quit Lucknow on the 22nd of November. On the 25th, Sir Henry Havelock dies at Alambagh. On the 27th, General Windham is defeated by the Gwalior rebels near Cawnpore. On the 6th of December Sir Colin Campbell defeats the rebels at Cawnpore.

1858 Sir Colin Campbell defeats the rebels at Futtyghur on the 2nd of January. On the 6th of January Jung Bahadar captured Goruckpore. On the 23rd of January Roberts takes Awah in Rájpootána. On the 28th of January Sir Hugh Rose captures the fort of Ratghur. On the 11th of February Sir Colin Campbell leaves Cawnpore and advances to Lucknow, where the siege commences on the 8th of March, and on the 19th the place was taken. On the 3rd of March General Roberts takes Kotah. On the 2nd of April Sir H. Rose takes Jhansi. On the 19th of April General Whitelock defeats the mutineers at Bandar. On the 27th of April, death of Sir William Peel at Cawnpore. Bareilly is seized by the British on the 7th of May. On the 8th of May Sir H. Rose takes Kooch, and on the 23rd he takes Calpee. On the 1st of June the rebels seize Gwalior, which is recaptured by Sir H. Rose on the 19th. On the 14th of July General Grant defeats the rebels at Kotara.

Trial and conviction of the King of Delhi in the palace of Delhi. January. He was banished for life to Rangoon.

The Government of the East India Company, by the final charter, terminated on the 1st of September.

A.D.

On the 2nd of September two disarmed regiments rebel at Mooltan and are destroyed. General Roberts defeats the Paoree rebels. General Mitchell defeats Tantia Topee at Beora. The rebels sustain numerous severe defeats.

On the 1st of November the Queen is proclaimed Empress of India: Lord Canning receiving the title of Viceroy. General Wetherell defeats the rebels in Oude. Lord Clyde (Sir Colin Campbell) defeats the mutineers near Fattahpoor. Defeat of the rebel Tantia Topee.

It appears that this was some other person: the real Tantia Topee being apprehended with Nana Sahib in 1863. But Tantia Topee is a mere nickname (like Le Petit Corporal), meaning 'Stout Cap,' and there might be two.

1859 The Panjab was proclaimed as a Presidency on the 1st of January. Surrender of Maun Sing, Defeat of the rebels under Tantia Topee on the 16th of January; he was hanged at Seepree, on the 18th of April. Execution of Raja Jaya Lát Sing, who was hanged at Lucknow, where he had committed his cruellest murders.

The mutiny is suppressed on the 1st of July.

1861 Famine in India. In England one hundred and sixty thousand pounds were subscribed towards relieving it.

1862 The Year of Repose. Abu-zafar-Seraj-uddin-Mohammad Bahadar Sháh Badshah Ghazi, the ex-Emperor of Delhi, the last of the Great Moguls, died in exile at Rangoon.

1863 Apprehension of Nana Sahib and Tantia Topee.

APPENDIX.

ON THE CYCLE OF SIXTY YEARS;
CALLED VRIHASPATI CHACRAM,
OR CYCLE OF JUPITER.

Warren's Treatise on this subject, in his *Kala Sankalita*, page 197—216, is addressed to astronomers. I shall endeavour to extract so much as may be available to common readers like myself.

He observes that this Cycle of Jupiter has been imagined, but without foundation, to be the same as the Chaldean Saros (misprinted Sosos). "In a chronological point of view, Jupiter's Cycle is important, because it was ever a practice in Southern India, when dating documents, to annex the name of the year of the (Chakra) Cycle.

"I have not been able to discover the origin of the practice of reckoning time with reference to the revolutions of the planet Jupiter; but it no doubt is very ancient. . . . Its legitimate application has long fallen into disuse in the Peninsula of India; where sixty solar years are supposed to be equal to five revolutions of the planet. This is not warranted by the *Surya Siddhanta*, nor the commentators thereon, nor by observation. Generally one year of Jupiter's Cycle is supposed to answer to the time during which the planet passes through one sign of the Zodiac."

I have copied these few lines out of the *Kala Sankalita* lest it should seem that I had introduced the phrase as an idea of my own.

ON ECLIPSES.

Many of the Sanscrit inscriptions specify eclipses as corresponding with the dates; but the great Sanscrit philologist Colebrooke states (in his *Essays*, vol. 2, page 178) that he was unable to reconcile the Indian with the European calculation of eclipses. Hales

observes in his *Chronology* (edition 1830, vol. 1, page 252) that Sir Isaac Newton, in his *Chronology*, has neglected eclipses. In "*L'Art de verifier les Dates*," there are tables of Eclipses which do not coincide with the calculations made by Bramhans.

In Musulman history the same happens. Thus, in the *History of Bengal*, entitled *Seir-i-Mutakherin*, (4to. 3, page 118) is described, Salábat Jang's victory at Poonah, dated in A.H. 1165 (misprinted 1765), wherein the first month, Muharram, was November-December, 1751. It is added that "the moon was eclipsed the whole of this month," a fable mentioned nowhere else. Yet there was a lunar eclipse in Europe, on the 21st of November, 1751. See *Gentleman's Magazine* for 1751, page 505—6.

In the memoirs of the false prophet Muhammad, called *Mishcât-ul-musâhib* (book 4, ch. 51, page 327), an eclipse of the sun is noted on the 10th day of Rabi-ul-avil, in the tenth year of the Hejira, answering to the 5th of June, A.D. 631. Captain Matthews, in his translation, observes that according to European calculation, this should be ten days later.

In longitude, reckoned from London, Arabia is only about half way to India, where the discrepancy is of course still greater.

ON INITIAL DAYS.

Though they are placed in parallel columns, the various years begin on different days; thus the A.D. 1850 answers to the 4951st year of the Kali Yugam, or Hindu date from the creation of the world, commencing on the 12th of April. It is (SS.) 1772-3 of the *Salivahana Sacam*; this begins on the 14th of March in the Telugu countries, but on

the 12th of April in the Tamil lands. It is year 1907-8 of the *SACAN*, or *Vicramāditya* era, beginning in the Guzerat country on the 5th of November, elsewhere on the 14th of March. It is year 1025-6 (beginning on the 15th of September) of the *Parasurāma* or *Kollam* (vulgarly *Quilon*) reckoning, used on the south-west coast of India, wrongly called *Malabar*. It answers to year 1266-7 of the Musulman year called *Hejri*, which begins on the 6th November. At *Puri*, in *Katagam* (which we call *Juggernaut*, in *Orissa*), the year begins on *Phālguna Bahula Padyaimi*—which, in the contiguous *Telugu* country, is not the month *Phālguna*, but *Chaitra*.

At present we count the year from the first of January; but until *New Style* began in 1752, the year began at the feast of the *Annunciation*, on the 25th March. In *Monstrelet's Chronicle*, we find the year was counted from *Lady Day*; or else from *Easter*: and in earlier ages from *Christmas*.

In *Pepy's Diary*, the editor has deviated from his original, and counts the year from the 1st of January. The same oversight occurs in *Wade's Chronology*.

The initial day of the *Fasli* year agrees with that of the *Tamil* reckoning.

ON NAMES OF LANDS AND LANGUAGES.

Our books regarding India are not very exact in the names. The names *Gentoo*, *Coromandel*, *Malabar*, *Telingana*, *Deccan*, *Circars*, and *Mysore*, are all phrases introduced by foreigners.

Deccan is usually derived from *Dacshina*, *Dakhan*, the Sanscrit word for *South*. It was the name of the country which lies between the *Nerbudda* and the *Krishna*. (See *Wellington's Dispatches*, 1802, introductory note.) "The two capitals of the *Decan*, or *Dakan*, are *Aurangabad* and *Hyderbad*" (in *Golconda*), says the *Seir-i-Mutakherin*, or *History of Modern Times*; written in 1780.

Sir *Thomas Roe*, writing in 1615, spells it "*Decan*." The Italian, *Pietru Della Valle*, writing in 1623, says "*Dacan*." (Edition 12mo., *Brighton*, 1843.) Some French writers spell it "*Daquem*."

Writing in 1790, the political surveyor, *James Grant*, applies this name *Deccan* to the six nations inhabiting the *Peninsula*. (See *Sullivan's British India Analyzed*, 3, p. 668.) *Rennell* uses it in the same manner. *Ferishta*, careless of etymology as Persian and French writers generally are, gives a fabulous origin, tracing the name to a son of *Noah*.

The old Sanscrit authors very naturally called the peninsula "*Dacshina*," south. In the beginning of the second book of the *Hitopadesa*, '*Dacshina Pathé*' is rendered '*In the Deccan*;' but should not it be '*In the South*?' In the "*List of Fifty-six Countries*," found in many Sanscrit books, the word "*Daxina*," does not occur.

Baldæus, who travelled in India in 1640, has a map in which the western coast, from *Bombay* to *Goa*, is called *Decan*. South of this is "*Concan*," and further south is "*Canara*." East of "*Balaghat*" is "*Bisnagar*," and east of that is "*Narasinga*."

Some English books say that *Kanara*, or *Kannadi*, is corrupted from *Karn'ât'a* and *Karn'atāca*. This is a mistake. *Karn'ât'a* was the name of the entire realm of *Vishnu Vardhana*, wherein the western part alone was *Kanara*, or more properly *Kannadi' désam*.

Vijaya-nagar (*Bisnagar*) is in the *Tulava* country. *Krishna Rayalu* was "*King of the Tulavas*," and the modern capital being *Maisoor*, the "*Maisoor bhasha*" is the language which we call *Kanarese*. This is despised by the *Telugus* as a mere gibberish.

In the "*Modern Universal History*" (edition printed in octavo, in 1766), vol. 6, p. 491; and also in *Heylyn's Cosmographie*, folio, 1682, book 3, p. 202, it is stated that after A.D. 1300, *Muhammad Shah* rebelled, and called himself *King of Deccan*, giving this name to the country heretofore called

Canara, "in regard that he had filled it with a mongrel body of Christians, Mahomedans, and Gentiles, agreeing neither in parentage, language, customs, nor religion; the word Decan signifying in that language an illegitimate brood."

No authority is quoted for this strange story, which also appears in Prevost, *Hist. des Voyages*, vol. 13, p. 302 and 303, who refers to Otter's *Voyages*, tom. 1, p. 341.

In Briggs's Translation of Ferishta's History of the Deccan this fable is not mentioned. But the country embraces the Kannadi, Tulava, and Marata nations, and each of these names signifies base, miserable, wretched. Kannadi (but with the soft D) in Telugu signifies Rubbish.* Tulava means Vile; and the Introduction to Candy's Marata Dictionary derives "Mharáti" from "Mhár," meaning a pariah, or outcast. Oordoo, or Ordu (Hindustani) is merely the language of the (Urdu) "camp."

The natives of Canara call their country "Maisuri Désam," and the language is the "Maisuri Bhasha."

ON THE NAMES OF THE TELUGU COUNTRY AND LANGUAGE.

I.—ON THE TRUE NAME AND LOCATION.

Circles drawn on the map of Southern India, round Kadapa, Rajamahendry and Kondapilli, the radius of each extending to Madras: and another drawn Vizagapatam, and extending to Ganjam, will sufficiently shew the countries wherein the Hindus (rated at fourteen million souls in 1855) speak Telugu.

The people call themselves Telugu, or Tenugu, and the spelling sometimes is Telungu, Delungu.

The Sanscrit name is An'dhra or Andhra (Undhra), the country being Andhra Dés'am.

Vicrīti or Vaicrūti (the dialect) is a phrase

* It is curious that Canada, in America, is a name unknown to the aborigines, and is supposed to mean "Ca-nada"—"we have nothing."

sometimes used by native grammarians, as distinguishing it from Sanscrit and Pra'crit.

The north-east part is called Kalinga Desam, a name which still is used in Kalin-gapatam, a seaport, north of Vizagapatam.

Eight centuries ago the whole realm, extending from Chicacole in the north to Seringapatam in the south-west, was called Karnát'ca Rajyam, and the old kings were called Karnataka Doralu.

II.—ON NAMES GIVEN BY FOREIGNERS.

The Tamil people call the language Telinga.

They also called it Vadaghei, that is, Northern, which is also pronounced Badaga. Early Portuguese voyages changed this into Varuga, Vardaga, Varugic, which their Latin writers called "Regnum Var." The name of the raja at that time being Narasinga, they fancied this was the name of the country.

Gentoo, or Jentoe, seems to be a phrase used by the Portuguese, sometimes for the Hindus in general; sometimes for the Telugu nation in particular.

The northern part of the country was called "Northern Circars" (Sircár, that is, district) a name used first by the Musulmans, then by the French.

Sailors who came from Aracan and Pegu were best acquainted with the port at Kalin-gapatam, and hence they called the whole coast the Kling country. See Marsden's Malay Dictionary and Grammar, and the critique in the Edinburgh Review, 1814, p. 170.

Musulman writers call the country Telinga, or Tylinga. They raised many troops in these parts, and afterwards employed them in Bengal; so did the English, hence Tylung (like *les Suisses* in Europe) has come to mean a soldier.

III.—ON SOME PEDANTIC NAMES.

Appa Cavi, the grammarian (who lived about the year A.D. 1600) asserts that the original name of the language was Trilinga; and in the Introduction to Campbell's Teloo-goo Grammar may be seen remarks on this word and its derivative Trailinga.

But this word is unknown to the more

ancient authors, who wrote some centuries earlier. Neither in the Grammars nor Poems do they mention such names.

The story given by Mr. Campbell of three Lingas, or images of Siva, placed as landmarks, is unknown; it is also incredible, for the religion at that time was Jaina, not Saiva.

Trilinga, 'three gendered,' is a phrase in Sanscrit grammar for nouns of the common gender. The Bhagavat also (page 293, at the beginning of the Narasimh Avatâr) speaks of the deity as "Trimûrti Trilinga Vyacti." This is quite separate from the name of the language.

There are Sanscrit lists of "the Fifty-six Countries" in several books. Mr. Ward, in his work on the Hindus, has included the name Troilinga, but without authority.

In the long series of inscriptions collected in the Local Records, the names Andhra, Telugu, Tenugu are often used. Trilinga never appears.

IV.

In his Natural History (VI, chap. 22) Pliny also speaks of Kalinga. In Sillig's edition, 1851, the word is spelt thus—"Insula in Gange est, magnæ amplitudinis, gentem continens unam, nomine Modogalingam." There are various readings, as "Modogolungam." In Valpy's Variorum edition there are other readings. In the manuscript of Pliny in the British Museum, No. 11,994, p. 67, it is written, "Novissimæ gentes Calingarum regio pertalis [other copies read Protalis, Portalis, Parthalis, Proclais] vocatur: regi lx., peditum equitum M., elephantum DCC., in procinctu bellorum excubant." (See English translation, Bohn's edition, vol. 2, p. 44.) Then, a few lines further in the manuscript, "Insula in gange est, magnæ amplitudinis gentem continens unam, nomine modrogalingam." And soon after he says, "Validior gens ANDARÆ, plurimis vicis." In another manuscript it is Andarum. In Sillig's edition the various readings are Modogalicam, Modogalungam, and "Nomine modo

CALINGAM." Here the true name at length appears.

By "Ganges" (a word applied to any holy river) we may understand the river Godavari, which is often called "Godavari Ganga." The "Insula in Gange" is merely the delta in this river.

Pliny evidently writes from information given by sailors: and his account is not very intelligible. In the next page (cap. xx.) he speaks of Promontorium Calington.

Campbell also quotes a passage from Ptolemy, speaking of the Triglyphon, or three-imaged region; but can this denote the Telugu country? In Thomas Herbert's voyages, 1638 (p. 318), Pegu seems to be intended in the account given by Ptolemy.

Kalinga is correctly stated in Wilson's Sanscrit Dictionary (2nd edition, p. 202) to be "a name applied in the Puranas to various countries; but especially to a district on the Coromandel coast, extending from below Cuttack to the vicinity of Madras." Wilkins, in Fra. Buch. Mysore, vol. 2, p. 305, erroneously says it is "Muttura Bindera-bund," while "Kalinda" is Vijayanagar.

In Ælian's Natural History (book xvi, p. 14) it is stated that elephants were shipped at Ceylon, and sent to the King of Kalinga.

See Journal of the Royal Asiatic Society, 1861, vol. xviii, part 2, p. 349.

V.—FURTHER REMARKS ON THE NAME ANDHRA.

In the Laws of Manu (x., 36) this name, with a short initial vowel, occurs as the name of a savage tribe. In Telugu writers the initial is usually long.

"Sucarnâ Deva lived in A.D. 190—one hundred and ninety. He was the most distinguished of the A'ndhras in India. His reign forms an epoch in Indian history. He dethroned the King of Magadha, and extended his rule over Assam, beyond the eastern boundary of India." (Encyclo. Metrop.) The authority for this statement is not quoted. It perhaps originated in Captain Francis Wilford's Essays on the Sacred Isles

of the West (*Asiatic Researches*), which give four lists of the Andhra Dynasty, quoted from the *Bhagavat*, *Vishnu*, *Vayu*, and *Bramhanda Puranas*. These lists, if veracious (all of them are Sanscrit epithets), appertain to a northern tribe, distinct from the *Telugus*, and flourishing in earlier ages.

There is a Sanscrit treatise, by Kalidasa, on Prosody, called *Sruta Bódha*, printed with a French translation by M. Ed. Lancereau, in the *Journal Asiatique* for Dec., 1854. In section 41 is this line

"Védair ándhrai yatra virág-yasti viráma."

This translated the "number of the Vedas (i.e., four) and of the Andhras"—which is explained "nine"—"Nom d'une dynastie de neuf princes, rois de Magadha." I do not see any basis for this interpretation; and I fancy we ought to read "*Védair randhrai*." For (as shewn in page 21) *Veda* denotes four, and *Randhra* denotes nine.

VI.

A few other names erroneously given to this language may be noticed as mere errata.

Telinga, Tallinga, Tullinga, Tailanga, Toilang, Toylung, Tillinga, Tillinghy, Telungda.

Some French writers call it Talenga, Tinlinga, Telongou, Telogou, Feulinga, and Zelingani, and Zelenga, which is given in a book by Peter Parley, lately published. The name Badaga has been noticed above.

The Musulmans called the country Tullingana, and sometimes it has been misprinted Lollongana.

It should be observed that there is, in this nation, a particular tribe of Sudras who are called Telagas. Campbell's fancy about the name originating in the word "Tella," meaning "white," does not deserve notice; nor his notion about Tenugu (with a short initial) being derived from "te'neh," honey, which has a long initial vowel.

ON VARIATIONS IN THE CALENDAR;

ABRIDGED FROM THE "BOMBAY GUARDIAN;" A WEEKLY PAPER OF THE 20TH AUG., 1851.

The *Hindu Calendar* has this year been deceiving not only native but also Europeans. It was supposed that because "Cocoanut Day" was over (a holiday when the season is supposed to open for traffic), therefore the monsoon was at an end. But the Hindus have intercalary months, to make the year correspond with the seasons. Such an intercalary month began on the 16th August, which was the first day of the new moon. If this had happened thirty days earlier, *Cocoanut day*, instead of being the 30th of July, would have fallen on the 28th or 29th of August; by which time, indeed, we may hope that the high winds and heavy rains of the monsoon will be over. This state of the calendar shews that it does not suit the seasons. In 1851, this feast happened on the 18th of August.

The Hindus divide the zodiac into twenty-seven parts; from some of which they name

the months. They know our method of the twelve signs, but do not use it in this matter. Each of the twenty-seven has an extent of thirteen and a half degrees: on an average the sun moves through two and a quarter every month. On the European system we get about one month more (in about three years) than if we reckoned by solar time. But the Hindus reckon by lunar months; to make which suit the seasons they require an intercalary month in a little less than three years. How do they regulate where it is to come in? As the months are named from certain of the twenty-seven signs of the zodiac, it is necessary that the sun should be in the sign, or division, from which the month takes its name, sometime or other during the month. If they find by calculation that the sun will not arrive there before the change of the moon, they insert an intercalary month. Thus, the month

Śravana ended on the 15th August, 1851, the day of the new moon; but calculation shewed that during the next thirty days the sun would not come up to the lunar constellation Bhadrā, from which the next month, Bhādra, is named. Therefore an intercalary month is inserted, as an extra (Adhica-Bhādra) before the regular Bhādra. As the sun moves slower in the northern than in the southern signs, this intercalary month always comes during our summer, or early in the autumn.

But the Hindu Calendar also occasionally (though rarely) omits a month in the winter season, on the same principle. The sun moving rapidly through the southern signs, sometimes passes through the constellation from which the month is named before the 30 days of the previous month are completed, therefore that constellation loses (on such an occasion) its privilege of giving its name to the month—an honour that falls to the next in rotation. Thus it sometimes happens that, within twelve months, there are two intercalary months and one omitted.

Suppose then that there is an intercalary month near the Autumnal Equinox, and a month omitted near the Winter Solstice; it may be right, sometime after the Vernal Equinox, to intercalate a month, as the other two had nearly balanced one another. This seems profitable to none but the Jyōsi's, or Almanac makers. How different it is from our simple rule:—"Take the number of the year, divide it by 400; if there is no remainder it is a leap-year. If there is, divide it by 100. Then, if there is no remainder, it is not a leap-year. But if there is a remainder, divide that by 4; if there is a remainder, it is not a leap-year; if there is not a remainder, it is a leap-year, and February must have 29 days."

In a case that lately occurred in the Sudder Dewanny Adaulat there are one or two points that illustrate Hindu institutions.

A plaintiff was found to be fourteen days too late in bringing his plaint into court.

The local judge, from whom he appealed, calculated by English time; but on reaching the Sudder Adaulat, it was found that he still had threescore because days (they determined) that the calculation should have been made according to the Hindu reckoning. The reason is clear, from what we have stated above. An intercalary month had lately taken place, so that by their method of computation the plaintiff had an advantage of seventeen days.

In the Kala Sankalita, page 71, are these rules, somewhat altered in the wording for clearness:—

- "1. A common year is called Samvatsaram, or 'Māna' (a measure).
- "2. An intercalary year is Adhica-Samvatsaram; that is, a year that has an extra month.
- "3. A double intercalary year has a month expunged (cshaya, consumed), and is called Cshaya Samvatsaram.
- "4. When a month is intercalated the word Adhica (extra) is prefixed. Thus, in some years we have first Adhica Aswina, and then Nija Aswina; of these the first is the extra month.
- "5. When two Tit-his end in the same solar day the intermediate one is expunged, and is called Cshaya (i.e., lost).
- "6 When a Solar day occurs in which no Tit-hi begins, the preceding one is called "Adhica," or intercalated, and its numeral is repeated."
- "7 When a tit-hi begins before sunrise, or at sunrise, it is counted as belonging to its concurrent solar day."

The Sanscrit word tit-hi is separate from the Telugu word Tēdi, which means a day of the month commencing at sunrise; or, according to the Musulmans, at sunset.

Other rules are given, but these may suffice for the general reader.

MEMOIR OF LIEUTENANT-COLONEL COLIN MACKENZIE,

SURVEYOR-GENERAL OF INDIA.

He landed in India in 1783 as a cadet, and then was sent to Ceylon with his regiment on an expedition. When he returned to Madras, he met with a young Telugu bramhan, named Cavali Vencata Bóraiia, who was his industrious assistant in enquiries regarding antiquities. He was employed with his corps in several parts of Southern India. Some papers which he wrote appeared in the Asiatic Researches. He made the first attempt to ascertain, methodise, and embody the geography of the country. His means were slender, his prudence great, and his industry unwearied. In 1796 he prepared and laid before Government the first general map of the Nizam's dominions in the Deccan : hitherto unknown to the English. After the downfall of Tippoo Sultan, in 1799, he was appointed to survey Mysore. Captain Warren, who afterwards compiled the Kala Sankalita, was one of his assistants. Major Mackenzie continually accumulated documents regarding history. Throughout the villages from Tanjore to Nagpoor there were Sanscrit inscriptions on rocks, or on plates of copper, or in various records, bearing the names of the rulers in past ages ; who had bestowed lands on priests and others. His messengers collected copies of these, amounting to about seven thousand. He first ascertained the facts regarding the Jaina creed. In 1810 his appointment ceased, and he went with his regiment to Java, where he pursued similar enquiries. In 1815 he returned to Madras and was appointed Surveyor-General of India. He was sent to reside at Calcutta, where he died in 1821. The Government purchased his prodigious collection of manuscripts and antiquities. The learned Horace Hayman Wilson prepared a report, published in two volumes at Calcutta, in 1828, entitled "The Mackenzie Collection : a Descriptive Catalogue of the Oriental manuscripts and other articles illustrative of the literature, history, statisticks, and antiquities of the South of India, collected by Lieutenant-Colonel Colin Mackenzie, Surveyor-General of India."

The statement here given is abridged from Wilson's Preface, and from a Memoir in the first volume (p. 333) of the Journal of the Royal Asiatic Society, London, 1834.

All that portion of the Mackenzie manuscript which was written in the languages of Southern India, is now (1855) lodged in the library of the late College at Madras ; where a Catalogue Raisonné is now being printed.

LIST OF WORKS.

The first volume of a Catalogue Raisonné, was printed in 1857. To this is prefixed a general report, written by my friend, Mr. Carmichael, of the Civil Service. He first describes the Mackenzie Collection, then one which had been deposited in the East India House in London ; then one made by Dr. Leyden ; and then one made by me. And then he has given a list of "books written and published by Mr. Charles Philip Brown."*

A Grammar of the Telugu language, 1840, second edition, 1857. [A third edition is ready for printing, 1863.]

The English-Telugu Dictionary (1392 pages, royal octavo).

The Telugu-English Dictionary, 1303 pages. [Each of these has been greatly extended and prepared for republication, 1863.]

* This list was not quite exact, or complete : it has now been corrected.

Dictionary of Mixed Telugu ; the language used in business ; the Hindustani dialect.

Telugu and English Dialogues, with a grammatical Analysis. These have also been published in Tamil and Kannadi.

The Telugu Reader ; being a series of Letters, private and on business, police and revenue matters, with an English Translation, and notes explaining the Grammar ; and a little Lexicon, 8vo., 1852.

English Irregular Verbs, explained in Telugu. The same in Tamil.

The Vákýávali', or exercises in English Idioms, translated into Telugu. Also (in separate volumes) translations in Tamil and in Dakhini Hindustani.

Disputations on (Mírásí) Village Business ; being copy of a Telugu Record written in 1760, with an English translation.

The Wars of the Rajas ; being a Telugu record of occurrences in the Bellari district about the year 1750, with an English version.

The Tátáchari Tales, including a portion of the History of Hyder ; in Telugu.

The Verses of Vémána [Telugu, with an English translation], published in 1829. Several editions have been printed since without the translation.

An Analysis of Sanscrit Prosody, printed in the English character. London, 1837. The Prosody of the Telugu and Sanscrit languages explained. Madras, 1827.

Essays published in the Journal of the Madras Literary Society, On the language and literature of the Telugus ; On the Christian Literature found in the Telugu language ; On the Creed and Customs of the Jangams, &c.

Cyclic Tables of Hindu and Musulman Chronology. 1850. [Republished, 1863.]

An Ephemeris [in 600 pages] shewing the corresponding dates, according to the English, Telugu, Tamil, Malayalam [Kollam] and Mahomedan [Hejri] computations, from A.D. 1751 to 1850, with a Chronology of Events, 1723 until 1843.

Memoirs of Hyder Ali, and his son Tipþu Sultan, translated from a Marata manuscript.

Various volumes translated into Telugu for Educational Societies.

Also new edition of Three Treatises on Mirasi Right, by Mr. F. W. Ellis, Colonel Blackbourne, and Sir Thomas Munro.

Also, the best Poems in the Telugu language. The Manu Charitra (1851) and the Vasu Charitra (1844), two classical works, with new commentaries written in Telugu. And others. The Pancha Tantram ; and several other Telugu volumes, with verbal commentaries and Indexes in the same language are also ready.

Also, in Sanscrit, the Book of Psalms and the Book of Proverbs, in metre, reprinted in the Telugu character from the Deva-nagari. The Tales of Nala and Savitri, and the Bhagavad Gita.

Also, in Telugu metre, the Tales of Nala, and of Harischandra ; the Gajendra Móxam, the Kuchelo Pakhyán, the Garudáchalam, and some other popular volumes.

There also remains unprinted a complete translation of the Holy Bible in Telugu.

ERRORS IN COPIES OF INSCRIPTIONS.

I will here add a few remarks from a paper which was not at hand when a former page (p. 37) was printed.

A few other years are mistaken, thus :

24 Vicriti is wrongly written	33 Vicári.
20 Vyaya	27 Vijaya.
60 Xaya	28 Jaya (Buch. Mys. 3, 233.
46 Paridhavi	19 Parthiva (ib. 3, 234).
38 Krodhi	{ 23 Virodhi. 59 Krodhana.

5 Prajotpatti is wrongly spelt Prajapati, which is no title.

In the Mackenzie Manuscripts some inscriptions have been wrongly copied; and the tables in the present volume furnish the means of correction. Thus, in one place Bukka R. is wrongly stated to have reigned in the year Durmati 1333 (A.D. 1411); but 1333 is not so named. Luckily the date is also given hieroglyphically (see p. 21), "Sikhi, vyoma, vanhi, chandra," which denotes 1303 (A.D. 1381), and in that year this raja was in power.

In Buchanan Hamilton's Mysore (vol. 3, p. 170) is an inscription dated SS. 1472, title, Swabhanu, in the reign of Saluva Krishna DR., son of Sadasiva. But 1472 is not so titled, and does not fall in his reign. The numeral, I believe, should be 1445, which bears that title, and falls within his reign. The rock is at Hirigatti, near Gokarna; and were it again inspected the true date might be known.

In the same volume (p. 173) is mentioned "the year Durmati, fourteen years after Hyder conquered Bidaroor." This is certainly an error for Durmukhi, A.D. 1776; this is within Hyder's time, the other is not. [See Wilks, vol. 1, p. 451.]

Some long historical memoirs were framed for Mackenzie in the style described in page 45, regarding Parixit and Janamejaya; the initial date alone being given; and the initial date has been wrong.

In the Haleh-Kannadi, or Tulava, language the numerals 3 and 7 are shaped so far alike that errors often occur; if we miss one we should try with the other.

THE END.

X
12 N. 1.
